INTRODUCTION

With its sleek, compact design and powerful 10,000 mAh capacity, this powerbank ensures your devices stay charged while on the go. It features 15W fast charging for efficient power delivery, and its MagSafe-compatible magnetic design securely attaches to your iPhone for effortless charging. Plus, the 3-in-1 functionality allows you to charge multiple devices simultaneously, making it perfect for everyday use or travel.

SPECS & FEATURES

- 15 Watts MagSafe SuperFast Wireless Charging
- 10,000 mAh Power Supply
- High-Performance Lithium Ion Battery
- Can Charge 3 Devices At Once
- Type-C & USB-A Input & Output
- Overcharge Protection
- LED Charge Indicator Lights
- Convenient Portable Design"

PRODUCT OVERVIEW

HOW TO USE

Charge the Powerbank: Before using the powerbank for the first time, charge it using the provided cable (usually USB-C to USB-A or USB-C to USB-C). Plug the USB end into a wall adapter or power source, and the other end into the powerbank.

The powerbank will indicate its charging status through LED lights or an on-screen indicator.

Charging Your Device Using MagSafe (For iPhones with MagSafe):

Place your MagSafe-compatible iPhone directly on the magnetic surface of the powerbank. The magnets will securely attach the phone to the powerbank. The 15W fast charging feature will kick in automatically, and your device will begin charging.

Charging Other Devices (Via USB or Wireless): **Wireless Charging:** If your device supports wireless charging (Qi-enabled), simply place it on the wireless charging pad of the powerbank to begin charging.

Wired Charging: For devices that don't support MagSafe or wireless charging, use the USB output ports (usually one USB-A and one USB-C) to connect your device using the appropriate charging cable.

Plug the cable into the output port, and connect the other end to your device to start charging.

Checking the Battery Level: Press the power button on the powerbank to check the remaining battery level. The LED indicators will show how much charge is left in the powerbank.

Simultaneous Charging: The powerbank allows you to charge multiple devices at once. You can charge your iPhone using MagSafe, and connect other devices to the USB ports at the same time.

Turning Off: When not in use, press the power button to turn off the powerbank and save battery

CARE AND SAFETY

Wipe the powerbank regularly with a dry, soft cloth to remove dust, dirt, or debris. Handle the powerbank carefully. Avoid dropping it, exposing it to sharp objects, or applying excessive pressure that could cause damage to the casing or internal components. When not in use, store the powerbank in a cool, dry place away from direct sunlight or extreme heat.

Never attempt to open or disassemble the powerbank yourself, as this could void the warranty and present electrical hazards.

PACKAGE INCLUDES

- Power Bank
- Type-C Charging Cable
