

MAINTENANCE & USE

Firstly, thank you for purchasing an AORIN® product.
Before using this product, please check your product and read the following information carefully.
If you have any questions about these instructions or have any problems with the product,
you are welcome to contact us to answer your questions.
You can find us by contacting the seller through the Amazon platform
or sending an email oglxh1925@vip.163.com and we will try to get back to you
within 24 hours, thank you for your purchase and support.

CAUTIONS

- Before first use (after cleaning) and after each use, please dry the water stains inside and store the product in a ventilated and cool place.
- Since this product uses a sealed zip supplemented by a thick sponge for efficient insulation, the silicone protection on the outer layer of the zip may cause the zip to be less easy to pull closed. If this happens, please lubricate the zip with the silicone zip conditioner included in the package.
- Please do not place this product near a heat source, this may cause damage to its waterproof surface tpu layer and affect its effectiveness.
- Do not use abrasive cleaners or washing-up liquids as they may damage the protective TPU layer inside the outdoor bag, thus destroying its waterproof insulation properties.

INSTRUCTIONS FOR USE

As our coolers are finished being made, they are transported over long distances before reaching you. We recommend that you leave it open and ventilated for a few hours first, as this will help the TPU lining to evaporate the smell.

Three ways of carrying:

This product features two top carry straps, reinforced handles on both sides and a removable slanting padded shoulder strap that can be matched to single to multi-person transport, so you can change it to suit your scenario or needs.

Portable bottle opener:

On the right side of the cooler, under the carry handle, we have installed a removable beer bottle opener for easy access and portability, just in case you need it, so you can enjoy a cold drink anywhere, at any moment.

Storage space:

In addition to the storage space inside the cooler, we have designed the exterior with cloth pockets, mesh pockets and many D-rings for you to place/access other small items that do not require refrigeration. Increased storage space.

Wide zipped opening:

We have set the cooler bag to close with a wide zip opening so that you can place or access your food and drinks very easily and you can organise the storage space inside very well to display everything in full view.

CLEANING INSTRUCTIONS

To maintain a good service life, you need to clean the inside and outside with water and wipe clean with a cloth after each use.

If carbonic acid, salt water, oil, etc. is accidentally spilt or poured inside, you can wipe it with a cloth soaked in warm soapy water, rinse with water and let it dry. As the product has a smooth TPU surface inside and out, there is no need to use brushes, wire loops or other cleaning tools to clean it, as this may cause damage to the surface skin.

AFTER-SALE INSTRUCTIONS

The raw materials used in our AORIN® products are all BPA-free, food-grade and safe, health-friendly and durable.

If you have any questions or suggestions about this or other AORIN® products, please send an email to oglxh1925@vip.163.com and we will actively help you to resolve them and provide feedback on your suggestions.
