

IMPORTANT ORDER PROCESS INFORMATION

'Final Elite 2019 'Seating Price & Specification Guide'

From Monday 3rd June 2019 selected tables will be subject to the new height change as outlined in my previous correspondence dated 1st March 2019.

- If you require tables at 725h please ensure you suffix the product code with _725. For example; RMT16_16_725. The lead time for 725h tables will now be 4 weeks from receipt of order.

Please check your order acknowledgements to ensure that the correct product specification has been processed.

If you have any questions, please contact the Customer Service Team on 01405 746000 for clarification.

Yours sincerely,

Julian Jowett

Sales Director

MISSION STATEMENT

The Elite story began back in 1986. Building on 30 years of extensive industry experience, Elite has become a pivotal manufacturer of contemporary and adaptive office furniture, workstations and seating solutions.

Influenced by the modern-day workplace, we strive to embrace innovative techniques, using sustainable materials to produce efficient products that complement the office environment.

Although, our business has evolved, our principles have stayed true to our roots and our aim is to provide an efficient and reliable service, one that we're proud to deliver.

Goole Manufacturing, Office and Showroom Facility

The way we work

The Elite way of doing business means we aim to:

- Exceed clients' expectations
- Provide the highest quality product, manufactured by a skilled team
- Listen and learn from experience, to continually grow
- Develop our people
- Have integrity when working with partners

We are aspiring towards a bright future which means the next chapter of our story is going to be an exciting one and one that we want you to be a part of.

London Office and Showroom Facility

HISTORY AND HIGHLIGHTS

- **1986**
Production started in Howden, East Yorkshire.
- **1988**
Elite relocates to custom built premises in Goole, East Yorkshire.
- **1996**
Construction begins on a new 64,000 sq. ft. purpose built manufacturing plant.
- **1998**
CAD interior design department introduced, offering 2D & 3D office spacial planning to Elite's dealerships.
Construction began for additional 26,000 sq. ft. extension.
- **2000**
Elite Office Furniture UK Ltd website created.
Construction began for additional 20,000 sq. ft. extension.
- **2002**
Construction began for an additional 50,000 sq. ft factory extension.
Seating production began in-house, manufacturing task, executive and reception seating.
- **2007**
Elite purchased a showroom in the affluent and trendy suburb of Islington, London.
Sales and an extended arm of the design planning service is housed there alongside the prestigious showroom space which is allocated on two floors.
- **2008**
PEFC (Program for the Endorsement of Forest Certification) awarded.
- **2009**
New BLM Adige laser tube cutting machine installed at Goole factory.
New phase 2 corporate website designed and online.
- **2012**
John Hull (M.D.) is awarded I.O.D. (Institute Of Directors) Director Of The Year. Yorkshire & Humber Region.
Elite's screen range designed and manufactured on-site.
Newcastle University awards Elite with Excellent Supplier Award.
- **2013**
John Hull (M.D.) is awarded I.O.D. (Institute Of Directors) Highly Commended Director Of The Year (UK).
- **2014**
36 Ranges introduced in our seating portfolio.
- **2015**
New factory planning stage approved.
October: Work commences on new site.
- **2018**
Elite awarded BS EN ISO 50001 Energy Management System.
Elite awarded FORS Bronze status.
- **2019**
Completion of new factory at Goole, East Yorkshire.

PRODUCTION Elite's Manufacturing Plant

STANDARDS AND ACCREDITATIONS

COMPANY ACCREDITATIONS

"BS EN ISO 9001 Certified" means an organization has met the requirements in ISO 9001. It defines an BS EN ISO 9000 Quality Management System (QMS).

BS EN ISO 9001:2015 is focused on meeting customer expectations and delivering customer satisfaction so you must pay attention to the customer.

The BS EN ISO 14001 standard is the most important standard within the ISO 14000 series.

BS EN ISO 14001:2015 specifies the requirements of an environmental management system (EMS) for small to large organizations.

An EMS is a systemic approach to handling environmental issues within an organization.

BS OHSAS 18001 is an internationally recognised occupational, health and safety management system series standard.

The BS OHSAS 18001 standard is based on the similar ISO 9001 and ISO 14001 Plan.

BS EN ISO 50001 stipulates the requirements for an energy management system. Designed to make the most from energy technology, this standard helps management to reduce their energy consumption, while boosting their overall energy conservation.

This includes reduced energy costs, carbon emissions and a more secure supply of energy. BS EN ISO 50001 helps to take on a systematic approach to continually improve energy performance and establish a credible, certified reputation.

REGULATORY BODIES

Forests are critical for sustainable development providing a wealth of goods and services that are essential for a greener economy. Forest certification is crucial in providing evidence of sustainable forest management.

PEFC expands forest certification globally through its unique bottom-up approach to certification and is the certification system of choice for family and community-owned forests.

Launched in 2006 to support and improve the furniture industry's sustainability credentials.

FISP has rapidly become established as the industry forum on all environmental and sustainable issues.

Environmental legislation in the UK and Europe is becoming increasingly stringent and its complexity presents businesses with a significant challenge.

FIRA's Club Green sets out current and forthcoming environmental legislation, including how to dispose of waste, minimise energy and handle hazardous substances.

The Fleet Operator Recognition Scheme (FORS) is an accreditation scheme encompassing all aspects of safety, fuel efficiency, vehicle emissions and improved operations. FORS helps fleet operators to measure and monitor performance and alter their operations in order to demonstrate best practice.

MEMBERSHIP BODIES

British Contract Furniture Association. Affiliated Member.

The BCFA is the British business association for the contract furnishing industry, covering the full spectrum of interior products and services in the UK and globally.

A company can only become a member of the BCFA when it satisfies the association's standard of professionalism and makes a commitment to provide the market with the highest standards of service.

Furniture Industry Research Association.

Established in 1949, the Furniture Industry Research Association is the UK's largest furniture association and the only organisation that provides support to the whole furniture supply chain, across all sectors.

FIRA are also the testing bodies for BS ISO standards.

Leading provider of environmental compliance and data management services for waste and packaging in the UK and Internationally.

FURNITURE ACCREDITATIONS

BS EN 527-1:2011

Office furniture deskings dimensions

BS EN 527-2:2002

Office furniture deskings mechanical safety requirements.

BS EN 527-3:2003

Office furniture deskings strength and stability.

BS EN ISO 9241-5:1999

Ergonomics of VDU/TFT screen usage within offices.

BS 4875-7:2006

Strength and stability of shelving.

Test level 4 (shelves only).

BS 6396:2008

Office furniture deskings electrical systems.

BS EN ISO 9241-5:1999

Ergonomics of VDU/TFT screen usage within offices.

BS EN 13722:2004

Gloss/reflective level testing on furniture surfaces.

BS EN 14073-2:2004

Strength and rigidity testing of storage furniture part 2.

BS EN 14073-3:2004

Strength and rigidity testing of storage furniture part 3.

BS EN 14074:2004

Endurance and stability testing of storage furniture.

BS EN 15372:2008 level 2

Standard and folding tables structurally suitable and stable for general contract use.

UNE-EN 14323:2004

Dual Board resistance to scratching, cracking and staining

DIVIDING SCREEN ACCREDITATIONS

BS 476-7:1987

Flammability test for Screens
(Class 2)

BS EN 1023-1:1997

Office furniture screens,
mechanical safety requirements.

BS EN 1023-2:2000

Office furniture screens,
mechanical safety requirements.

BS EN 1023-3:2000

Office furniture screens,
mechanical safety requirements.

SEATING ACCREDITATIONS

BS EN 1022:2015

Seating, determination of stability.

BS EN 1335-1 + BS EN 1335-2 + BS EN 1335-3

Office work chairs safety test methods.

BS EN 1728:2012 + AC:2013

Seat and Back Static Load Test and Durability.

Front and Back Fatigue Test and Impact Test.

BS EN 5459-2: 2000+A2:2008

Office seating for use by person weighing up to 150kg and for use up-to 24 hours a day.

BS EN 13761:2002

Visitor Chairs - Dimensions and Safety Requirements.

BS EN 15373:2007 level 2

Seating strength, durability and safety.

Requirements for non-domestic seating.

BS EN 16139:2015

4 Legged and cantilever seating, strength, durability and safety requirements.

EN 1728:2000 and 2015

Domestic furniture. Seating. Test methods for the determination of strength and durability

BS EN 10025:1993

Specification for hot rolled products of non-alloy structural steels and their technical delivery conditions.

Applicable to all chrome plated parts.

ANSI/BIFMA X5.1-2002

International testing certificate for office chairs.

Sections:08,11,13,14,16 and 18.

ANSI/BIFMA X5.1-2011

International testing certificate for office chairs.

Sections:05,11.3,13,14 and 15.

TUV Eco-Circle 2008

Tested for recyclable content, harmful substances, energy saving and ergonomic design.

NEOCON

Silver Award Winner 2013 Chicago, USA.

RECYCLING POLICY

At Elite, we understand the seriousness of the effects waste has on our environment with landfills becoming a substantial problem, but we are committed to refining our recycling efforts.

Inappropriate disposal of goods wastes resources, wasting the raw materials and energy used in making the items. Reducing waste by recycling results in less environmental impact, less wasted resources and energy and saves money.

Landfills contaminate and pollute the local environment with the release of harmful greenhouse gases such as methane. The waste buried in landfill sites breaks down at a very slow rate and will remain a significant problem for future generations. Aside from the environmental costs of dumping waste in landfills, there is a rising financial cost too, which is increasing by around 10% a year. Although recycling furniture comes at a cost, it avoids the negative impacts associated with landfills.

Furniture is typically made up of woods, metals, plastics, fabrics and foams. All of these materials can be recycled with a bit of effort. Our furniture recycling service ensures that furniture is diverted from landfill, whether this is through materials recycling or ethical reuse routes. Any furniture which is suitable for reuse will be donated to charities, schools and social enterprises. We have access to 120,000 square foot of storage space specifically for the task of recycling as a growing method of disposal.

By recycling redundant office furniture, we are preventing it from becoming an environmental problem. Our duty to care for our environment is increasing and as a company we will continue our efforts in responsibly managing waste.

