GPSR-1

Receiver GPS

Characteristics

- GPS module, designed for synchronization of switching clock SHT-6.
- Two-wire connection using screwless terminals - no matter the polarity!
- Connection cable length up to 100m.
- Optical indication of module functional states.
- It broadcasts time information in DCF 77 format.
- Setting the time zone of the DIP switch (UTC-12 to UTC+14).
- Choice of one of 40 time zones
- **The receiver is only compatible with the new SHT-6G version (EAN: 8595188182751) and firmware 2.37 or higher**

Description

1. Connection terminals with SHT-6
2. Indication of operating states
3. Sync indication
4. DIP switches to set the time zone

Connection with SHT-6

If a shielded cable is used, connect the shield to terminal G.

Technical parameters

GPSR-1	
Connected:	two-wire, it does not depend on polarity
Max. voltage on conductors:	DC 10 V
Other information	
Working temperature:	-20.. +55 °C
Storage temperature:	-30.. +70 °C
Covers:	IP65
Terminal plate:	screwless clamps
Cross-section of connecting conductors:	drat: 0.2 - 0.75 mm ² / cable + core: 0.25 - 0.34 mm ²
About the connection cable:	max. 6.5 mm
Dimension:	98 x 62 x 34 mm
Weight:	96 g
Reception area:	whole world

Installation

- It must be mounted so that there are no obstacles between the GPS receiver and the direction of reception (trees, roofs of buildings, etc.)
- There must not be any transformers, contactor relays, fluorescent lamps, etc., placed in the immediate vicinity of the GPS receiver (about 1m)
- Do not install GPS receiver near metal objects, el. cables, etc.

LED indication

	red LED (under cover)	green LED
Failure of internal circuits		-
Searching for GPS signal		-
Synchronization time. Information		-
GPS signal OK	-	
- sending time information	-	

Function

GPSR-1 is designed to receive and decode the signal GPS. The correct operation is indicated by the red LED flashing at interval 1s.

Warning

Installation and connection should only be carried out by a qualified installer or electrician, who is thoroughly familiar with these instructions and functions of device. Before starting the installation, please make sure that the device is de-energized and the main switch is in the off position. For installation and setting use screw-driver cca 2 mm. The device is fully-electronic - installation should be carried out according to this fact. Non-problematic function depends also on the way of transportation, storing and handling. In case of any signs of destruction, deformation, non-function or missing part, don't install and claim at your seller it is possible to dismount the device after its lifetime, recycle, or store in protective dump.

Overview of time zones
