

SHINING 3D

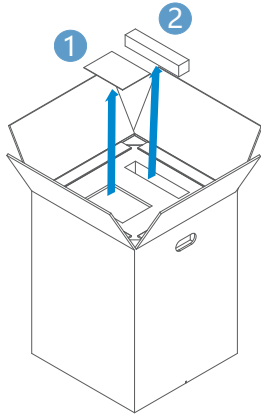

AccuFab L4D 3D Printer

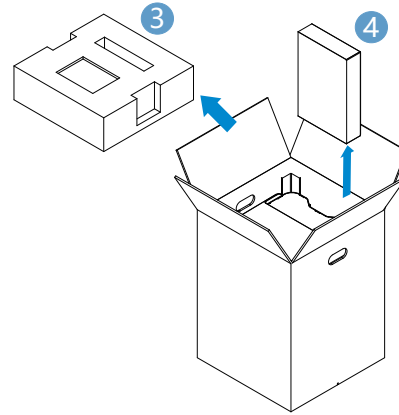

Installation Guide

Unpacking

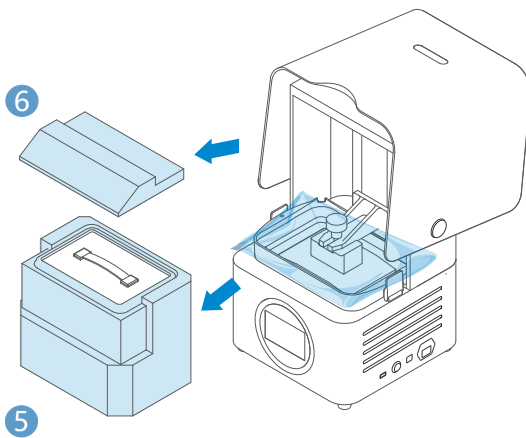

- 1) Open the package and take out the "product certificate", "installation guide" ① and power cable ②.

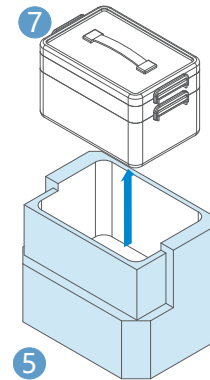

- 2) Remove foam ③, take out the spare resin tank ④ from the back of the printer.

- 3) Remove the package, place the printer on the table, and open the printer chamber door. Remove fixing foam ⑤ & ⑥ inside the printer.

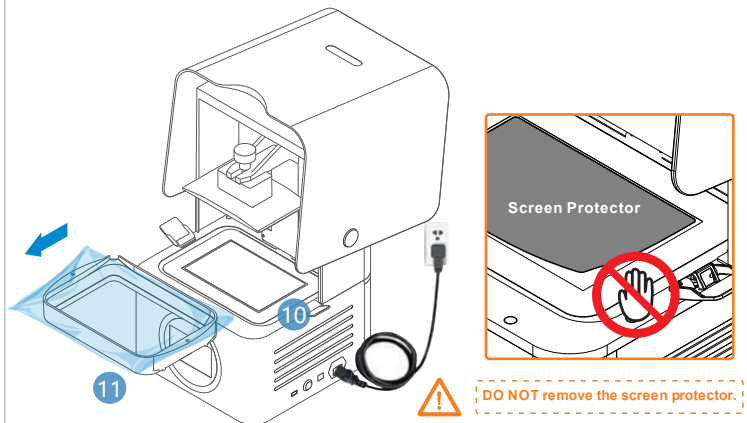

- 4) Take out accessory box ⑦ from fixing foam ⑤.

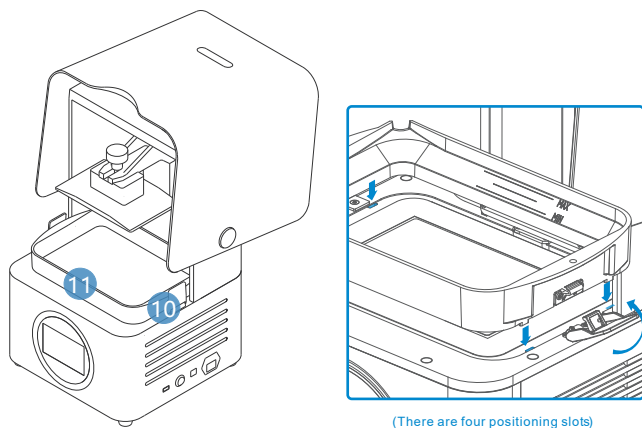

- 5) Connect the power supply ⑧ and press the power button ⑨ on right side of the printer. During printer initialization, platform will go to the top position.

