Nicotine safety

ADDICTIVENESS AND TOXICITY
This product contains Nicotine which is a highly addictive substance and is thus not recommended for use by non-smokers. No other ingredient of this product is known to be addictive. This product contains Nicotine which may produce toxic effects if consumed orally, especially in infants and children. Please DO NOT drink e-liquid. In case it is consumed, please take your e-liquid bottle with you and see a general practitioner immediately. In case of contact with skin, rinse immediately with cold running water for at least 15 minutes.

REPORTING ADVERSE EFFECTS
If you experience any side effects as a result of using this product, please help us by informing us about it so that we can continue to improve the safety of our products. Visit: <https://dotmod.com/pages/health-safety> to fill out our Safety concerns form.

Alternately, you can also report your symptoms directly to MHRA using the Yellow Card Portal available at <https://yellowcard.mhra.gov.uk/yellow-cards/tobacoreportmediator/> 88 Wood St. London, EC2V 7RS United Kingdom

PROPOSITION 65 WARNING: This product can expose you to chemicals including Nicotine, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov

Capacitor Safety

WARNING:
Super capacitor's are volatile and may explode or burn if charged, used, transported, stored, or disposed of improperly. See user manual for important precautions and warnings. Capacitors may be used to store large amounts of energy. device should not be opened to prevent possibility of electrocution, no serviceable components.

If you witness the capacitor starting to balloon, swell, smoke, or become very hot: immediatly discontinue use, turn off the device, place it on a non-flamable surface in a well ventilated area away from people and pets.

Always have a fire extinguiser handy in the event of a fire

Do not throw capacitors into a fire. Please recycle or dispose of according to local law.

Keep capacitors away from children and pets. Should a child/pet swallow or chew on a capacitor, immediately consult a physician and/or call your local poison control center.

Faliure to follow warnings may result in electric shock, fire, burns, property damage, or bodily injury.

Installing and replacing the coil

- 1 Remove the tank section from the device.
- 2 Turn the tank upside down and pull the coil out of the tank section by holding the coil firmly.
- 3 Insert the new coil and press it securely into the tank.
- 4 Align the tank with the body recess, and put the tank back in place.

Filling the tank

Remove the tank from the unit, locate the fill port and turn it upside down. Using the unicorn bottle, press the tip of the bottle into the fill port. Once filled, put the tank back on the device.

Battery status and indicator lights

Green ●	61% - 100% charge (3.85V - 4.20V)
Blue ●	21% - 60% charge (3.55V - 3.85V)
Red ●	1% - 20% charge (3.30V - 3.55V)

Red lights

- Shutdown
Press the button five times within two seconds to shut down. The red light flashes three times quickly.
- Before and during use, the red light will flash eight times when the power is too low.

White lights

- Atomizer not detected
- Power on: White light turns from dim to bright within 2 seconds. The brightest light stays on for 0.5 seconds, then goes out.

Green lights

- When the battery is full, the green light will be solid. The light will turn off after 30S of constant light time.

Power Adjustment: In the power-on state, press button three times to switch the power level. The default power level is green.

Cyan lights

- Timeout: Device times out after ten seconds. Cyan light flashes rapidly three times.

Changing the power levels

Press the fire button three times to enter power selection mode

	0.3 - 0.5Ω	0.7 Ω	1Ω
Red light	25W	16W	12W
Blue light	30W	18W	14W
Green light	35W	20W	16W
1.20-2.2Ω	BYPASS		

<0.28Ω/ >2.2Ω
Not within the operational resistance range

Protection Status

- 1. Short-circuit protection:**
The output is not available, two white lights flash twice when the fire button is pressed.
- 2. Open circuit protection:**
The output is not available, and when the fire button is pressed, two white lights flash three times quickly when the fire button is pressed.
- 3. Resistance protection:**
The load resistance is not between the selected values. If the load resistance value is not between the selected resistance value, it cannot output. When pressing the fire button, the two white lights will flash four times.

Protection Status

4. PCB board over temperature protection:
PCB board temperature exceeds +75*c, unable to output. Two red lights will quickly flash five times.

5. Battery protection:
Overcharge protection, overdischarge protection, overcurrent protection, short circuit protection.

Operation instructions

- 1.Power on:**
Click the fire button five times in quick succession. The light indicator will blink for two seconds to indicate confirmation.
- 2.Power off:**
Click the fire button five times in quick succession. The light indicator will flash red three times to indicate confirmation.
- 3.Adjusting power output:**
See the chart in "Power Level Selection".
** Bypass mode is not compatible with plug-in coil tanks.
- 4. Pulsing frequency of the light:**
When charging the light pulses are related to the charging power, when entering the fast charging mode, the pulsing frequency of the light is about 1S once, when it is not fast charging, the pulsing frequency of the light is about 2S once.
- 5. Atomizer detection:**
When the atomizer is plugged in or removed, Dotstick V2's white light will pulse once.