Old and Used Furniture from Premises

Repaired and Recycled/Donated

Introduced Back into the Economy

ENVIRONMENTAL POLICY

Elite are committed to considering environmental factors during all production activities and future plans

This includes the consideration of:

- Global Warming
- Acid Rain
- Deforestation
- Loss of biodiversity
- Solvent Reduction
- Minimising Pollution
- Waste minimisation
- Energy Efficiency
- Green Purchasing
- Recycling Schemes
- Fleet transmission emissions
- Material consumption
- Zero land contamination
- Wastewater drainage
- ensuring zero land contamination
- drainage protection

It is our policy to:

- Comply with and aim to exceed the requirements of current environmental legislation and codes of practice.
- Minimise energy and water usage in our buildings and processes in order to conserve supplies, and minimise our consumption of natural resources, especially where they are non-renewable.
- Minimise our waste and reuse or recycle as much of it as possible.
- Purchase products and services that do the least damage to the environment and encourage others to do the same.
- Assess the environmental impact of any new processes or products we intend to introduce.
- Monitor and reduce the impact of air, water, noise and light pollution from our premises on the environment and local community.
- Ensure all employees understand our environmental policy and conform to the high standards it requires.
- Address complaints about any breach of our Environmental Policy promptly and to the satisfaction of all concerned.
- Review our Environmental Policy annually, in consultation with employees and customers.

THE DESIGN DEPARTMENT

At the heart of Elite, lies our design and marketing department, that over twenty years has grown from one to seven members. The workplace is continuously evolving, with new concepts and studies shaping the way we design the environment. Our most effective way of maintaining focus on current workplace trends is through attendance at trade shows and exhibitions where we have the opportunity to meet designers and industry influencers who are selected as key-speakers, often covering pressing industry topics.

The design team delivers a breadth of varied services from 2D spacial planning to realistic 3D computer generated visuals. Whether space permits large volumes of staffing or space is an issue, the team will offer successful and practical solutions that take advantage of the available space.

Each project is carefully analysed to achieve the very best layout and conformability to your requirements, complying to current health and safety laws and guidelines. 3D design is now a well-established practice in office design and provides the best method of illustrating office layout designs. We are working to industry standard BIM level 2, that involves developing building information in a collaborative 3D environment with data attached.

For your convenience, all available CAD and Revit Blocks, Product Thumbnails and Assembly Instructions are available at www.elite-furniture.co.uk.

THE DESIGNERS

Ralf Umland
i-sit

Ralf Umland was born in Troidorf (Cologne) in 1959. In 1987, he qualified in Industrial Design and went on to work as head of product development, design and marketing at Selecta Werkbank. After five years he gained further experience at König + Neurath project managing Product Development and Design.

In 1996 Ralf joined Viasit office seating and became their Product Development and Design Manager. Having enjoyed some fabulous success designing exclusively for Viasit he founded his own design company in 2004 and created 'Ralf Umland Design'.

From the beginning Ralf and his team concentrated on refining a product development process that would connect ergonomics, function, production, quality, target audience, product environment and price. Using their vast collective experience they identified a 'basic modular principal' which formed the heart of the design for the i-sit task chair. This principal avoids the need for multiple components and allows the entire range to follow a clear design line. Ralf and his team were awarded a Silver Award at NeoCon in Chicago for the chair design.

Massimo Costaglia & Giulio Mazzanti
Tempo

Massimo Costaglia was born in the 1970's and is local to the Padova region. He was awarded a Diploma at the Industrial Technical Institute and worked with esteemed Italian furniture companies for several years before creating the Design Studio which now bears his name in 2001.

Giulio Mazzanti was born in 1988 in Ancona where he began his career in technical design. After obtaining a high school diploma at the F. Mengaroni Art School, he continued his studies at the Institute of Architecture Venice (IUAV), graduating in 2013. He joined the Massimo Costaglia Design Studio in 2014 as an intern, soon becoming an integral part of the studio's design team.

Alberto Basaglia & Natalia Rota Nodari
Vice Versa

Alberto Basaglia was born in Varese in 1969 and Natalia Rota Nodari was born in Bergamo in 1970. They met while studying Architecture at Milans Polytechnic, where they both graduated with a first-class degree in 1995. In 1997, they set up a practice of associated architects. Their first design experience was in 1999, when they created the YDF brand and collection, winning first place at the Young and Design event.

Very quickly their professional activities expanded to encompass all aspects of design, from town-planning to product design, residential and industrial architecture, restoration, environmental planning, interior design, and graphics. They are also actively engaged in furniture design and have produced work for Lema, Rexite, BPA, Luxit, I TRE, Pedrali, Outlook, Diemmembi, Treca Interior, Casa Blitz and Progetti.

Both share a single minded aspiration to simplify, optimise and at the same time personalise what they create. The Vice Versa seating range represents this approach, with its clean contemporary lines and its unique screwless construction and assembly, a credit to their concept.

Jeremiah Ferrarese & Paolo Scagnellato
Salto

Both born in Padua, Italy, they graduated in Architecture in Venice and joined partnership in 2005 with their activities ranging from Architecture to Design.

Their designs have received several awards and international recognition including Good Design Award 2013 and Interior Innovation Award 2014.

The two predominantly work in the office, lecture and conference seating sectors, fields that requires a good understanding and approach to ensure not only aesthetics, but also industrial feasibility, safety compliance and limiting costs are well aligned.

Paolo Lucidi & Luca Pevere
Zen

Paolo Lucidi and Luca Pevere graduated at the Politecnico di Milano in Industrial Design. They collaborated in design studios based in Milan, working directly on projects for companies including American Standard Europe, Salvatore Ferragamo, Mitsubishi, Hitachi, Zerodisegno, Magis and Dainese.

In 2002, they signed their first commissions together and in 2006 they established the LucidiPevere Design Studio in Milan. LucidiPevere Design Studio is now established in Udine and still undertakes industrial design work for internationally renowned companies, belonging to a large number of different sectors.

Their products have been exhibited in both in European and U.S. Museums and have participated in several Italian and International events, with recognition for their work been featured in many printed publications.

They strive to expand their experience by working with different companies, countries and cultures, continually looking for a memorable expression of the material and technologies they are working on.

Fabio di Bartolomei
Rio

Fabio was born in Udine, Italy, the town in which he still lives. In 1979, he founded the Di Bartolomei-Design Practise, which focused on Architecture and Interior Design, designing both public and private sector buildings and interiors. This was followed by Industrial Design projects in collaboration with some of the most important Italian companies in the furniture and lighting sector, including FIAM Italia, Tonon, Bieffeplast, Montana, Calligaris and Skipper.

Some of his works have been selected and exhibited in museums like 'The Museum of Modern Art' and 'The Corning Museum of Glass' in New York. In 1991 he designed the 'Tokoyo' table for Calligaris that was selected for the Young and Design 1991 award in Milan. In 1996, he was awarded the 'Marcello D'Olivio' prize for design and in 1997, 1999 and in 2007 he won the TOP TEN award at the International Chair Exhibition in Udine.

Material research has always been the key focal point of his projects. The 'Rio' chair is a fine example of this with its appealing and decidedly original lines. Its winning feature is the comfort of the soft integral foamed polyurethane structure which is a testament to Di Bartolomei's knowledge of material properties.

Carsten Buhl
Sequester

Carsten Buhl graduated from the Royal Danish Academy of fine Arts in 1993. He established his own design office in 1996.

Buhl's career does not only include several years of running his own business as head of a design agency, but he has also spent many hours running long distances including more than 40 marathons and two 100km Ultramarathons, seeking inspiration for his works from the countries he visits for these events.

Carsten Buhl embraces a design philosophy of reinventing early modern and post-modern designs with today's new materials and technologies. His respect for the end user of his products are the motivations behind his innovative options in relation to form, function, minimalism and elegance.

His work is refreshing, combining free-form sculptural shapes with the traditional attributes of Scandinavian design, material and structural integrity.

CHAIR IN A BOX DELIVERY SERVICE

Elite offer two 'boxed' seating delivery options.

For compatibility, please refer to the bottom of each product page in the price guide, if an image of a chair box is displayed (as seen below) then it is an option to request this service.

Option 1: Elite Delivery

Chairs boxed at the factory and delivered using the standard Elite transport method to your nominated address. Delivery based on weekday multi drop vehicles / untimed delivery.

There is a surcharge per chair for this option.

When ordering please suffix the chair code with **/BOX1**

Option 2: Courier Delivery

Chairs boxed and shipped using a courier service to your requested UK mainland address. In these instances where speed and convenience is of the essence, chairs can be dispatched within 24 hours post manufacture.

No guarantee can be made regarding the exact time of delivery.

9am - 5pm is standard.

Chairs delivered by courier are dispatched in a box 1000mm high (maximum). Please expect some models to be delivered in KD format in order to comply with the couriers tolerance height for shipping. In these instances it may be the case that minimal assembly is required on arrival.

There is a surcharge per chair for this option.

Delivery time is 24-48 hours upon collection by the courier.

When ordering please suffix the chair code with **/BOX2**

ERGONOMICS

Ergonomics is an applied science that aims to understand people physically and psychologically, in order to design and arrange products, environments and processes for human interaction in the most safe and efficient ways.

Sitting with the correct posture is crucial for maintaining good health, allowing bones and joints to align, decreasing the abnormal wearing of joints that could cause joint pain or even degenerative arthritis. It also reduces stress on the ligaments holding spinal joints together, minimizing the likelihood of injury. There are increasing reports of musculoskeletal disorders caused by poor workstation set ups, poor posture, repetitive movements, intensive work and infrequent breaks.

A good posture allows muscles to work more efficiently, allowing the body to use less energy and therefore, preventing muscle fatigue. It helps prevent muscle strain, overuse disorders and even back and muscular pain. Taking care of your posture will maximise comfort, safety and performance, allowing you to focus on what's important.

Chairs that have given consideration for ergonomics have a multitude of advantages. As well as correctly supporting the users posture, they provide supreme comfort with headrests, preventing neck problems and the inclusion of a cushioned seat pad as opposed to a hard seat reduces the pressure on the hips.

The diagram below illustrates the recommended natural posture, demonstrating less stress on the body, reducing the chances of harm and injury to the individual. The ergonomic chair ensures appropriate alignment of the body including the eyes, head, neck, shoulders, arms, back, knees and feet all in relation to the desk and computer screen.

