This topic describes the default data centers in which OEM app accounts are served based on the app account locations. For more information, see [Data Center](#) .

1. Rules of account location

1.1. Default rules

- OEM apps can be created on the [Tuya Developer Platform](#) . By default, the app accounts are allocated to specific data centers based on the mappings between the data centers and the countries or regions listed in the following tables. The locations of the app accounts determine the data centers in which the app accounts are served.
- The countries or regions not listed in the following tables are mapped to the **Western America Data Center**.

i

- ▶ **India Data Center** is managed by Amazon Web Services (AWS) and has been available since 2020.
- ▶ For OEM apps created earlier than **2020-09-22 17:10:00** (UTC+8), if the app accounts have been registered in **India**, these app accounts belong to the **Central Europe Data Center**.
- ▶ For OEM apps created since **2020-09-22 17:10:00** (UTC+8), the app accounts are allocated based on the mappings for this data center in this topic.
- ▶ **Singapore Data Center** has been available since June 3, 2025.
- ▶ For OEM apps created earlier than **2025-6-3 10:00:00** (UTC+8), if the app accounts have been registered in a country or region in the table, they will still remain in the original data center.
- ▶ For OEM apps created since **2025-6-3 10:00:00** (UTC+8), the app accounts are allocated based on the mappings for this data center in this topic.
- ▶ For countries/regions where the data center's location has changed, please refer to the [Data center location change record](#) for information on their original locations.

1.2. Modify rules

You can modify the rules, as instructed in [Modify Mappings Between OEM App Accounts and Data Centers](#) .

This way, you can specify the data centers in which your OEM app accounts in certain countries or regions are served. The app accounts created since this modification are allocated to the specified data centers based on the mappings that might be different from those mentioned in this topic. Your OEM apps must be rebuilt to make this modification effective.

In line with your business needs, you can activate Microsoft Azure cloud services for your OEM apps and make this activation effective. Therefore, the app accounts created since this activation are allocated to either the **Eastern America Data Center** or the **Western Europe Data Center**. The app accounts created earlier than this activation cannot be used as expected until the activation takes effect.

2. Western America Data Center

Country code	Country/region	Country code	Country/region	Country code	Country/region
1	United States	502	Guatemala	970	Palestine
1	Canada	591	Bolivia	1340	U.S. Virgin Islands
51	Peru	593	Ecuador	1684	American Samoa
52	Mexico	595	Paraguay	1670	Northern Mariana Islands
54	Argentina	597	Suriname	1671	Guam
55	Brazil	598	Uruguay	1787	Puerto Rico
56	Chile	674	Nauru	1809	Dominican Republic (1-809)
57	Colombia	678	Vanuatu	1829	Dominican Republic (1-829)

4. Singapore Data Center

Country code	Country/ region	Country code	Country/ region	Country code	Country/ region	Country code	Country/ region
84	Vietnam	856	Laos	855	Cambodia	66	Thailand
95	Myanmar	60	Malaysia	65	Singapore	62	Indonesia
63	Philippines	673	Brunei	670	Timor- Leste	675	Papua New Guinea
677	Solomon Islands	852	Hong Kong SAR, China	853	Macao SAR, China	886	Taiwan, China

5. India Data Center

Country code	Country/region
91	India

6. China Data Center

Country code	Country/region
86	Mainland China

7. Eastern America and Western Europe Data Centers

If you have any requirements for Eastern America and Western Europe data centers, you can [submit a ticket](#) to inquire about the details.

8. Countries or regions supporting only certain data centers

If a country or region supports only one data center, the user accounts registered in this country or region cannot be migrated to other data centers. The following mappings do not apply to Eastern America Data Center or Western Europe Data Center.

Country/ region	Central Europe Data Center	Western America Data Center	India Data Center	China Data Center
Argentina	-	Y	-	-
Austria	Y	-	-	-
Belgium	Y	-	-	-

9. Data center location change record

Singapore Data Center has been available since June 3, 2025. From today onwards, some countries/regions will be reallocated to the Singapore data center. For information on their original data center locations, please refer to the table below:

Country/Region	Original Data Center	Current Data Center
Vietnam	Western America	Singapore
Thailand	Western America	Singapore
Myanmar	Western America	Singapore
Malaysia	Western America	Singapore
Indonesia	Western America	Singapore
Philippines	Western America	Singapore
Timor-Leste	Western America	Singapore
Papua New Guinea	Western America	Singapore
Solomon Islands	Western America	Singapore
Hong Kong SAR, China	Western America	Singapore
Macao SAR, China	Western America	Singapore
Taiwan, China	Western America	Singapore
Laos	Central Europe	Singapore
Cambodia	Central Europe	Singapore
Singapore	Central Europe	Singapore
Brunei	Central Europe	Singapore
