

Quick Start Guide

Kidde Wire-Free Alarm Network Setup

Please Read All Instructions First!

2556-7203-02 Rev A

Section 1

Quick Start Wire-Free Network Setup

Section 2

Adding a Device to an Existing Network

Section 3

Resetting a Device

USE ACTIVATION TOOL
OR SCREWDRIVER

1

Power Up All Devices

**Locate the red wheel on the back of the device.
Turn the red wheel to the “ON” position
on ALL devices using the included tool, or a
standard screwdriver.**

Once powered, the light rings
will glow red.

Coordinator

"Searching for other devices."

**Hold for
5 seconds**

**DON'T press buttons
on other devices**

2

Pick One Device

Press & hold the button on only ONE device until you hear 2 beeps. Release button. You will hear "Searching for other devices." This device will be the "Coordinator" of the network. Keep this unit separated from others.

The light will pulse green and device will sound a continuous "sonar" ping until step 4 is completed.

3

Relax and Wait

Wait until all devices have connected to network.

Once connected, each device will speak:

"Success now connected!"

The non-Coordinator devices are called "RFDs."

Once connected, the lights will
glow green.

**Hold for
5 seconds**

4

Pick One Device

**Press & hold the button on only ONE device
until you hear 2 beeps. Release button.
“Sonar” ping will stop.**

Device will announce that setup is
complete and the number of
connected devices.

Coordinator

5

Setup Complete!

If all devices flash green and the “sonar” ping has stopped, the devices are now connected. Congratulations!

For best results, install the Coordinator unit in a central location of the home. Refer to user guide for detailed installation instructions.

Section 2

**Adding a Device
to an Existing Network**

SMOKE ALARM: 3 long beeps, repeating
CO ALARM: 4 quick beeps, repeating
STANDBY: Green LED blink every 60s
FAULT: Amber LED blink every 60s
LOW BATTERY: Amber LED blink every 60s
END OF UNIT LIFE: Amber LED blink every 60s
Press button to test weekly.
Guide for more information

1

Power Up New Device

Locate the red wheel on the back of the device being added to the network. Using the activation tool or a standard screwdriver, turn the red wheel to the "on" position.

Once powered, the light ring will glow red.

"Searching for other devices."

Installed Device

Device Being Added

2

Pick One Installed Device

Press & hold the button on only ONE INSTALLED device on your network until you hear 2 beeps. Release button. You will hear "Searching for other devices."

The light will pulse green and device will sound a continuous "sonar" ping until step 4 is completed.

"Success, now connected!"

3

Relax and Wait

Wait until the new device has connected to the network. Once connected, the new device will speak: "Success now connected!"

Once connected, the light ring will glow green.

***"Setup
complete!"***

Installed Device

Added Device

4

Pick the **Installed** Device

Press & hold the button on the INSTALLED device for 5 SECONDS until you hear 2 beeps. Release button. "Sonar" ping will stop.
