

Product Overview

This product is a multi-functional phone and watch charging cable with multiple connectors, compatible with various chargers to power different electronic devices. The 3-in-1 design ensures broad compatibility with most smartphones and other gadgets. Featuring aluminum alloy connectors and a nylon-braided cable, it offers premium durability, wear resistance, and tensile strength. Whether at home, in the office, or while traveling, this single cable meets all your charging needs efficiently.

Product Features

Design: Aluminum alloy connectors paired with a nylon-braided cable ensure longevity and resistance to wear. Available in black, white, yellow, and other colors for personalized style. Includes a strap for easy cable management.

- **Interfaces:** Input supports USB-A and USB-C for compatibility with most chargers. Output includes a watch wireless charger, USB-C, and Lightning connectors, covering 99.99% of devices (e.g., Huawei, Xiaomi, Apple phones, and more).

- **Durability:** The nylon-braided exterior passes 3,000+ pull tests. Internal components use integrated molding and aluminum alloy reinforcement for extended lifespan.

Technical Specifications

Input Interfaces: USB-A and USB-C.

Output Interfaces: Watch wireless charger, Lightning, and Type-C.

Input Parameters:

USB-A: [Voltage] 5V – [Current] 3A

USB-C: [Voltage] 5V – [Current] 3A

Output Parameters:

Type-C: [Voltage] 5V – [Current] 2.4A

Lightning: [Voltage] 5V – [Current] 2.4A

Watch Wireless Charger: [Voltage] 5V – [Current] 0.5A

Charging Power:

Watch: Up to 2.5W

Type-C/Lightning: Up to 12W

Cable Specifications:

OD: 3.8mm

Core: 36/0.1*2C pure copper

Material: 48-spindle braided nylon for flexibility, tangle resistance, and abrasion resistance.

Length: 1.2M

Weight: 53.7g

Usage Instructions

Select Input Interface:

For traditional USB chargers (rectangular port), use the USB-A input.

For USB-C chargers (oval, reversible port), use the USB-C input.

Connect Devices:

Lightning: For Apple iPhones (small rectangular port with a notch).

Type-C: For most Android devices.

Watch Wireless Charger: Exclusive to Apple Watches.

Multi-Device Charging:

Multiple devices can be charged simultaneously via different outputs. Note: Power distribution may reduce charging speed for some devices.

After Use:

Disconnect devices first, then unplug from the charger. Store neatly using the included strap.

Safety Precautions

Insertion/Removal: Align connectors properly before insertion. Avoid excessive force, even for reversible USB-C. Forcing Lightning connectors may damage pins.

Environment: Avoid high temperatures, moisture, or dust. Do not leave in direct sunlight (e.g., inside a car).

Compatibility: Use chargers certified for your device. Incompatible chargers may cause malfunctions or damage.

Troubleshooting

Check Connections: Ensure both ends are securely plugged in. Loose connections often mimic cable failure.

Test Charger/Port: Try alternate chargers or USB ports. If the cable works elsewhere, the original charger/port may be faulty.

Clean Ports: Gently wipe connectors with a dry cloth to remove debris. Dirty ports can disrupt charging.

Label Information

Product Name: 3-in-1 Charging Cable

Model Numbers: S10007, AI002, CA04A, HYX003, KDX007A, JJD008, YH0005, KHN010, SSX-09, H0006, ADS-001.

Manufacturer: Shenzhen Edison Technology Co., Ltd

Address: 6th Floor, Building B, Jiapin Industrial Park, Bitou Third Industrial Zone, Songgang Street, Bao'an District, Shenzhen

Input Parameters: [USB-A: 5V – 3A] [USB-C: 5V – 3A]

Output Parameters: [Type-C: 5V – 2.4A Max] [Lightning: 5V – 2.4A Max] [Watch: 5V – 0.5A Max]

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radiofrequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