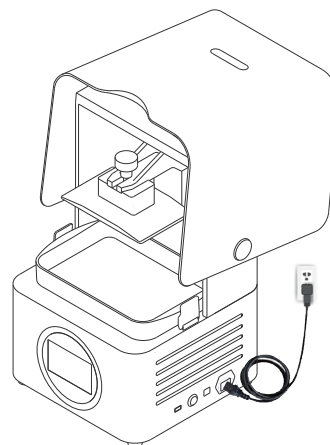

- 6) Wait for the printer stop moving, open the buckles ⑩ and take out the resin tank ⑪. Remove the protect film around the resin tank.

- 7) Put clean resin tank 11 into the position. Lock the buckles 10 for resin tank.

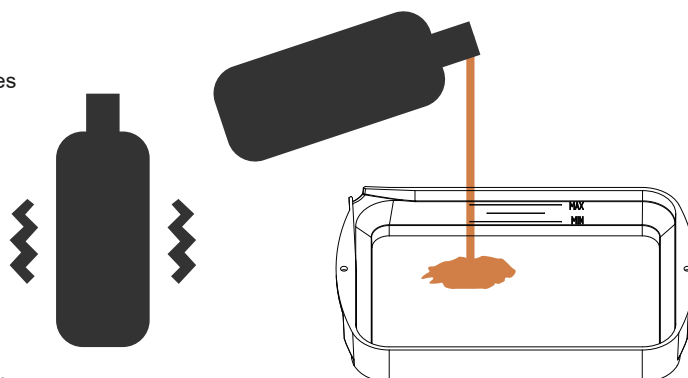

- 8) As the following picture shows, installation is completed.

Add Material

Shake for 2 mins before pouring material into the resin tank to avoid sediment.

Note that the resin level should be between the indicator lines of minimum and maximum.

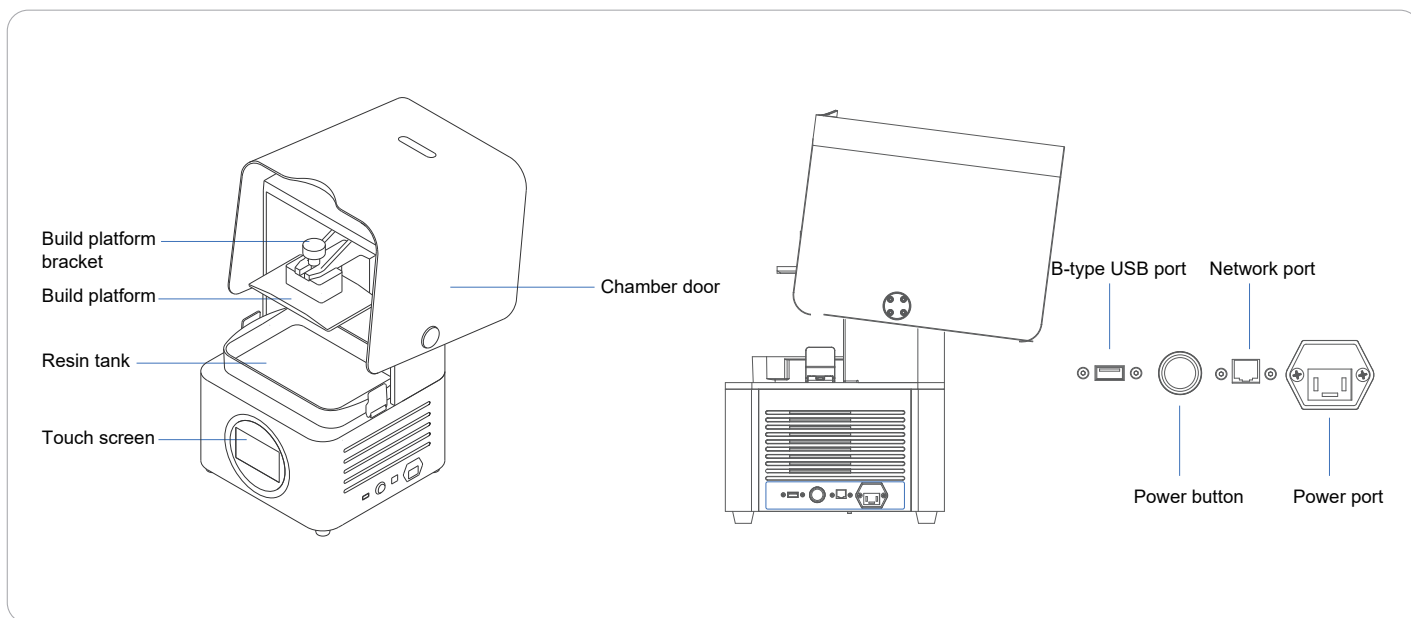

Note: You can also add resin during printing without pausing.

