USER'S MANUAL FOR FAN FORTIC 1000

Safety instructions

1. Never put your finger or other something into the cover to avoid any harm.
2. Make sure to keep the fan far away from burning, chemical articles and oil.
3. While running, be sure to not splash water and do not use oil, alcohol or chemical articles as they may cause destruction of fan body and cause electrical hazards.
4. Do not pull out the power supply plug by pulling power supply cord, which may lead to electrical shock or generating electrical shock.
5. Keep away from curtain, clothing or other something may affect the fan's working.
6. Turn off all switches and pull out power supply plug when you go out for long time.
7. Never use the fan before finishing assembly or avoid any harm.
8. If the supply cord is damaged, it must be repaired by the manufacturer or its service agent or a similarly qualified in order to avoid a hazard.
9. Before sending for maintaining, if the unit doesn't work please check the plug of power supply has been inserted into socket with electricity.
10. Do not use the electric fan in rain.

Structure Diagram

Installing and using

First step: Assemble and connect the base with assembly up-down tube and support tube. Open the casing and take out base. Then assemble the tube and cover of up-down tube and support tube. After the fan takes out the bottom of support tube of support at the bottom of the base and tighten the screws. Step disassemble cover to base alongside the support tube and adjust up-down tube to height. Then rotate tighten the external joint.

Second step: Assemble fan blade

- 1) Assemble joint cover and shroud ring. Tighten back cover exclusive on the motor by fastener. (Pay attention to direction of rotating). Place joint of shroud ring downwards and cover the deep groove of shroud ring to the circle side ring of back cover substance. Then tighten the bolts at the position of joint properly by nut.
- 2) Install fan blade. While installing fan blade, please wedge groove on the back of fan blade on screw pin of the output shaft of motor. Then tighten the fixing nut of fan blade until clockwise.
- 3) Assemble front cover. Insert the circle of front cover into the groove of shroud ring, which has been fixed to the back cover. Finally fix the bottom groove of the joint of shroud ring.

Direction of use

1. Setting of wind direction. This fan can swing to up and down direction. The angle of facing upwards and downwards can be adjusted by slightly hitting press the cover.
2. Setting of shading. Press the turning button and the head starts to rotate. Then pull it out and fan will stop rotating.
3. Setting of wind speed and wind type. Pressing button of wind speed can adjust the speed of wind.

Solution to simple failure

When starting the fan, the fan blade doesn't work. Please check whether the power plug has really inserted into the socket or the cover has dislocated, which has touched the fan blade. If sound the noise when starting the fan, please check the root as follows:

- (1) Fan blade has been tight installed into the output shaft or motor.
- (2) Groove on back of cover has matched the inserting groove on the output shaft.
- (3) There are the defective edges ring existing around the fan blade.
- (4) The cover has dislocated, which has touched the fan blade.

Maintaining

Be sure to switch off the power supply and pull out the plug before cleaning.

1. This machine only needs common external cleaning and wipe.
2. Place non eating and store in the dry position.

Technical Parameters

Model	Voltage	Power	Frequency	Remark
DL-1603W	220-240V~	45W	50Hz	Cross base without timer

NOTE CONCERNING PROTECTION OF ENVIRONMENT

This product must not be disposed of with the household waste after its service life. It must be disposed of according to the handling of electrical and electronic devices. The symbol on the product, the operating instructions or the packaging marks an important procedure. The marking is made of the symbol with their respective symbols. By means of this, you are making an important contribution to the protection of our environment. Please do not use any oil when you use household appliances.
