

# **Viri® AA Rechargeable Batteries**

## **Instruction manual**

**MPOWERD®**

# Getting to know Viri

1. USB cap
2. USB port
3. Battery
4. Battery charge indicator

---

## Charging

- To charge the batteries, first remove the USB cap and move to the side.
- Plug the USB port into any USB power source.
- When charging the battery, the charge indicator light turns red and then turns off when fully charged. No additional charging cable needed!

## How to use

- These batteries are used in the same way that regular alkaline AA batteries are used. Once fully charged, simply place the batteries into any AA compatible device, ensuring that the positive and negative ends are on the correct side.

# Frequently asked questions

## What can these batteries power?

Our AA batteries work in any battery-operated device that calls for standard AA batteries. Charge your remote controls, video game controllers, wireless mice and keyboards, baby monitors, toys, portable electronics, and more!

## Why should I purchase these over regular alkaline AA batteries?

Billions of single-use alkaline batteries are thrown away every year! This is not only bad for the planet - since hundreds of thousands of tons of batteries end up in a landfill - but it's also an unnecessary personal expense. Our integrated USB rechargeable batteries can be used over and over again. By using just one of our AA's, you're saving the need to go through ~1000 batteries. Our rechargeable AA batteries save you money, time, and are better for the planet.

## How long do they take to charge?

Quick and easy to recharge, our AA batteries recharge fully in around 1-2 hours. This varies slightly depending on the charging amps of the power source, but in general it's around 1-2 hours.

## Do I need a charging cable?

No charging cables necessary! Our integrated USB batteries make it simpler to charge when needed.

## What kind of charger should I use?

These batteries can be charged via any USB charger. Charge via a USB wall socket, power bank, in your car, your computer, even in our Luci lights! The USB port allows you to recharge in so many different ways!

## How do I know when they are fully charged?

When charging the battery, the indicator light turns red and turns off when fully charged.

## How many times can they be recharged?

Our AA batteries can be recharged around 1000 times and last for years!
