

This section describes how to bind smart speakers

Set your Echo speaker by Alexa APP

1. If you have finished to install “Smart Life” then open Amazon Alexa App: sign in your Alexa account and enter password.
2. Click the menu on the left corner-click “Settings: choose “Set up a new device”(choose a device ,like Echo)Note:When the below page appears, long press the small dot on your Echo device until the light turns to yellow. Then Click Continue on App

Note: at this moment, the mobile phone cannot open a variety of VPN software.

Choose your own WiFi and wait for a few minutes. After an introduction video, click next step, it will enter Home page automatically. Now the Echo had connected to Wi-Fi successfully.

Enable Smart Life Skill in Alexa

Step 1: Choose “Skill” in the option bar, and then search “SMART Life” in the input box.

Step 2: Select Smart Life in the search results, and then click “Enable Skill”.

Step 3: Then input the user name and password of Smart Life APP that you had previously registered.

Control the device by voice

After the above operation is successful, you can control the device via Echo.

1:Discover Device

Firstly , you need to say to the Echo:

Echo (or Alexa), discover my devices.

Echo will start to find the device which is added in the Smart Life APP.

It will take about 20 seconds, then Echo will tell you the result. You can also click "Discover devices" in Alexa APP , then it will show the devices that have been found successfully .

2: Control Device by Voice

Note: The name of the device must be consistent with the addition of Smart Life APP.

You can also group the device and give instructions to control them together.

Note: Echo is one of the wake –up names, which can be any of the three names (Settings) Alexa, Echo, Amazon.

3: Support Skill List

You can control the devices by instructions like these:

Alexa(or Echo, turn on the Devices

Alexa(or Echo),turn off the Devices.

Google Assistant –Activate Smart Life in Google

Preparation
