Supergrip

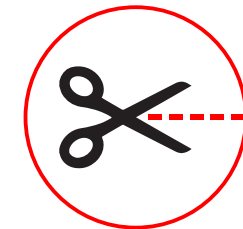

Anti-Slip

Sweat Absorption

Ultra-thin

Precision Pre-Cut

Revolutionary Material Crafted in Japan

Developed and crafted in the heart of Japan, this revolutionary material is designed for the most demanding professional athletes who require nothing but the best. Imagine a grip tape that not only offers unmatched control, but also has the power to absorb sweat from your hand, enhancing your grip performance to new heights. The gauze bandage is transformed into a thin, durable sheet through a proprietary process involving special liquid rubber, creating a product that is both strong and flexible.

The supergrip is then laminated with a residue-free 3M adhesive, ensuring a perfect fit on your mouse with no residue left behind. Precision cutting techniques are used to ensure that each piece fits like a glove, giving you the confidence and control you need to achieve greatness.
