Installation Diagram

Description

RAM-216R Remote LED Annunciator feature bi-coloured LEDs that are configurable for either Alarm (red) or Supervisory (amber).

The LED annunciators have indicators for A.C. On, Common Trouble and Signal Silence and control switches for System Reset, Signal Silence, Lamp Test and Buzzer Silence.

The RAM-216R is equipped with a key switch that allows for enabling and disabling of the Common Control functions. Both models are available in a red or white finish and mounts in a 4-gang electrical box.

Power Consumption

Nominal Voltage	24 VDC
Stand by	35 mA
Maximum Current	140 mA
