

Wireless Charging Mount
User Guide

Model:TF-HL-97

Thank you for purchasing and using
this product!

Please read this Operation Instruction carefully and
keep it properly before using this product.

Product Specification

- Fast Wireless Charger
- Input: 5V≈2A /9V≈2A
 - Output: 5V≈1.0A /9V≈1.2A
 - Charging Efficiency: 70%

Applicable Devices

Compatible with all devices with Qi Standard
For all other mobiles without Qi Standard, those
will be working with wireless receivers.

⚠ The LED light turns red during wireless charging
to indicate a charging failure.

- The following situation can cause failures, like charging
slowly, stop charging, over-temperature for charging position
1. The adapter is not run up to standard (No PC USB
output power supply).
 2. The charging cable is not up to standard.
 3. The phone case is too thick (within 2mm thickness
phone case recommended).
 4. The built-in wireless charging receiver position is not
coincided with wireless charger coil position.
 5. There is metal/magnet on the back of cell phone or
phone case.
 6. Smartphone does not support wireless charging function.

⚠ Attention

1. Please keep the charger away from water or
other liquid.
2. If you need to clean the charger, please make sure it
is not connected to power supply.
3. Using Environment temperature remains -20~45℃.

compatible for different size of smartphone					
1-class gear position			2-class gear position		
size of phone ≤ 153mm			size of phone > 153mm		
Brand	Model	Length	Brand	Model	Length
Samsung	S7	142.4mm	Samsung	S8+	159.5mm

Drop-down Holder Structure Description

Wireless charging is made up of wireless charging
transmitter and wireless charging receiver (working
principle). Wireless charger you bought is transmitter,
receiver was built into smartphone. Wireless charging
works well when the transmitter coil position is
coincided with receiver coil position.

The receiver coil position is fixed for this product.
According to different size of smartphone , making
receiver coil position to coincide with transmitter's, we
design drop-down holder to adjust the appropriate
charging position to make wireless charge well.

Step to install air vent

1. Follow the arrows to install 3 parts.

2. Adjust the screw cap to the best active status.

3. Press the button of clip to fix, then adjust the
angle and tighten the fixed nut.

4. Installation completed

Step to Install Suction Cup

1. Follow the arrows to install 3 parts.

2. Adjust the screw cap to the best active status.

3. Adjust the angle of suction cup and
empty air.

4. Installation completed.

Step to Use wireless charger

1. Input: Connect the wireless charger and car
adapter with the charging cord.

Must use Qualcomm quick charging adaptor for fast
wireless charging.

- 2.Place smartphone.

Tesla coil Sensor-wireless charger

Working Principle- After Coil sensor detect smartphone, it generates
current signal, and then transmit signal to the motor to drive the clip
to close to tighten smartphone.

The both sides of clip open automatically after being powering,
putting on smartphone, clip close automatically to tighten
smartphone.

3. Take off smartphone.

Press the key, the clip open
automatically, take your phone out.

4. LED indicator light shows the working status:

- 1.White LED Light: Standby.
- 2.Blue LED Light: Charging normally.
- 3.Red LED Light: Charging abnormally.

FCC Requirement

Any changes or modifications not expressly approved by the party
responsible for compliance could void the user's authority to operate
the equipment.

This device complies with Part 15 of the FCC Rules.Operation is
subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including
interference that may cause undesired operation.

Note:This equipment has been tested and found to comply with the
limits for a Class B digital device, pursuant to Part 15 of the FCC
Rules.These limits are designed to provide reasonable protection
against harmful interference in a residential installation. This
equipment generates, uses, and can radiate radio frequency energy,
and if not installed and used in accordance with the instructions, may
cause harmful interference to radio communications. However, there
is no guarantee that interference will not occur in a particular
installation.If this equipment does cause harmful interference to radio
or television reception, which can be determined by turning the
equipment off and on, the user is encouraged to try to correct the
interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that
to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