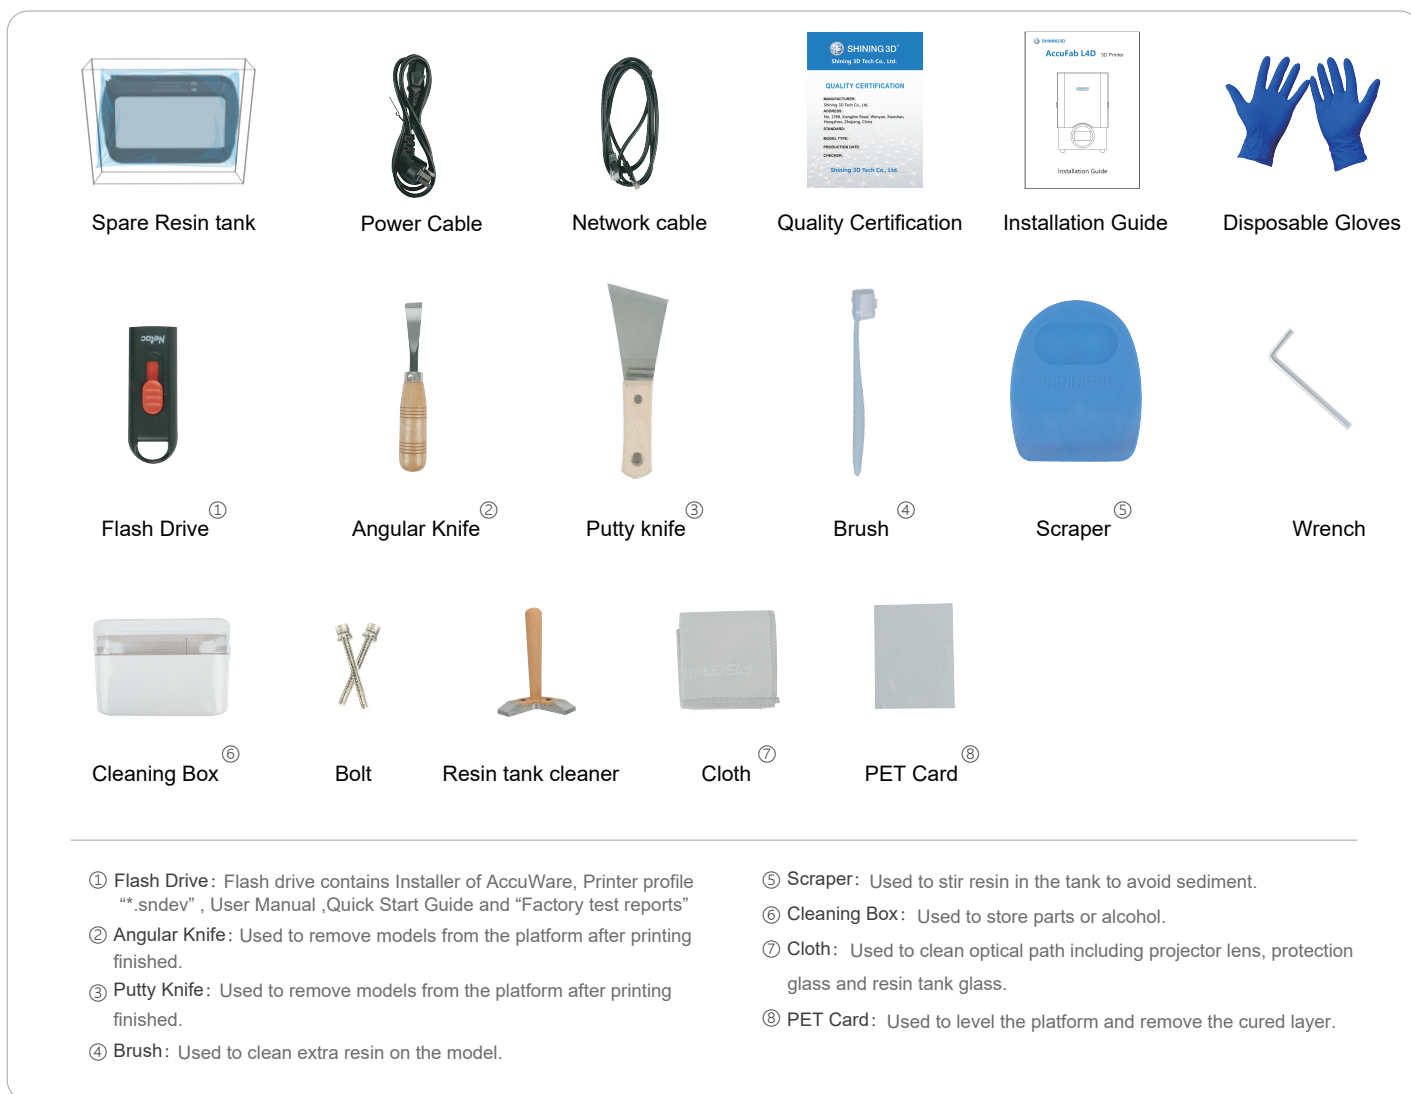

First Print

Please refer to the "AccuFab-L4D Quick Start Guide" in the flash drive. The flash drive can be used for data transmission later on.
