

UNIVERSAL COOLING SYSTEM TEST ADAPTER KIT

FEATURES

- Universal design will fit most automotive radiators and expansion tanks
- Pressure test using the hand pump from the 27 piece master radiator pressure test kit or the 14 piece universal cooling system pressure test kit.
- Vacuum test using the vacuum system filler kit from the 27 piece master radiator pressure test kit or the 14 piece universal cooling system pressure test kit.
- Ultimate coverage provided by 3 rubber ring gaskets included in the kit
- Secure fit using the simple twist style design

SPECIFICATIONS

- | | |
|-------------|-----------------------------|
| 1. 41018A | Radiator Adapter |
| 2. 43012-2F | Sealing Collar with Fitting |
| 3. 43012-35 | OD35 x ID30 Rubber Ring |
| 4. 43012-39 | OD39 x ID30 Rubber Ring |
| 5. 43012-44 | OD44 x ID30 Rubber Ring |

CAUTION

- Always read instructions carefully before using the tool
- Always wear eye protection that meets OSHA and ANSI Z87.1 standards
- Always wear gloves when working with the tool

INSTRUCTIONS

1. Drain the coolant from the radiator
2. Select a suitable sized rubber bushing and fit it to the lower part of the radiator adapter. Insert the adapter into the radiator or expansion tank filler neck. Turn the sealing collar to make a seal between the tools and the radiator or expansion tank filler neck.
3. Check the cooling system pressure of the vehicle.
4. Using the instructions from the 27 piece master radiator pressure test kit or the 14 piece universal cooling system pressure test kit, pressurize the cooling system and check for leaks.
