

VIDEOBAR VB1

Software Update Instructions

Please update your VB1 software to take advantage of any improvements.

- 1 Go to **BoseProfessional.com/VB1** and download and install the **Videobar Configuration** app (formerly Bose Work Configuration). (Chrome OS users, see the other side of this sheet.)

- 2 Connect the VB1 to a power outlet and your computer's USB port.

- 3 Open the app, and then click **Administration**.

- 4 Enter **Bose123!** as the password, and then click **Sign In**.

Sign In

- 5 Click **Configuration**.

- 6 Click **Install** to update the VB1 software. (If the button is disabled, the software is up to date.)

Install

Chrome OS users, please follow these steps:

1. Connect the VB1 to a network with DHCP that your computer can access while still web-browsing.
2. Determine the IP address of the VB1 using an IP scanner or other tool.
3. Enter the IP address of the VB1 into the web browser on your computer.
4. Enter **Bose123!** as the password, and then click **Sign In**.
5. Click **Configuration**.
6. Click **Install** to update the VB1 software. (If the button is disabled, the software is up to date.)
