

**Formatting the SD Card
DR650GW-2CH
(For Windows Application Only)**

1. Insert original SD card to the computer.
2. Click Blackvue > Software > Windows, then click and install the file name with “BlackVueSetup(HD)_2.31 “
3. An installation wizard will appear that will guide you through the installation.
4. After the installation, open the software named “Blackvue HD”.
5. Click on the FORMAT Button.
6. Look for the directory of the **new memory card** to be formatted.
7. Click OK

8. Insert the formatted card (Blank) to the BlackVue and power ON.

End.