Posture guidelines

- 1 Maintain a distance between eyes and screen of 500mm to 700mm.
- 2 Keep your shoulders relaxed and not raised.
- 3 Keep your forearms horizontal and elbows bent at an angle slightly in excess of 90°.
- 4 Maintain a distance between knees and desk of 80 to 100mm.
- 5 Avoid pressure to the area behind the knees.
- 6 Keep your legs bent at an angle of between 90° to 120°.
- 7 Keep your feet resting on the floor.
- 8 Let the backrest support your back.
- 9 Sit firmly against the back with a small gap between the front of the seat pad and the back of your knees.

PRODUCT CHANGES

Changes to Fixed Desk, Storage and Table Heights

This will be effective for orders placed from 3rd June 2019 onwards.

FIRA announced a new version of BS EN 527-1: 2011, concerning the European standards specified dimensions for office desks and tables. The new standard required larger legroom and greater ranges of adjustability. Changes in fixed desk heights have increased and should be 740mm +/- 20mm. This is an increase on the previous standard by +20mm.

There will be no changes to our standard product codes, you will automatically be supplied with 740mm high desks; several table ranges; desk height storage units and desk high pedestals.

If you require top up orders from 3rd June 2019 onwards at the previous height, you will need to suffix the product code with **/725**. For example, a Reflex meeting table will be **RMT16/12/725**. Top up orders for the outgoing specification will be subject to a 4 week lead time.

The heights of the Fliptop Tables, Piazza and Tondo will temporarily remain at 725mm high from 3rd June 2019. Later in 2019 they will be revised to the new 740mm height when new stock is manufactured.

Fixed desk, storage and table height changes

Charging Unit Type Change

This will be effective for orders placed from 1st March 2019 onwards.

All previous charging units were 2x standard USB type A but this is changing to have both USB types A and C.

The difference between USB A and USB C

New Metalwork Finishes

These will be available for orders placed from 1st March 2019 onwards.

We have introduced 6 new metalwork options: Blue RAL 5001, Coral RAL 2001, Green RAL 6016, Light Grey RAL 7038, Teal RAL 5018 and Yellow RAL 1021.

These finishes are subject to a 12% surcharge on modular tables. The surcharge for seating is dependent on the range, please see the individual product pages for these prices.

The 6 new metalwork finishes

Summary

Further clarification of these changes can be obtained through our Customer Service Team or by speaking directly with your Dealer Business Manager.

We aim to give our customers advanced notification of any changes to provide sufficient time to bring in stock for orders already committed to.

DUAL BOARD Superior Melamine Board (MFC)

Elite are an exclusive user of the superior quality melamine board called 'Dual Board'.

The board consists of a chipboard core surfaced on both sides by a sheet of MDF. The newly developed 'Dual Board' material offers significant advantages including structural, machining and component strength.

The material offers Elite's client increased quality and added value. It offers greater impact resistance combining the durability of MDF and Chipboard into a single board.

The MDF faces of 'Dual Board' eliminates any irregularities associated with raw chipboard and translates this into a smooth, even surface. For our highly complex production operation this level of board performance is essential and translates directly into the high standards of quality offered to Elite clients.

Dual Board Key Benefits

Perfect cutting during manufacture.

Thanks to its high physical-mechanical performance, Dual Board provides an excellent response in the most demanding load situations.

High resistance to impact. This prevents marks, deformities or surface damage.

The properties of the exterior high-density fibre layer reduce surface absorption.

BS EN 13722:2004
Gloss/reflective level testing on furniture surfaces.

Material Breakdown

Our MFC is a two layered laminate material

We are a proud
PEFC member

Programme for the Endorsement of Forest Certification

PEFC is the world's largest forest certification organisation

PEFC is the world's leading forest certification system and an internationally recognised brand devoted to ensuring that forests are managed according to environmental, social and economic criteria.

PEFC are an international non-profit, non-governmental organisation dedicated to promoting Sustainable Forest Management through independent third-party certification.

PEFC works by endorsing national forest certification systems developed collaboratively by all interested stakeholders and has recognised certification systems in 36 countries.

FINISHES Elite Finishes

Standard Dual Board MFC Finishes

The 10 finishes below are our standard MFC finishes, which can be specified on Dual Board MFC products.

Ash

Autumn Cherry

Beech

Chester Oak

English Walnut

Grey

Grey Nebraska Oak

Laurentii Wenge

Natural Nebraska Oak

White

Nanotech Surface Finish

Available on 25mm board only.

Undercut edging detail option available on Black Matt Nanotech MDF only subject to a two week lead time.

Black Matt Nanotech MDF
Contact Customer Services
for Compatibility and Prices.

Black Matt Nanotech NFC
Contact Customer Services
for Compatibility and Prices.

Edging for White Dual Board MFC Finish

The 3 finishes below are edging options for 25mm white Dual Board MFC only.

Surcharge to retail price per top for Black or Laurentii Wenge edging.

Surcharge to retail price per top for Plywood edging.

White with Black

White with Laurentii Wenge

White with Plywood Effect

Veneer Finishes

Elite cannot guarantee continuity in the appearance of veneer panels. Elite process pre-veneered boards that cannot be book or colour matched.

Oak

Walnut

Please Note: Whilst every effort has been made to ensure accurate colours are illustrated in this document, there may be a slight colour difference due to the printing process, therefore please refer to our colour sample swatches prior to ordering.

FINISHES Elite Finishes

Standard Metalwork Finishes

The 4 finishes below are our standard metalwork finishes.

Silver RAL 9006

Black RAL 9005

Black Graphite RAL 9004

White RAL 9003

Leather - Please note leather is a natural product and will crease and puddle with use. In addition all leathers are subject to natural markings and variations in shade. These natural markings distinguish real leather from man made imitations and as such these variations should be considered to be features, not faults.

MIX Mesh Task & Meeting Chairs

Product Overview

The Mix task chair offers clean lines and simple aesthetics at the very heart of its design. A breathable, height adjustable mesh back and lumbar support delivers supreme comfort whilst the synchronised, self-weighting mechanism responds to the user's bodyweight and automatically adjusts the tension of the back tilt. All of this ensures optimal balance and posture for the user. With the choice of a white or black frame and a choice of 33 mesh finishes, it offers maximum personalisation. In summary, Mix is a superior, versatile and ergonomic task chair at an affordable price.

MIX Mesh Task & Meeting Chairs

Task & Draughtsman Chairs: • Height adjustable mesh back and lumbar support • Weight responsive self-adjusting synchronised mechanism • Anti-shock locking system (5 positions) • Sliding seat depth adjustment • Seat height adjustment • **690mm black nylon five-star base as standard** • CMHR moulded foam seat • 60mm twin hard wheeled black castors on the task chair • Chrome footring and black nylon glides on the draughtsman chair

Cantilever Meeting Chairs: • Height adjustable mesh back and lumbar support • **25mm black tubular cantilever frame as standard** • CMHR moulded foam seat • Protective glides

Certifications: • EN 1335-1:2000 AC:2002 • EN 1335-2:2009, clause 4.1 • EN 1335-3:2009 AC:2009

Mix Mesh Colours Available on a 6 Week Lead Time

The finishes below are for Mix Task, Draughtsman and Meeting chairs with a minimum order of 25 chairs, and are available on a 6 week lead time.

When ordering an alternative mesh colour option, remove /BM or /WM and replace with selected mesh reference code (e.g. MIX/5336/2D).

Please Note: Whilst every effort has been made to ensure accurate colours are illustrated in this document, there may be a slight colour difference due to the printing process, therefore please refer to our colour sample swatches prior to ordering.

MATCH Task & Meeting Chairs

Product Overview

Match provides a refined task chair at an affordable price. Designed with functionality in mind, Match uses an intuitive self-weighting mechanism to control the seat inclination to maintain a balanced posture for the user. This mechanism reacts to the user's bodyweight and automatically adjusts the tension of the back tilt. Working in perfect harmony with this breakthrough technology is a fully upholstered, height adjustable back with optional headrest that provides the user with excellent comfort and support. The Match family comprises of upholstered task, draughtsman and cantilever meeting chairs, providing a comprehensive range.

MATCH Task & Meeting Chairs

Task & Draughtsman Chairs: • Height adjustable back • Weight responsive self-adjusting synchronised mechanism • Anti-shock locking system (5 positions) • Sliding seat depth adjustment • Seat height adjustment • **690mm black nylon five-star base as standard** • CMHR moulded foam seat and back • 60mm twin hard wheeled black castors on the task chair • Chrome footring and black nylon glides on the draughtsman chair

Cantilever Meeting Chairs: • Height adjustable back • **25mm black tubular cantilever frame as standard** • CMHR moulded foam • Protective glides

TEMPO

Product Overview

Designed with the intention of being different, Tempo combines sophistication and comfort to deliver an elegant chair with a refined profile. The sculpted body is teamed with a mesh back and tilt mechanism for the highest levels of comfort. The integrated PU structure which is cleverly incorporated into the lead edge of the waterfall seat and the subtly integrated mechanism incorporated in the underbody of the chair, offers users complete comfort and the adjustability necessary to achieve the correct posture when seated.

TEMPO

Mesh Back Chair: • Designed by Massimo Costaglia and Giulio Mazzanti • Tensile seat mesh • Integrated mechanism • 9° backrest tilt lockable in the upright working position • Height adjustment • Fixed supporting armrests • Black nylon or polished aluminium five-star base • Chrome footring and black nylon glides on the draughtsman chair

Certifications: • BS EN 1335-2:2009 • ANSI/BIFMA X5. 1-2011

LORETO Mesh Task & Meeting Chairs

Product Overview

Loreto bears a contoured and framed mesh back, cleverly combined to offer a chair that has become the definition of operability, functionality and reliability. Loreto's understated design disguises the flexibility of the chair. Whilst the mesh backrest provides superb support over a large surface area, the height settable lumbar pad offers the user adjustability to achieve a satisfactory posture and comfort. The Loreto range is a proven performer capable of satisfying the most demanding of briefs and budgets.

