# SAFETY & WARNINGS

- Read all instructions before using the appliance and retain for reference.
- This monitor is designed with ventilation holes on the back of the casing. Do not cover or block them.
- Do not insert any object or spray any liquid into the vents.
- Avoid placing the monitor near heaters, stoves, fireplaces or other sources of heat, as well as in rooms lacking adequate ventilation.
- Do not position the monitor in unsafe locations. If the monitor falls, it may be damaged and may injure nearby people.
- Unplug the monitor if it is not going to be used for an extended period.
- Do not place heavy objects on the monitor, its power cord or any connected cable.
- Do not open the back panel of the monitor, as it contains a high-voltage current even when not plugged in.

Monitor Ports

3	Power input (DC 12V)
4	Audio In
5	VGA connector
6	HDMI connector

# ASSEMBLY

## Assembling with stand

**WARNING:** Panel is fragile. Keep the foam underneath the monitor while assembling the stand.

1. Carefully remove the monitor from the packaging with foam attached and place it face down on a soft cloth spread across a stable surface such as a table.

2. Attach the stand base to the stand connector using the M4 screw provided.

3. Insert the top of the stand connector into the rear of the monitor and push down until firmly connected.

4. Lift monitor up straight and remove the bottom foam. Stand the monitor up on the installed base.

Assembling with VESA Mount

VESA mounting pattern 75 x 75mm, screw size M4.  
**Note:** VESA mount or mounting accessories are not included.

Open the box, take out the monitor with protection form attached and gently place it on a desktop or table. Ensure all components are removed from the foam covering. Press the release button to remove the stand plate.

If the monitor is already attached to the stand, remove the stand before proceeding with VESA mount assembly.

Instructions for attaching to the specific wall mount will be included with the mount.

# CONNECTIVITY

## Power Cable

Connect the included power cable to the monitor power port and then connect the other end to a power outlet.

## Audio In

Connect an audio cable to the 3.5mm audio port on the monitor (Audio In) and the 3.5mm audio port on your computer.

**HDMI**

Connect an HDMI cable from the computer's display output to the monitor's display input.

**VGA**

Connect a VGA cable from the computer's display output to the monitor's display input.

# OPERATION

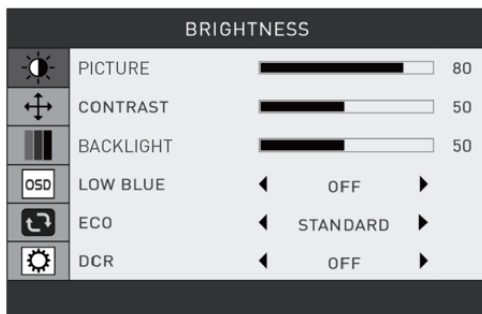

1. Connect the monitor to your input device via HDMI or VGA.
2. Connect the power cable to your monitor and then connect the other end directly to a power socket.
3. Use the power button to turn the monitor on.

## FreeSync

- The feature is disabled by default when setting a 75Hz refresh rate.
- In order to use this feature, ensure your hardware has FreeSync capability and the graphics drivers are fully up to.
- After connecting, you may receive a prompt to enable the feature on your computer. If you do not receive the prompt, you may need to enable the function in your graphics card menu.
- See your graphics card manufacturer's documentation for instructions on how to turn on and/or enable FreeSync.

The On-Screen Display (OSD) Menu may be used to adjust your monitor's settings and appears on the screen after turning on the monitor and pressing the  button.

When using the monitor for the first time, it will configure optimal settings automatically.

1. Press  right button to open the navigation window.
2. Press up and down ( / ) buttons to browse functions. With the desired function highlighted, press  right button to enter the sub-menu. Press up and down ( / ) buttons to browse sub-menus, then press  button to highlight the desired function. Press up and down ( / ) buttons to highlight an option, then press  button to confirm the settings and exit the current screen.
3. Press  left button to exit the current screen.
