The All-in-One Home Energy Monitor

EcoFlow PowerInsight, a sleek 10-inch all-in-one home energy monitor to visualise your home energy data in real time and control smart home devices to boost your home energy efficiency.

- 10 inch

Touchscreen
- One glance

To get all energy data
- One tap

To control the entire home

Device control: a smarter way to run your smart home

Integrated in the EcoFlow Home Energy Ecosystem, the PowerInsight can connect with EcoFlow energy products, and other supported third-party devices, allowing homeowners to view and control their home energy easily.

Energy Stats, Clearly Defined

See real-time home energy data daily, monthly, and annually. Curious about your home's eco-friendliness? This is where you will get all the answers!

Solar power generation

Home energy consumption and sources

Battery charge and discharge

Why choose EcoFlow PowerInsight

	EcoFlow PowerInsight	Other energy apps
Larger screen	The 10-inch, interactive, dedicated home energy monitor offers a better user experience.	Based on smart phone.
More data	The built-in temperature sensor and humidity sensor allows users to view climate data at a glance.	Humidity data is not available. Temperature data based on third-party weather forecasts.
Indoor temperature monitoring	Adjust the thermostat more accurately based on indoor environment monitoring.	Only environmental temperature data is available based on third-party weather forecasts.
Matter supported	The independent gateway allows users to connect and control more smart devices.	Matter is not supported. Fewer third-party devices can be connected.

Control your home appliances, smartly

Turn off all the lights while you're away from home, or turn on the heater before you arrive home... These can be easily handled with just one tap!

Receive a storm warning 24 hours in advance. Get the battery pre-charged to the fullest to prepare for severe weather.

Temperature auto-adjustment keeps your home comfortable while saving energy

With a built-in indoor temperature sensor, the EcoFlow PowerInsight can adjust temperatures more appropriately by controlling your thermostat. By relentlessly managing the temperature, it reduces energy consumption and utility costs.

An energetic insight into your EV charging

Directly connects with EcoFlow's PowerPulse EV charger to provide real-time insights into your EV's solar energy usage, offering complete control and understanding of home energy dynamics.
