Step 1:

1. Docking of relay (8) and relay (13).
2. Use open-end wrench (B) to lock the riser union (14) to the main frame (88) with hexagonal bolt (9), spring pad (10) and washer (11).
3. Lock the left/right riser cover (12L/R) on the riser union (14) with cross slotted pan head self-tapping nails (91) and cross slotted pan head self-tapping nails (92) using a cross dummy wrench (A).
4. Attach covers (22) in the two sides of the left/right swing union (27L/R).

Step 2:

1. Removing hexagonal bolts (61), washers (60), packing tubes (99) pre-installed on the main frame union with an open-end wrench (B);
2. Locking the front bottom tube union (43) to the main frame (88) with hexagonal bolts (61), and washers (60) with an open-end wrench (B);
3. Removing cross slotted pan head screws (30) pre-installed on the left/right swing cover (31L/R) with a cross dull wrench (A) ;
4. Use a cross dull wrench (A) to tighten the left/right swing cover (31L/R) on the left/right swing union (27L/R) with cross slotted pan head screws (30), locking.

Step 3:

1. As shown in Fig A : put the armrest cover (21) onto the left/right armrest;
2. Lock the left/right armrest (17L/R) with an open-end wrench (B) onto the left/right swing combination (27L/R) with hexagonal pan head bolts (20), curved washers (19) and nylon nuts (18);
3. Place the armrest cover (21) to the position as shown in Figure B.

Step 4:

1. Connect the e-meter protrusion line (1a) to the heart rate line (7) and the e-meter protrusion line (1b) to the relay line (8) ;
2. Remove the cross-slotted pan head screws (2) pre-installed on the electronic meter (1) with a cross-drag wrench (A) ;
3. Use the cross wrench (A) to lock the electronic meter (1) with the removed cross slot pan head screws (2) on the riser combination (14).

Installation complete!

1. Foot pad adjustment instructions for use

When the ground is uneven, rotate the adjusting foot pad (56) under the bottom tube to adjust the frame height, as shown in the figure.

2. Frame movement instructions

The front bottom tube of this exercise bike (43) has installed rollers, when you hand hold the main frame (88) at the handle and make the rollers touch the ground, you can move the frame to the position you want, as shown in the figure

3.Connecting power

When in use, plug one end of the power adapter (95) into the machine and connect the other end to the power supply; when you stop using it, please put away the power adapter (95) for next use.

4.Care and Maintenance

①Regular cleaning

Platform: Wipe the body with a clean cloth and clean the sweat stains on the surface in time

Aluminum rails: Please wipe and clean the track regularly, and use the silicone oil that comes with the package to apply an appropriate amount on the track for equipment maintenance.

②Check regularly

Power cord: Check that the power cord is tightly plugged in.

Bolts and nuts: Check all the bolts and nuts before use, tighten the loose parts to make sure there is nothing loose, and check regularly.

Control knob if it does not display properly: If you find that the control knob does not display during use, please check to make sure that the bicycle power cord is plugged in tightly and the power switch is turned on.

Note!

1. After-sales time will be calculated from the day after signing the receipt, after-sales time is not stacked, not cumulative.
2. Product packaging boxes are retained for at least 15 days after receipt, in order to be used in the return business for the old machine packaging; if the user packaging boxes are lost or damaged, the user is required to purchase the corresponding product packaging box foam and other materials to ensure the safety of the transport of goods.

Finally wish you a happy use for this machine! If you have questions, please contact us: feierdun01@sina.com