LORETO Mesh Task & Meeting Chairs

Task & Draughtsman Chairs: • Mesh back • Height settable lumbar support • Synchronised mechanism • Body weight tension adjustment • Anti-shock locking system (3 positions) • CMHR moulded foam seat • 50mm sliding seat depth adjustment • Seat height adjustment • **690mm black nylon five-star base as standard** • 60mm twin hard wheeled black castors on the task chair • Chrome footring and black nylon glides on the draughtsman chair

AIRFLEX Task Chair

Product Overview

Airflex's appearance is fresh and distinctive. The chair has been ergonomically designed and contoured to move with the user and allow the user's posture to remain balanced and relaxed as they move. It's generously sized, polymer back rest is designed to allow freedom of movement whilst providing excellent support. Furthermore, the intelligent 3D suspension back uses geometric perforations to aid flexibility and allow ventilation. Airflex embraces new technology and modern engineering through its synchronised, self-weighting mechanism and sliding seat, housed within the seat plate. A high quality, beautifully designed, comfortable chair, perfect for the modern office environment.

AIRFLEX Task Chair

Special Offer, Heavily Discounted, End of Range

Task & Draughtsman Chairs: • Flexible high-performance polymer back • Ergonomically designed and contoured • Perforations aid flexibility and ventilation • Weight responsive self-adjusting synchronised mechanism • Anti-shock back incline lock (3 positions) • 50mm sliding seat depth adjustment • Seat height adjustment • CMHR moulded foam seat • **Black nylon base as standard** • Flat ergonomic base with textured footrests with 60mm twin hard wheeled black castors on the task chair • Draughtsman chair finished with chrome footring and black nylon glides

TEAM PLUS MESH Operator & Meeting Chairs

Product Overview

Designed for simplicity and ease of use, Team Plus Mesh represents a modern offering on a traditional operator chair. The naturally flexible and breathable mesh back can be adjusted to the perfect height and the simple, yet robust two-lever mechanism features a clever anti-kick locking system ensuring stability throughout its range of movements. Distinctive styling, pure functionality and competitive pricing make this a sensible choice for any office or workplace environment.

TEAM PLUS MESH Operator & Meeting Chairs

Operator & Draughtsman Chairs: • Height adjustable mesh back • PCB mechanism • Anti-shock locking system • Seat height adjustment • CMHR moulded foam seat • **690mm black nylon five-star base as standard** • 60mm twin hard wheeled black castors on the task chair • Chrome footring and black nylon glides on the draughtsman chair

Cantilever Meeting Chairs: • Mesh back • **Black tubular cantilever frame as standard** • CMHR moulded foam seat • Protective glides

TEAM PLUS Operator & Meeting Chairs

Product Overview

Team Plus is a classic product, with a distinct focus on operability. Its understated style disguises the fundamental strength and flexibility of the chair. The contoured seat and cushioned backrest are upholstered with flexible polyurethane foam, for day long comfort. Its robust, two-lever mechanism features a clever anti-kick locking system ensuring comfort throughout its range of movements. Team Plus is available with a variety of options including a pump up lumbar support, sliding seat, polished base and a variety of armrest options. A versatile seating range which can be tailored to meet your exact requirements.

CASTOR OPTIONS

Product Overview

There are different types of castors, each designed for a specific purpose and performance. To get the best performance from your chair it is important to match the correct type of castor to the flooring in your office. The chair's movement depends on how much traction there is between the castors and the floor. The wrong type of castors can make it harder to move the chair around leading to greater stress on the back and leg muscles. Conversely the wrong castor may move too easily allowing the chair to roll away when the user stands up. This is a safety hazard if the user doesn't realise the chair has moved away when they attempt to sit down. In addition to the ergonomic and safety risks, the wrong type of castor can also damage the flooring. For this reason there are a number of different types of castor available to suit all requirements.

CASTOR OPTIONS

Hard Wheeled Castors

Fitted as Standard

Code: HWC

Supplied as standard, this type of castor is often referred to as a carpet castor as it is perfect for use on carpeted surfaces. The hard outside of the wheels move smoothly over most types of carpet and as the vast majority of office chairs are used on carpeted surfaces, this has become the most popular option. Please note, using these castors on other surfaces can be unpredictable. They have a tendency to slide rather than roll on hard surfaces such as wood and tiled flooring making them prone to scratching the surface. In addition, this creates very little friction making it difficult to control which can be dangerous for the user.

Soft Wheeled Castors

Code: SWC

Soft wheeled castors have a thin layer of softer material over the hard core. This material may be vinyl, soft rubber or polyurethane. Soft castors are recommended for hard floors (wood, vinyl, concrete and tiles). The composition of the outer wheel provides more friction with hard floors giving the right resistance, ensuring greater control to the user. In addition, they are less likely to scratch the floor.

Brake Loaded Castors

Code: BLC

These types of castors are designed for use on hard, vinyl, epoxy, wooden or concrete floors to reduce slipping. Brake loaded castors only brake when the user is sitting on the chair. This gives the user greater control of the chair allowing no movement whilst seated.

Brake Unloaded Castors

Code: BUC

This type of castor is also designed for use on hard, vinyl, epoxy, wooden or concrete floors to reduce slipping. Brake unloaded castors only brake when no one is sitting in the chair, making them ideal when the chair is required to be mobile when the user is seated, but remain in a stationary position when not being used. This type of castor can also help to prevent accidents caused by undesired movement of the chair on hard surfaces whilst trying to sit down in the chair.

MODA Multi-Purpose Seating

Product Overview

Moda has established itself as a core product within our seating portfolio. Available in four configurations, the range has been designed to complement our task chair offering, where compatibility between work areas is required. Appearance and flexibility are the design foundations of Moda with its clean, modern lines, superb detailing and robust construction all finished in a sleek chrome frame. The contoured back and seat support the body, providing excellent comfort for prolonged periods of sitting. Moda is an excellent choice of meeting and visitor chair.

MODA Multi-Purpose Seating

VICE VERSA Multi-Purpose Seating

Product Overview

Vice Versa is an innovative product with distinctive lines, designed by Alberto Basaglia and Natalia Rota Nodari. It is assembled without screws and features a patented interlocking system that keeps costs to a minimum and facilitates disposal at the end of life. Vice Versa is a multipurpose chair with a design that combines functionality, style and strength. The seat and backrest are injection moulded using fireproof polypropylene and are available in six colours, whilst the frame is made from steel wire and can be either chrome plated or epoxy coated in a silver, black, black graphite, white or our new colour finishes. When combined together, the possibilities for personalisation and customisation are comprehensive. This is a chair suitable for a variety of tasks and environments.

VICE VERSA Multi-Purpose Seating

NORDEN Breakout Chairs

Product Overview

Norden subtly combines a slender, modern design with classical undertones. The ergonomically shaped polyurethane foam seat shell is fully upholstered to create a supremely comfortable chair. The chair is mounted on either a black polypropylene four-legged frame or a solid wood four-legged frame available in ash, walnut, espresso, wenge, black or white, adding a truly organic feel to complement any reception, waiting or working area.

MULTIPLY WOOD Breakout Chairs

Product Overview

Multiply Wood is a versatile chair offering a fresh appearance. The chair features solid wooden, angular legs giving it a distinctive, cutting edge style available in a beech, walnut, espresso, wenge, black and white finish. The style brings with it a fresh feel that looks striking in a range of settings. The seat shell is available in various finishes with choice of an open or a closed back. Upholstery can be integrated into the finished design by selecting an upholstered seat pad or fully upholstered option that can be finished in a choice of fabrics. The versatility of Multiply Wood means it will fit seamlessly into a modern interior as well as offering a stunning contrast within a traditional setting.

MULTIPLY WOOD Breakout Chairs3 Week Lead Time

MULTIPLY Breakout Chairs

Product Overview

Multiply offers a modern design which is simple and compact, yet functional. The chairs can neatly stack together for easy storage or transportation making it perfect for transient spaces. Its robust, tubular steel frame can be finished in silver, black, black graphite, white or our new colour options and its wooden shell has the choice of an open or closed back. For further comfort the finished design can include an upholstered seat pad or fully upholstered shell in a choice of fabrics. Further personalisation includes the addition of support arms across the range. In summary, Multiply possesses simplicity and versatility, making it adaptable to a multitude of spaces and needs.

MULTIPLY Breakout Chairs

Breakout Chairs: • Moulded plywood shell • **18mm tubular chrome four-legged frame as standard** • Optional shell finishes • Available with or without integral arms • Polypropylene arm pads • Available with or without an open back design • Available with or without a seat pad • CMHR foam • Available as a fully upholstered chair (3 week lead time) • Stackable up to 5 chairs high (non-stacking when upholstered)

BEN Breakout Chairs

Product Overview

A harmonious combination of both traditional and modern, Ben blends comfort with style. A robust aluminium seat plate supports rounded wooden legs that are available in a beech, walnut, espresso, wenge, black or white finish. Above this sits an extremely durable, ergonomically moulded, polypropylene shell that is available in ten vibrant colours or upholstered in your choice of fabric. These options allow Ben to be personalised to fit many modern office and leisure environments including meeting rooms, breakout areas, bars/restaurants, waiting rooms and conference facilities.

Breakout Chairs: • 100% polypropylene shell • **Solid round beech wooden legs** • 10 shell colour options • Robust aluminium seat plate • Available as a fully upholstered chair • Fire retardant CMHR foam • Protective felt glides

FOCUS Breakout Chairs

Product Overview

Focus is a traditional breakout chair that embraces comfort and performance. The high quality 20mm tubular four-legged frame is finished in chrome and provides a functional and robust platform for this affordable seating range. Partnered with the injection moulded seat and back, available in a choice of four vivid colours, this chair delivers a functional solution for a diverse range of applications. Like many of our breakout chairs, Focus has a ten-unit stacking ability, making it a chair that supports space saving requirements.

FOCUS Breakout Chairs

Breakout Chairs: • Injection moulded polypropylene seat and back • 4 standard colour options • 20mm chrome tubular four-legged frame • High quality robust construction • Stackable up to 10 chairs high • Protective feet

ESCAPE Bar & Breakout Stools

Product Overview

The Escape stool offers a high level of comfort and support, without compromising on style or functionality. It is built around a sturdy steel frame with an integral footrest. The seat shell is constructed of plywood, covered with a soft, cushioned fire-retardant foam before being upholstered in a choice of fabrics. The Escape stool range is available in silver, black, black graphite, white or a range of colourful epoxy coated frame colours, as well as the standard chrome finish. A stylish, comfortable and extremely practical solution for many workplace and leisure environments.

