

Thank you for your support of the product. We strive to provide high-quality products and excellent services. To ensure you can fully enjoy the superior performance of the product, please follow the instructions for normal operation.

Bladeless neck-hanging fan | Instruction Manual

This machine uses a lithium-ion battery, which has no memory effect and can be charged at any time without waiting for the battery to run out. It keeps the battery charged at all times, which is beneficial for extending the battery life. When the fan is in operation, the fan blades will rotate at high speed. It is strictly forbidden to insert foreign objects into the fan, otherwise the fan blades may be damaged. 3. If the fan is not to be used for a long time, please store it in a dry and cool place. 4. Please note that the product should not be placed in an environment with a temperature above 60 degrees Celsius, or the battery should not be disassembled privately to avoid a significant reduction in battery life. There is even a risk of leakage, short circuit, fire or explosion of the battery. 5. Due to product upgrades and updates, there may be slight inconsistencies between the content of this document and the actual product. Therefore, this document is only for rough reference. Please refer to the actual product. 6. Children under 10 years old must be supervised by adults. Batteries with damaged outer skins must not be used! It will cause an explosion! Our company will not be held responsible for any consequences arising therefrom!

Usage method: 1. Put it around your neck from the back for carrying

2. Press the switch once/to turn off the device. \ n3. Press each time to change the wind speed. There are three levels of wind speed: high, medium and low. 4: The blue light remains on during operation and flashes when the battery is low. \ n5: The light flashes when charging and remains on when fully charged.

Iv. Product Features

This product has a unique structure and a novel style.

2. It adopts brushless motor fans, which have strong wind force and long service life.
3. Intelligent control, complete functions and operation, stable performance
4. It adopts 18650 batteries with universal applicability and can be recharged in a cycle
5. Integrated design, simple appearance, sturdy and portable;
