

Remote Reset Module and Remote Reset Station (for use with System 3)

The Model RR-35 Remote Reset module from Siemens Industry, Inc. allows a System 3 alarm condition to be reset to Standby from a remote location. (An alarm condition can also be reset by using the CP-35 Control Panel RESET switch.)

The Model RRS Remote Reset station includes a labeled single gang plate and a normally closed, key operated, spring return reset switch.

Follow the Connection Diagram (Figure 1) and Figure 2 to install and wire the RR-35/RRS into a System 3 configuration.
