

iTrans DB-22W

Dante 2CH Bluetooth Adapter

Bluetooth 5.0

interface

PoE

Support

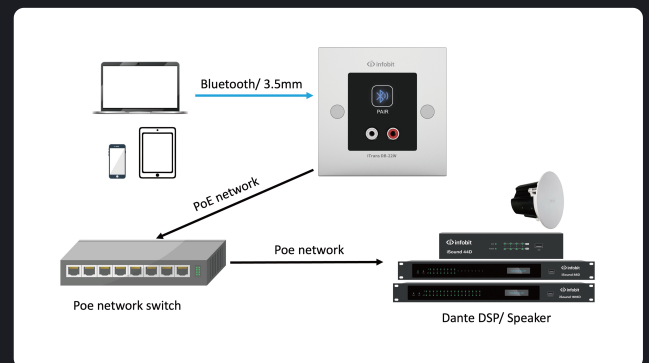

audio media

- Supports converting Bluetooth or 2-channel RCA stereo audio into Dante digital signal.
- Powered by PoE and installed in a standard 86 box.
- Connect to mobile phones, iPads, and other devices through the Bluetooth interface
- The main applicable scenarios include conference calls, audio media transmission, etc.
- Support Bluetooth 5.0.
- Support Dante and AES67.
- Note: The Bluetooth and RCA don't work simultaneously, the Bluetooth connection is a priority.

The iTrans DB-22W is perfect for simple BYOD, or you could use the call bridging feature for conference calls utilizing the existing audio equipment in the room.

Featuring bi-directional Bluetooth audio, the interface allows you to transmit two channels of Bluetooth or RCA audio onto the Dante network. The pairing is as simple as pressing a button on the front panel, and you can give the unit any friendly name you like.