Bar & Breakout Stools: • Stylish, modern design • Fully upholstered • Moulded plywood shell • CMHR foam • 12mm wire frame sled base • Integrated footrest

• **Chrome frame as standard** • Protective feet

BILL Bar & Breakout Stools

Product Overview

Like the breakout chair variant, the Bill stool offers superior comfort with the ergonomically moulded polypropylene shell without detracting from the minimal form of the design. The stool versatility is compounded by the choice of a ash, walnut, espresso, wenge, black or white wooden base and finished with the choice of ten exciting plastic shell colours or upholstered in your choice of fabric. Together these options offer a solution to numerous interiors and design requirements, in a number of environments.

Bar & Breakout Stools: • 100% polypropylene shell • **Solid ash four-legged frame** • Integrated footrest • High quality robust construction • 10 shell colour options

• Available as a fully upholstered chair • Fire retardant CMHR foam • Protective felt glides

BOB Bar & Breakout Stools

Product Overview

The design of Bob delivers an ultra-stylish and iconic frame that has proved itself as an industry favourite for some time. A tall, wooden leg frame with black steel interlocking detail supports the same ergonomically moulded polypropylene shell as our Bill and Ben ranges, providing superior comfort without detracting from the minimal form of the design.

Bar & Breakout Stools: • 100% polypropylene shell • 10 shell colour options • Available as a fully upholstered chair • Fire retardant CMHR foam

VICE VERSA Bar & Breakout Stools

Product Overview

Like its breakout chair variant, the Vice Versa stool is an innovative product with distinctive lines, designed by Alberto Basaglia and Natalia Rota Nodari. It is assembled without screws and features a patented interlocking system that keeps costs to a minimum and facilitates disposal at the end of life. Vice Versa is a multipurpose stool with a design that combines function, style and strength. The seat and backrest are injection moulded using fireproof polypropylene and are available in six colours, whilst the frame is made from steel wire and can be either chrome plated or epoxy coated in a silver, black, black graphite, white or our new colour finishes. When combined together, the possibilities for customisation are exceptional, delivering a stool suitable for a variety of tasks and environments.

CASCARA Visitor & Lounge Chairs

Product Overview

Cascara is a classical and beautifully crafted lounge chair that radiates style, standing out from the crowd at first glance. Its smooth lines and generous proportions deliver outstanding comfort. The Cascara family consists of a high back and medium back chair with a choice of white lacquered outer shell, walnut veneered outer shell or a fully upholstered variant. All of these seat shells have the option of pairing with a stylish chromed four-star swivel base or a four-legged wooden frame. In addition, the Cascara family includes a bespoke Footstool mirroring the subtle lines and finish options. Cascara's distinctive profile is ideally suited to executive lounges, hotels, breakout areas, boardrooms and whole host of other applications.

Meeting & Conference Chairs: • High or medium back • White lacquered or walnut veneered outer shell option • Fully upholstered outer shell option • Moulded plywood shell • CMHR foam • Chromed four-star swivel base with protective feet • Wooden four-legged frame with protective felt pads

SEQUESTER Seating Pod

Product Overview

Designer Carsten Buhl has masterfully created a standalone acoustic pod capable of revolutionising any workspace. Sequester's unique curves and lines grace both the inside and outside of the pod and offer a working space where you can work undisturbed and free from surrounding noise. Incorporated within Sequester's futuristic interior are a number of user-friendly devices that are all touch button operated from the integral control panel. These include dimmable LED downlights, 2 x 5watt stereo speakers, wireless Bluetooth connectivity and USB charging. A uniquely designed privacy panel and bespoke footrest nestle perfectly with the pod and complete the distinct identity of the range. Sequester is a successful fusion of forward thinking technology and craftsmanship.

SEQUESTER Seating Pod

6 Week Lead Time

Seating Pod: • Designed by Carsten Buhl • Built-in Bluetooth® stereo sound system • Wireless music streaming from any mobile or laptop device • Integrated touch button control panel (volume, lighting, track selection) • Dimmable LED lighting • USB charging socket • Mains powered with 12V battery backup • Fire retardant CMHR foam • Fully assembled, Sequester requires 920mm clear door width • On-site assembly is available where fully assembled access is not possible

Privacy Panel: • Designed by Carsten Buhl • Fully upholstered • Sturdy round polished steel base • Robust wooden structure covered with plastic • Excellent soundproofing properties • Suitable for grouping multiple units of Sequester together

Footstool: • Designed by Carsten Buhl • Contoured design to nestle perfectly with Sequester pod • Fully upholstered • Fire retardant CMHR foam • Protective feet • Robust wooden structure

Fabric Compatibility: For compatible fabrics, see pages 21-23 for details.

RETREAT Seating Booths

Product Overview

The modern working environment is changing and so is the furniture. The Retreat range recognises the need for more relaxed, personal spaces for when employees work independently and collaborative areas for teams within the workplace. The range includes a single booth and double booth with advanced acoustic qualities, providing a quieter place for working. Booths can be used as standalone units or connected together with a media wall and table to create one-to-one and group meeting spaces within the office. The exterior is fully upholstered to your personal specification and offers options for integrated technology such as LED lighting, power modules, USB charging, smart TV's and presentation displays, allowing users to access the technology they need for maximum productivity. Retreat provides an innovative furniture solution that is aesthetically pleasing, adaptable and functional.

HANGOUT Seating Booths

Product Overview

The concept of Hangout was developed to reflect the way in which technology and workplace habits are changing, particularly in terms of the dynamics of office areas and how they are modernising and merging into less defined, fluid areas. Within the range, a single booth offers users a calm space to work or study, have private conversations or simply relax. The double booth provides a space for both quiet contemplation and group collaboration within existing open workspaces. The design's high back panels provide a respected level of visual and acoustic privacy that provides a comfortable, calm zone. An optional media wall and table complement the range and allow two Hangout double booths to be connected together to form a uniting space for brainstorming, short meetings or discussions that require concentration. All Hangout booths are able to integrate technology with options including power modules, USB charging ports, LED lighting and mounted smart TVs. Its striking shape makes Hangout a visual highlight in every office.

EVO PLUS HIGH BACK Modular Sofas

Product Overview

The Evo Plus High Back combines style and comfort with the modern movement for privacy within open-plan offices. Its modular form allows designers to easily create informal, relaxed and aesthetically pleasing working or social areas. The high back of the sofa provides excellent privacy, a sanctuary within the busy workplace to concentrate, converse or relax. A range of twenty-seven different modules is offered which can be used individually as standalone items or be linked together to create a unique statement piece. In addition, there is a privacy panel and table option that, when combined with two booths, effectively establishes an informal office meeting space that can accommodate up to six people. The Evo coffee table further completes the family. Evo Plus High Back is a truly versatile and adaptable range offering endless configuration and collaboration possibilities in the modern workplace.

EVO PLUS HIGH BACK PRIVACY PANEL Modular Sofas

Product Overview

The Evo Plus High Back Privacy Panel has been developed to enhance the versatility of the sofa range of the same name. Its primary purpose is to marry and connect two sofas together, thus, changing the function of the modules and the dynamics of the space. The privacy panel comes complete with a fixed table and a supporting leg that when used together allows a collaborative meeting space to be configured. Offered in a number of MFC wood finishes and with silver, black, black graphite, white, blue, coral, green, light grey, teal or yellow epoxy painted steel leg. The privacy panel is supplied with a cable port to allow for the seamless integration of modern technology.

EVO PLUS MEDIUM BACK Modular Sofas

Product Overview

Medium backed soft seating offers a compromise between open plan spaces and enclosed acoustic pods. Offering a space to communicate with colleagues, Evo Plus Medium Back provides a degree of visual and acoustic privacy and reduces distractions. The back height of this range is 300mm lower than the Evo High Back variant, that allows it to feel slightly less enclosed and more communal. Its minimalist modular form makes way for informal, yet aesthetically pleasing working or social spaces. As with the High Back, there are twenty-seven component pieces that can be individually combined, to create dynamic layouts suitable for many different work spaces. The Evo Plus coffee tables further complete the family. Fully upholstered to your specification and mounted on four chrome legs with protective feet, Evo Plus Medium Back is a contemporary, versatile choice.

EVO PLUS MEDIUM BACK PRIVACY PANEL Modular Sofas

Product Overview

The Evo Plus Medium Back Privacy Panel has been developed to enhance the versatility of the soft seating range. Its primary purpose is to connect two sofas together, changing the function of the modules and the dynamics of the space. The privacy panel comes complete with a freestanding unit and a fixed table with a supporting leg that, when used together, allows a collaborative meeting space to be configured. It is offered with a number of MFC wood finishes and with silver, black, black graphite, white, blue, coral, green, light grey, teal or yellow epoxy painted steel leg. The privacy panel is supplied with a cable port to allow for the seamless integration of modern technology.

Product Overview

Taking inspiration from popular Scandinavian designs, Kouch uses a graceful wooden frame to support a fully upholstered one or two-seater sofa. The frame is overlaid with interwoven webbing for flexible support and cushioned with comfortable high density, fire retardant foam. The solid wooden frame gives a natural and earthy character to the couch, making it suitable for both modern and traditional environments.

Soft Seating: • Solid wooden frame in beech as standard • Sprung seat • CMHR foam • Button detailing and piped seam as standard • One or two-seater available

NAPOLI Sofas

Product Overview

Napoli is a simple and understated sofa with a slightly urban finish to complement a modern interior. The sleek lines of the black leather upholstered sofa are softly hugged by a welded chrome frame and legs. Napoli is available as a one-seater armchair or a two-seater sofa and is competitively priced for the level of quality within the design. The deep cushioning of the seat, arms and back offers firm but comfortable support for different seating positions. Napoli is an ideal accompaniment to office waiting rooms, community spaces and lounge areas.

