

Configuring your Roborock Unit with SmartHome Alexa Setup

To use this skill, click "**ACTIVATE**" above and log in with your Roborock App account to connect your robot. You need to create a Roborock account and register your robot in the Roborock App.

Note: Authorizing this skill requires a Roborock App account. If you are using the Mi Home App, search for the "Roborock Home" skill.

Here are some of the phrases you can use for voice commands to control the vacuum cleaner at home. You can use these commands to start, stop, pause, and locate the device, as well as check its status and direct it to the charging station.

Getting Started

- Alexa, ask Roborock to clean.
- Alexa, ask Roborock to clean with "*Bobby".
- Alexa, ask Roborock to start cleaning.
- Alexa, ask Roborock to start cleaning with "Bobby".
- Alexa, ask Roborock to clean in the "living room".
- Alexa, ask Roborock to start cleaning the "bedroom".
- Alexa, ask Roborock to clean the "second bedroom".
- Alexa, ask Roborock to clean the "entryway".

If the Alexa skill has not been activated after using the previous commands, try again with one of the following wake words, without asking specific questions or requests first.

If the Alexa skill has not been activated after using the previous commands, try again with one of the following wake words, without asking specific questions or requests first.

Alexa, open Roborock Alexa, start Roborock Alexa, start Roborock

The Alexa skill will now be activated and you will hear the welcome message.

After this message or while it is playing, say the second part of the original command out loud and the vacuum cleaner will start the corresponding action.

For example, you can say "Alexa, open Roborock" and then "clean the living room".

The same procedure also works for any other operations, such as pausing, resuming, etc. STOP

- Alexa, ask Roborock to stop.
- Alexa, ask Roborock to stop sweeping with "Bobby".
- Alexa, ask Roborock to stop sweeping.
- Alexa, ask Roborock to stop sweeping with "Bobby".

PAUSE

- Alexa, ask Roborock to pause.
- Alexa, ask Roborock to pause "Bobby".
- Alexa, ask Roborock to pause cleaning.
- Alexa, ask Roborock to pause cleaning with "Bobby".

RESUME

- Alexa, ask Roborock to resume.
- Alexa, ask Roborock to continue.
- Alexa, ask Roborock to resume with "Bobby".

FIND ROBOT

- Alexa, ask Roborock to say hello.
- Alexa, ask Roborock to find "Bobby".
- Alexa, ask Roborock to tell me where my "Bobby" is.

STATUS

- Alexa, ask Roborock to give me an update.
- Alexa, ask Roborock to tell me what it's doing.

RETURN TO CHARGING BASE

- Alexa, ask Roborock to recharge.
- Alexa, ask Roborock to send "Bobby" to the starting position
- Alexa, ask Roborock to return to the charging base.
- Alexa, ask Roborock to return to the charging base with "Bobby".

CHANGE MODE

- Alexa, ask Roborock to switch to silent mode.
- Alexa, ask Roborock to switch to balanced mode.
- Alexa, ask Roborock to switch to turbo.
- Alexa, ask Roborock to switch to max mode.

*"Bobby" is an example of a name you can give your robot. If you have renamed your Roborock vacuum cleaner, you can use the new name to send commands to it via Alexa. Just remember to open the skill via Roborock when sending the command (for example: Alexa, ask Roborock to start cleaning with Bobby.)

Google Home

Start the vacuum

Send the vacuum home

Is the Vacuum charging?

Pause the vacuum?

Stop the vacuum

Is the vacuum running?

Start vacuuming

Dock the vacuum

Charge the vacuum
