## 2.Assembly - Hanging the Fan (continued)

Making the electrical connections

**WARNING** : To avoid possible electrical shock , turn the electricity off at the main fuse box before wiring . If you feel you do not have enough electrical wiring knowledge or experience , contact a licensed electrician.

**WARNING** : Check to see that all connections are tight including ground , and that no bare wire is visible at the connect Terminal blocks , except for the ground wire,

**CAUTION** : Do not use with a wall light dimmer switch.

**NOTE** : The fan must be installed at a maximum distance of 20 ft from the remote control for proper signal transmission between the remote control and the fan's receiving unit.

Motor to receiver electrical connections

1 . Connect the fan wire with receiver wire by connect terminal.

2 . Connect the lamp line with receiver wire by connect terminal Receiver to house supply wires electrical connections.

3 . Connect the receiver white wire marked " AC in N " to the household white wire ( neutral ) using a wire terminal block.

4 . Connect the receiver  Black wire marked " AC in L " to the household Black wire ( hot ) using a wire terminal block.

5 . Connect the fan wire an the ground wire on the hanger through the terminal block.

6 . Use the terminal block to connect the ground wire on the mounting bracket and the receiver to the household ground wire.