SEGMENT Modular Units

Product Overview

Segment makes a vibrant, playful statement in terms of contemporary, modular furniture. Its distinctive design allows the units to be specified to work around you and your needs. It works especially well in a fluid, multi-functional space with changing needs or compromised space. Several different shapes make up the family including squared, circular, triangular, eclipse and rectangular, that are able to blend in with an array of environments. Fully upholstered to your specification the Segment range is built on a hardwood frame, cushioned with fire-resistant foam and fitted with protective feet. Multiple applications apply with Segment and it can work particularly well in waiting areas, bars, breakout zones and educational facilities.

Modular Units: • Modular seating system • Multiple configuration options or stand-alone use • Fully upholstered • Hardwood frame • Fire retardant CMHR foam • Protective feet

REFLEX Boardroom & Meeting Tables

Product Overview

Superbly engineered and of robust design, Reflex takes the classic aesthetics of wood effect finishes and successfully fuses them with sleek, highly durable tapered metal legs. To ensure the highest level of stability Reflex is built around a specially engineered steel sub-frame to provide enhanced strength and rigidity. The result of this combination is to create a table that effortlessly combines style and practicality, suited to a whole range of office environments. A variety of different shaped tops, wood finishes and epoxy painted leg frame colours complete this dynamic and comprehensive range. The optional power modules are supplied with a horizontal three channel cable management system.

Boardroom & Meeting Tables: • Orders processed from the 3rd June 2019 will be supplied at 740mm high, see page 17 • Tapered angled legs with steel sub-frame • Adjustable levelling feet • When using integrated power modules, optional steel cable trays can be specified • Tables up to 2800mm are supplied as a one piece top • Tables larger than 3000mm are supplied in two sections with shared centre legs

Product Overview

Central to its design is the creation of an elegant, contemporary bench with tapered wooden legs and a cleverly engineered steel sub frame. Lux provides the perfect solution for a less corporate, modern office, dining, conference or breakout area. The range is available in a number of sizes, shapes and wood finishes providing a flexible product for many working spaces.

Meeting Tables: • **Tapered solid Ash angled legs with steel sub-frame** • Adjustable levelling feet • When using integrated power modules, optional steel cable trays can be specified • Tables up to 2800mm are supplied as a one piece top • Tables larger than 3000mm are supplied in two sections with shared centre legs • Radius corner options are available on rectangular and square meeting tables

KIT BENCH Meeting, Eating or Working

Product Overview

Kit Bench holds a powerful presence in any meeting, eating or working environment. Its robust design provides a strong structure for multiple uses and is available as a 740mm bench table or 1050mm high bench, in multiple widths to accommodate various users. For power and data connectivity, a cable port is positioned within each panel end to navigate wires from the floor to the inclusive cable tray on the underside of the desk top.

ALTO BENCH Meeting, Eating or Working

Product Overview

With the increase of employers seeking a more diverse, intelligent approach to desking and agile working, Alto High Bench was designed as an extension to the Harmony and Loco ranges, offering a similar frame, but able to accommodate a larger surface area for additional users. The rounded tops are available in a choice of MFC and veneer finishes and sit on a sturdy angular steel frame. An integral footrest adds strength and functionality.

ALTO BENCH Meeting, Eating or Working

HARMONY BENCH Meeting, Eating or Working

Product Overview

Today's modern collaborative office environments demand a more diverse, intelligent approach to desking and table solutions. Harmony High Bench successfully combines all the traditional merits of a standard height worksurface with the functionality and flexibility to offer a more informal area of working. A perfect solution for bistro, bar, meeting and breakout spaces. The rounded tops are available in a choice of finishes and sit on a sturdy angular steel frame, an integral footrest adds strength and functionality. 'Harmony Bench' is complemented by our portfolio of bar and breakout stools.

HARMONY BENCH Meeting, Eating or Working

Meeting Eating or Working: • 'A' frame legs • 1050mm high • Cross bracing frames for 2000mm wide benches • Tops supplied with radiused corners

LOCO BENCH Meeting, Eating or Working

Product Overview

Loco Bench combines a contemporary and balanced design with the flexibility to accommodate the ever-changing needs of the multi-functional office. Loco Bench works in a wide range of collaborative environments ranging from café or cultural settings to commercial or corporate areas. The straight forward linear design also makes it easy to create an individually tailored office layout where more than one unit is configured together. A wide range of MFC or Veneered wooden tops, metalwork finishes and power options complete this exciting range. Coupled with the versatile loco seat, this range has the potential to create a powerful and impressive statement in a range of modern workplace and leisure environments.

LOCO BENCH Meeting, Eating or Working

Loco Bench: • Orders processed from the 3rd June 2019 will be supplied at 740mm high, see page 17 • 'A' frame leg • Tops supplied with radiused corners

• Loco bench is 740mm high • Loco seat is 450mm high • Individual or full-length seat pads are compatible with the loco seat

MEETING TABLES

Product Overview

We offer an exciting, dynamic, range of meeting tables bringing something to suit every requirement. The tables have been developed to complement the entire portfolio of our seating and furniture ranges. The meeting table ranges offer numerous configurations, including Sit and Stand, Fliptop, Folding, Stand Alone and Modular table variants. Square, Round, Rectangular, Semi-circular and Trapezoidal shaped tops are all available in numerous MFC and Veneer wood finishes. In addition, there are chromed and epoxy painted steel frame colours to choose from. A truly versatile and adaptable range of meeting tables suitable for every possible brief or design requirement.

MEETING TABLES Meeting Tables

Height Adjustable Meeting Tables (MT09HA/MT10HA): • Available in 1200mm or 1000mm 25mm circular top • Gas lift height adjustment of 725mm - 1050mm • 95mm diameter adjustable column • Mobile base with locking castors • **Available in silver RAL 9006 as standard or a white frame RAL 9003 only**

Cascara Meeting Tables (MT11): • Available in 1000mm or 800mm diameter 25mm circular top • Available in 1000mm or 800mm 25mm square top • Four-star chrome base • 655mm base • 50mm diameter chrome column • **Available in chrome only**

Rio Meeting Tables (MT12): • Available in 1000mm or 800mm diameter 25mm circular top • Available in 1000mm or 800mm 25mm square top • Four-star chrome base • 50mm diameter chrome column • 680mm base • Levelling feet • **Available in chrome only**

MEETING TABLES Meeting Tables

PIAZZA Meeting Tables

Product Overview

The essence of Piazza lies within its clean, informal and relaxed style. With its solid ash, square edged legs, Piazza has been designed to complement our hugely successful Bill breakout chair range. It also works extremely well with our Latte and Multiply Wood seating ranges, adding colour and flare to any informal reception, meeting or breakout area. A choice of Circular, Square or Rectangular undercut MDF tops with a durable white painted finish adds style and versatility to the range. Piazza is a perfect choice for a multitude of workplace and leisure environments.

Meeting Tables: • 30mm MDF undercut top • Available in 1200mm, 1000mm or 800mm diameter 30mm circular top • Available in 900mm x 900mm 30mm square top • Available in 1600mm x 900mm 30mm rectangular top • Strong durable white painted finish • **Solid ash square edged legs** • White epoxy painted leg plates • Protective glides

BAR TABLES

Product Overview

Our range of bar tables have a modest and stylish feel, worthy of any corporate or leisure area. They allow the user to work both individually or in a group, but in a more relaxed manner than around a meeting table. The flexibility of our bar tables enable use as a standalone working surface, or simply as a drinks table. Our comprehensive stool portfolio ensures there is something to suit every taste and style of bar table. A total of ten tables complete the range, each with its own unique style and identity. The possibility for customisation and personalisation is huge with a broad choice of MFC and Veneer wood finishes offered as well as epoxy painted frame colour options.

BAR TABLES Bar Tables

Trumpet Base Bar Tables (BT05): • 600mm diameter 25mm circular top • 600mm x 600mm 25mm square top • Weighted base • 490mm diameter circular base • 60mm diameter column • **Available in chrome only**

COFFEE TABLES

Coffee Tables

TERMS & CONDITIONS

INTERPRETATION

1.

In these Conditions, the following definitions apply:

"Business Day" means a day (other than a Saturday, Sunday or public holiday) when banks in London are open for business;

"Conditions" means the terms and conditions set out in this document as amended from time to time in accordance with clause 52;

"Contract" means the contract between EOF and the Customer for the sale and purchase of the Goods in accordance with these Conditions;

"Customer" means the person or firm who purchases the Goods from EOF;

"EOF" means Elite Office Furniture (UK) Ltd. a company incorporated in England and Wales with company number 03365655;

"Force Majeure Event" means has the meaning given in clause 46;

"Goods" means the goods (or any part of them) set out in the Order;

"Order" means the Customer's order for the Goods, as set out [in the Customer's purchase order form OR overleaf OR in the Customer's written acceptance of the EOF's quotation OR in the Customer's purchase order form, the Customer's written acceptance of EOF's quotation]

"Specials" means any bespoke products manufactured or otherwise supplied by EOF to the Customer's Specification; and

"Specification" means any specification for the Goods agreed between the parties in accordance with clause 9.
2.

In these Conditions:

2.1

a person includes a natural person, corporate or unincorporated body (whether or not having separate legal personality);

2.2

a reference to a party includes its personal representatives, successors or permitted assigns;

2.3

a reference to a statute or statutory provision is a reference to such statute or provision as amended or re-enacted. A reference to a statute or statutory provision includes any subordinate legislation made under that statute or statutory provision, as amended or re-enacted;

2.4

any phrase introduced by the terms including, include, in particular or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms; and

2.5

a reference to writing or written includes faxes and e-mails.

BASIS OF THE CONTRACT

3.

These Conditions apply to the Contract to the exclusion of any other terms that the Customer seeks to impose or incorporate, or which are implied by trade, custom, practice or course of dealing. The Order constitutes an offer by the Customer to purchase the Goods in accordance with these Conditions.
4.

The Order shall only be deemed to be accepted when EOF issues a written acceptance of the Order, at which point the Contract shall come into existence. The Customer is responsible for ensuring that the terms of the Order and any applicable Specification are complete and accurate. The Customer must communicate any errors to EOF's Customer Services Team within 24 hours (and confirmed in writing within 48 hours) and accepts that failure to do will render them liable for potential abortive costs.
5.

