Product Description
This new designed glass panel wireless touch smart curtain switch is designed with many new updates.The WiFi+RF version easily replaces traditional switches with a variety of ways to control.Backlight on/off and relay status when power off is designed as a new feature to control with other smart switches in one APP.Its scratch resistance glass panel is suitable for different decoration styles with its best value.
Note: Button sound on and off: no button operations before operations begin within 6 seconds.Then press switch button for 4 times and long press for the fourth time until the switch beep sounds as Di–Di for 2 times for successful operation.

Safety Information
Risk of Electric Shock: Electricity can cause personal injury and property damage if handled improperly. If you are not sure about any part of these instructions, please seek professsional assistance from a qualified electrician.

Technical Parameters:
Model: WS–USR–2C / WS–EUR–2C
Working Voltage: 90–250V AC, 50/60Hz
Max. Current: 2.5A/Gang; Total 2.5A Per Motor
Load Power: ≤600W Per Motor
Standby Power: ≤0.5W
Wireless Protocol: Wi–Fi 2.4GHz IEEE 802.11 b/g/n
Standby Consumption: 0.1mA
Wireless Range: 30 Meters(Indoor)

Turn off the power at the circuit breaker and test that power is off before wiring.

Installation

Note:
• Make sure that the power at the circuit breaker is off before wiring.
• Neutral Wire is required.Confirm the wall box contains a Neutral Wire(typically white).If the wall box don't have a Neutral Wire,please try another location at your home or call a professional electrician to install the switch.
• The wire colors indicated in this manual are the usual colors and may differ in some houses.
• Ensure the wire conductors are securely fastened to each wire.
• Ensure the Wi–Fi signal is steady and normally working before wiring.
• If you don't have any wiring experience,please call a professional electrician.

Step 1
• Turn off the circuit breaker and use the electrical tester to test the power.
• Ensure the circuit breaker is off before wiring.

ON — OFF

⚠ **Attention:**
Please disconnect the power supply before installing or removing the device for avoiding irreversible damage on the device from the electric current or some unpredictable problems such as lamp flashing.

Step 2
• Remove the old switch

Step 3
• Remove the switch and pull it away from the wall. Identify Line/Load Wire(Note:The color of your wire may be different from the color shown on the manual.)

⚠ **Verify power is off**
• We recommend you remove the faceplate from the old switch and use an electrical tester to test all wires connected to the switch to ensure there is no voltage in the circuit.
• You may need to turn off more than one circuit breaker.

Step 4
• Take pictures of the wiring
• Follow the wiring diagram to connect the switch wires to the wires in the wall box with the wire conductors.

Enter Smart Life Skill in Alexa APP
1. Complete product networking configuration in the App
Complete the device's networking configuration according to the prompts in the App.
Note: In the App, change the name of the device to an easily identifiable name such as Alexa; names are usually in English, such as "bed light".

2. Configure the Amazon Echo device
(If you have already configured Amazon Echo, you can skip this step. The following instructions are based on the iOS client.)
•Make sure you Amazon Echo device is powered on and connected to a Wi–Fi network.
•Open the Alexa App on your phone. After successful login, tap on the menu in the upper left corner of the Home page, select "Settings" and tap "Set Up A New Device" to set up the Amazon Echo.
•Choose your Amazon Echo device type and language for connecting. Press and hold the small dot on the device until the light turns yellow. Then tap "Continue" to connect to the hotspot.
•After connecting to the Amazon Echo hotspot, return to the page. At this point, the connection is successful.
