

HexTenna

Delta Loop Antenna option

The Delta Loop Antenna option is an add-on for the portable Alpha HexTenna High Frequency (HF) antenna. Coverage includes all amateur radio bands from 3.5 to 54.0 MHz (80-6M) when an external antenna tuner is used.

INSTRUCTIONS FOR DEPLOYMENT

1. Install the Telescopic Elements and Auto Match with the RF Jumper on the HexTenna Hub.
2. Attach the Delta Loop Antenna Wire to each corona ball on the Telescopic Elements.
3. Setup your mounting option and install the HexTenna Hub assembly and fully extend the Telescopic Elements.