The Contract constitutes the entire agreement between the parties. The Customer acknowledges that it has not relied on any statement, promise or representation made or given by or on behalf of EOF which is not set out in the Contract.
6.

Any samples, drawings, descriptive matter, or advertising produced by EOF and any descriptions or illustrations contained in EOF's catalogues, brochures and website are produced for the sole purpose of giving an approximate idea of the Goods described in them. They shall not form part of the Contract or have any contractual force.
7.

A quotation for the Goods given by EOF shall not constitute an offer. A quotation shall only be valid for a period of 30 Business Days from its date of issue.

PRODUCTS

8.

The Goods are, subject to clause 6, as described in EOF's catalogue as modified by any applicable Specification.
9.

Requests for Special product(s) must be submitted on the official "Elite Specials Request Form" which is available via the Elite web site or on request from EOF's Customer Services Department. When submitted the document will be processed by the Elite Specials team and a decision will be made either to accept or reject the request based on its validity and feasibility. It is EOF's aim to return completed forms within 2 – 3 Business Days.
10.

To the extent that the Goods are to be manufactured in accordance with a Specification supplied by the Customer, the Customer shall indemnify EOF against all liabilities, costs, expenses, damages and losses (including any direct, indirect or consequential losses, loss of profit, loss of reputation and all interest, penalties and legal and other professional costs and expenses) suffered or incurred by EOF in connection with any claim made against EOF for actual or alleged infringement of a third party's intellectual property rights arising out of or in connection with EOF's use of the Specification. This clause 10 shall survive termination of the Contract.

11.

EOF reserves the right to discontinue the manufacture or supply of the Goods or amend the specification of the Goods without notice:

11.1

if required by any applicable statutory or regulatory requirements; or

11.2

in accordance with its policy of continuous product development.

CANCELLATIONS AND VARIATIONS

12.

It is in EOF's sole discretion, having regard to any agreed delivery dates, when to commence manufacture of the Goods. Cancellations must be communicated to EOF in writing. Cancellations received by EOF:

12.1

prior to manufacture may, in EOF's sole discretion, be subject to a 25% administration cost (such cost being a genuine pre- estimate of the cost of, amongst other things, the rescheduling of production runs);

12.2

following commencement of manufacture will be charged in full;

12.3

in respect of outsourced Goods (I.e. not manufactured by EOF) shall be subject to a 25% administration cost (such cost being a genuine pre-estimate of EOF cancelling its order with any third party supplier), please note that whilst EOF may, but shall be under no obligation so to do, have regard to the stage of production reached when receiving the Customer's notice of cancellation when determining cancellation costs it reserves the right to charge for cancellations in full. Specials shall always be charged in full.

13.

If the Customer wishes to change anything in the Contract, the request must be made in writing. EOF will inform the Customer whether it is willing to agree to the change and, if so, what will be the impact on the price and delivery date. The Customer must notify EOF in writing within 2 days of receiving EOF's response whether these changes are accepted and if so, the Contract will be deemed to have been varied accordingly. EOF will not proceed with the change until this notice is received. A request to reduce the quantity of Goods ordered will not result in a price reduction unless otherwise agreed in writing by EOF.
- DELIVERY
14.

EOF shall ensure that:

14.1

each delivery of the Goods is accompanied by a delivery note which shows the date of the Order, all relevant Customer and EOF reference numbers, the type and quantity of the Goods (including the code number of the Goods, where applicable), special storage instructions (if any) and, if the Order is being delivered by instalments, the outstanding balance of Goods remaining to be delivered; and

14.2

if EOF requires the Customer to return any packaging materials to EOF, that fact is clearly stated on the delivery note. The Customer shall make any such packaging materials available for collection at such times as EOF shall reasonably request. Returns of packaging materials shall be at EOF's expense.

15.

EOF shall deliver the Goods to the location set out in the Order (one address only) or such other location as the parties may agree ("Delivery Location") at any time after EOF notifies the Customer that the Goods are ready. Delivery requests for alternative addresses will be charged and must be approved by EOF's Customer Services Team prior to placing the Order. EOF reserves the right to decline any such request.

16.

Delivery of the Goods shall be completed on the Goods' arrival at the Delivery Location and in the case of ex-works on EOF notifying the Customer that the Goods are ready for collection. All deliveries must be signed for & appropriately dated. Items cannot be signed unchecked, it is the Customer's responsibility to visually check items delivered and investigate items where the packaging is visibly damaged or torn. Deliveries are inclusive of tailboard only where it is the Customer's responsibility to provide free assistance in unloading the vehicle. Once unloaded to the tailboard of the vehicle and handed to the Customer, it is their responsibility from here on. Notification of shortages and/or damages must be made in writing to EOF within 3 days of delivery.

17.

Any dates quoted for delivery are approximate only, and the time of delivery is not of the essence. EOF shall not be liable for any delay in delivery of the Goods that is caused by a Force Majeure Event or the Customer's failure to provide EOF with adequate delivery instructions or any other instructions that are relevant to the supply of the Goods. EOF deliver on multi-drop vehicles and no guarantee can be made to set timescales. However, if the volume permits a dedicated delivery can be made (subject to additional costs) and an estimated time of delivery can be requested. In such cases EOF will not be liable for financial penalties resulting in late delivery of products.

18.

EOF shall have no liability for any failure to deliver the Goods to the extent that such failure is caused by a Force Majeure Event or the Customer's failure to provide EOF with adequate delivery instructions or any other instructions that are relevant to the supply of the Goods.
19.

If the Customer fails to take delivery of the Goods within 3 Business Days of EOF notifying the Customer that the Goods are ready, then, except where such failure or delay is caused by a Force Majeure Event or EOF's failure to comply with its obligations under the Contract:

19.1

delivery of the Goods shall be deemed to have been completed at 9.00 am on the third Business Day after the day on which EOF notified the Customer that the Goods were ready; and

19.2

EOF shall store the Goods until delivery takes place, and charge the Customer for all related costs and expenses (including insurance, storage and redelivery).

20.

If 10 Business Days after the day on which EOF notified the Customer that the Goods were ready for delivery the Customer has not taken delivery of them, EOF may resell or otherwise dispose of part or all of the Goods and, after deducting reasonable storage and selling costs, account to the Customer for any excess over the price of the Goods paid by the Customer or charge the Customer for any shortfall below the price of the Goods.

21.

EOF may deliver the Goods by instalments, which shall be invoiced and paid for separately. Each instalment shall constitute a separate Contract. Any delay in delivery or defect in an instalment shall not entitle the Customer to cancel any other instalment.
- QUALITY/RETURNS
22.

EOF warrants that on delivery, and for a period of 5 years from the date of delivery ("Warranty Period"), the Goods shall:

22.1

conform in all material respects with their description and any applicable Specification;

22.2

be free from material defects in design, material and workmanship; and

22.3

be of satisfactory quality (within the meaning of the Sale of Goods Act 1979); and

22.4

be fit for any purpose held out by EOF.

23.

Subject to clause 24 if:

23.1

the Customer gives notice in writing to EOF during the Warranty Period within a reasonable time of discovery that some or all of the Goods do not comply with the warranty set out in clause 22;

23.2

EOF is given a reasonable opportunity of examining such Goods; and

23.3

the Customer (if asked to do so by EOF) returns such Goods to EOF's place of business at EOF's cost, EOF shall, at its option, repair or replace the defective Goods, or refund the price of the defective Goods in full.

24.

EOF shall not be liable for the Goods' failure to comply with the warranty set out in clause 22 in any of the following events:

24.1

the Customer makes any further use of such Goods after giving notice in accordance with clause 22;

24.2

the defect arises because the Customer failed to follow EOF's oral or written instructions as to the storage, commissioning, installation, use and maintenance of the Goods or (if there are none) good trade practice regarding the same;

24.3

the defect arises as a result of EOF following any drawing, design or Specification supplied by the Customer;

24.4

the Customer alters or repairs such Goods without EOF's prior written consent;

24.5

the defect arises as a result of fair wear and tear, wilful damage, negligence, or abnormal storage or working conditions; or

24.6

the Goods differ from their description or, as the case may be, the Specification as a result of changes made to ensure they comply with applicable statutory or regulatory requirements.

25.

Wood veneers vary in grain and colour, EOF do not book match veneers and work with pre-veneered boards limiting the matching of veneers on adjoining surfaces. EOF will not be liable whatsoever for any variation and shall be under no obligation to accept return of Goods where a variation occurs. Veneer is a natural material and variations on pre-veneered board are inevitable. If the Customer requires book matching on veneers a specialist supplier should be identified and appointed.

26.

Except as provided in clauses 22 to 28 (inclusive), EOF shall have no liability to the Customer in respect of the Goods' failure to comply with the warranty set out in clause 22.

27.

Except as set out in these Conditions, all warranties, conditions and other terms implied by statute or common law are, to the fullest extent permitted by law, excluded from the Contract.

28.

These Conditions shall apply to any repaired or replacement Goods supplied by EOF.

253

TERMS & CONDITIONS

TITLE AND RISK

29. The risk in the Goods shall pass to the Customer on completion of delivery.
30. Title to the Goods shall not pass to the Customer until EOF has received payment in full (in cash or cleared funds) for:
 - 30.1 the Goods; and
 - 30.2 any other goods or services that EOF has supplied to the Customer.
31. Until title to the Goods has passed to the Customer, the Customer shall:
 - 31.1 hold the Goods on a fiduciary basis as EOF's bailee;
 - 31.2 store the Goods separately from all other goods held by the Customer so that they remain readily identifiable as EOF's property;
 - 31.3 not remove, deface or obscure any identifying mark or packaging on or relating to the Goods;
 - 31.4 maintain the Goods in satisfactory condition and keep them insured against all risks for their full price from the date of delivery;
 - 31.5 notify EOF immediately if it becomes subject to any of the events listed in clause 43; and
 - 31.6 give EOF such information relating to the Goods as EOF may require from time to time, but the Customer may resell or use the Goods in the ordinary course of its business.
32. If before title to the Goods passes to the Customer the Customer becomes subject to any of the events listed in clause 43, or EOF reasonably believes that any such event is about to happen and notifies the Customer accordingly, then, provided that the Goods have not been resold, or irrevocably incorporated into another product, and without limiting any other right or remedy EOF may have, EOF may at any time require the Customer to deliver up the Goods and, if the Customer fails to do so promptly, enter any premises of the Customer or of any third party where the Goods are stored in order to recover them.

FINANCIAL

Prices

33. The price of the Goods shall be the price set out in the Order, or, if no price is quoted, the price set out in EOF's published price list in force as at the date of delivery.
34. EOF may, by giving notice to the Customer at any time before delivery, increase the price of the Goods to reflect any increase in the cost of the Goods that is due to:
 - 34.1 any factor beyond EOF's reasonable control (including foreign exchange fluctuations, increases in taxes and duties, and increases in labour, materials and other manufacturing costs);
 - 34.2 any request by the Customer to change the delivery date(s), quantities or types of Goods ordered, or the Specification; or
 - 34.3 any delay caused by any instructions of the Customer or failure of the Customer to give EOF adequate or accurate information or instructions.
35. The price of the Goods is inclusive of the costs and charges of packaging. (Export product will be subject to additional charges, please contact the Elite Customer Services for prices).
36. The price of the Goods is exclusive of amounts in respect of value added tax ("VAT"). The Customer shall, on receipt of a valid VAT invoice from EOF, pay to EOF such additional amounts in respect of VAT as are chargeable on the supply of the Goods.

Payment

37. EOF requires 2 bank references for new account applications and reserves the right to change its financial requirements as and when it deems it appropriate.
38. EOF may invoice the Customer for the Goods on or at any time after the completion of delivery.
39. The Customer shall pay the invoice in full and in cleared funds by the end of the month following the month the invoice was dated. Time of payment is of the essence.
40. If the Customer fails to make any payment due to EOF under the Contract by the due date for payment ("due date"), then the Customer shall pay interest on the overdue amount at the rate of 2.5% per annum above [HSBC]'s base rate from time to time. Such interest shall accrue on a daily basis from the due date until the date of actual payment of the overdue amount, whether before or after judgment. The Customer shall pay the interest together with the overdue amount. EOF reserves the right to charge interest on any overdue payment in accordance with the Late Payment of Commercial Debts (Interest) Act 1998. The Customer shall be liable for all reasonable costs (including legal and court costs) associated with the collection of overdue accounts.

41. The Customer shall pay all amounts due under the Contract in full without any deduction or withholding except as required by law and the Customer shall not be entitled to assert any credit, set-off or counterclaim against EOF in order to justify withholding payment of any such amount in whole or in part. EOF may at any time, without limiting any other rights or remedies it may have, set off any amount owing to it by the Customer against any amount payable by EOF to the Customer.

CUSTOMER'S INSOLVENCY OR INCAPACITY

42. If the Customer becomes subject to any of the events listed in clause 43, or EOF reasonably believes that the Customer is about to become subject to any of them and notifies the Customer accordingly, then, without limiting any other right or remedy available to EOF, EOF may cancel or suspend all further deliveries under the Contract or under any other contract between the Customer and EOF without incurring any liability to the Customer, and all outstanding sums in respect of Goods delivered to the Customer shall become immediately due.
43. For the purposes of clause 42, the relevant events are:
- 43.1 the Customer suspends, or threatens to suspend, payment of its debts, or is unable to pay its debts as they fall due or admits inability to pay its debts, or (being a company) is deemed unable to pay its debts within the meaning of section 123 of the Insolvency Act 1986, or (being an individual) is deemed either unable to pay its debts or as having no reasonable prospect of so doing, in either case, within the meaning of section 268 of the Insolvency Act 1986, or (being a partnership) has any partner to whom any of the foregoing apply;
- 43.2 the Customer commences negotiations with all or any class of its creditors with a view to rescheduling any of its debts, or makes a proposal for or enters into any compromise or arrangement with its creditors other than (where the Customer is a company) where these events take place for the sole purpose of a scheme for a solvent amalgamation of the Customer with one or more other companies or the solvent reconstruction of the Customer;
- 43.3 (being a company) a petition is filed, a notice is given, a resolution is passed, or an order is made, for or in connection with the winding up of the Customer, other than for the sole purpose of a scheme for a solvent amalgamation of the Customer with one or more other companies or the solvent reconstruction of the Customer;
- 43.4 (being an individual) the Customer is the subject of a bankruptcy petition or order;
- 43.5 a creditor or encumbrancer of the Customer attaches or takes possession of, or a distress, execution, sequestration or other such process is levied or enforced on or sued against, the whole or any part of its assets and such attachment or process is not discharged within 14 days;
- 43.6 (being a company) an application is made to court, or an order is made, for the appointment of an administrator or if a notice of intention to appoint an administrator is given or if an administrator is appointed over the Customer;
- 43.7 (being a company) a floating charge holder over the Customer's assets has become entitled to appoint or has appointed an administrative receiver;
- 43.8 a person becomes entitled to appoint a receiver over the Customer's assets or a receiver is appointed over the Customer's assets;
- 43.9 any event occurs, or proceeding is taken, with respect to the Customer in any jurisdiction to which it is subject that has an effect equivalent or similar to any of the events mentioned in clause 43.1 to clause 43.8 (inclusive);
- 43.10 the Customer suspends, threatens to suspend, ceases or threatens to cease to carry on all or substantially the whole of its business;
- 43.11 the Customer's financial position deteriorates to such an extent that in EOF's opinion the Customer's capability to adequately fulfil its obligations under the Contract has been placed in jeopardy; and
- 43.12 (being an individual) the Customer dies or, by reason of illness or incapacity (whether mental or physical), is incapable of managing his or her own affairs or becomes a patient under any mental health legislation.
- 43.13 Termination of the Contract, however arising, shall not affect any of the parties' rights and remedies that have accrued as at termination. Clauses which expressly or by implication survive termination of the Contract shall continue in full force and effect.

LIMITATION OF LIABILITY

44. Nothing in these Conditions shall limit or exclude EOF's liability for:
- 44.1 death or personal injury caused by its negligence, or the negligence of its employees, agents or subcontractors (as applicable);
- 44.2 fraud or fraudulent misrepresentation;
- 44.3 breach of the terms implied by section 12 of the Sale of Goods Act 1979;

- 44.4 defective products under the Consumer Protection Act 1987; or
 - 44.5 any matter in respect of which it would be unlawful for the EOF to exclude or restrict liability.
45. Subject to clause 44:
- 45.1 EOF shall under no circumstances whatever be liable to the Customer, whether in contract, tort (including negligence), breach of statutory duty, or otherwise, for any loss of profit, or any indirect or consequential loss arising under or in connection with the Contract; and
 - 45.2 EOF's total liability to the Customer in respect of all other losses arising under or in connection with the Contract, whether in contract, tort (including negligence), breach of statutory duty, or otherwise, shall in no circumstances exceed the price of the Goods.

FORCE MAJEURE

46. EOF shall not be liable for any failure or delay in performing its obligations under the Contract to the extent that such failure or delay is caused by a Force Majeure Event. A Force Majeure Event means any event beyond a party's reasonable control, which by its nature could not have been foreseen, or, if it could have been foreseen, was unavoidable, including strikes, lock-outs or other industrial disputes (whether involving its own workforce or a third party's), failure of energy sources or transport network, acts of God, war, terrorism, riot, civil commotion, interference by civil or military authorities, national or international calamity, armed conflict, malicious damage, breakdown of plant or machinery, nuclear, chemical or biological contamination, sonic boom, explosions, collapse of building structures, fires, floods, storms, earthquakes, loss at sea, epidemics or similar events, natural disasters or extreme adverse weather conditions, or default of suppliers or subcontractors. If the event of force majeure continues for a continuous period in excess of 43 months, the Customer shall be entitled to give notice in writing to EOF to terminate the Contract.

GENERAL

43. EOF may at any time assign, transfer, charge, subcontract or deal in any other manner with all or any of its rights or obligations under the Contract.
44. The Customer may not assign, transfer, charge, subcontract or deal in any other manner with all or any of its rights or obligations under the Contract without EOF's prior written consent.
45. Any notice or other communication given to a party under or in connection with the Contract shall be in writing, addressed to that party at its registered office (if it is a company) or its principal place of business (in any other case) or such other address as that party may have specified to the other party in writing in accordance with this clause, and shall be delivered personally, sent by pre-paid first class post, recorded delivery, commercial courier, fax or e-mail.
46. A notice or other communication shall be deemed to have been received: if delivered personally, when left at the address referred to in clause 49; if sent by pre-paid first class post or recorded delivery, at 9.00 am on the second Business Day after posting; if delivered by commercial courier, on the date and at the time that the courier's delivery receipt is signed; or, if sent by fax or e-mail, one Business Day after transmission.
47. The provisions of clauses 49 and 50 shall not apply to the service of any proceedings or other documents in any legal action.
48. If any court or competent authority finds that any provision of the Contract (or part of any provision) is invalid, illegal or unenforceable, that provision or part-provision shall, to the extent required, be deemed to be deleted, and the validity and enforceability of the other provisions of the Contract shall not be affected.
49. If any invalid, unenforceable or illegal provision of the Contract would be valid, enforceable and legal if some part of it were deleted, the provision shall apply with the minimum modification necessary to make it legal, valid and enforceable.
50. A waiver of any right or remedy under the Contract is only effective if given in writing and shall not be deemed a waiver of any subsequent breach or default. No failure or delay by a party to exercise any right or remedy provided under the Contract or by law shall constitute a waiver of that or any other right or remedy, nor shall it preclude or restrict the further exercise of that or any other right or remedy. No single or partial exercise of such right or remedy shall preclude or restrict the further exercise of that or any other right or remedy.
51. A person who is not a party to the Contract shall not have any rights under or in connection with it.
52. Except as set out in these Conditions, any variation to the Contract, including the introduction of any additional terms and conditions, shall only be binding when agreed in writing and signed by EOF.
53. The Contract, and any dispute or claim arising out of or in connection with it or its subject matter or formation (including non-contractual disputes or claims), shall be governed by, and construed in accordance with, English law, and the parties irrevocably submit to the exclusive jurisdiction of the courts of England and Wales.
