Cloning Remote Control Manual

Please pay special attention:

 The original remote control may be used normally and Frequency is 433Mhz

 Rolling code remotes maybe will NOT work (Typically a successful match will only work once, explained on the link or video）

Place the two remotes next to each other with ZERO

distance between them

Pairings need to be repeated several times until

successful in case of interference.

Pls clear the testing code before copy.

Please press and hold the first and second buttons of the remote control (Step 1) at the same time until the indicator light flashes quickly 3 times, then release the second button of the remote control (Step 2), and click the second button 3 times (note that Do not release the first key during this process).

step 1

step 2

🔵 Blue: long press
🔴 Red: three consecutive clicks

Copy method

First press and hold the button of the duplicate remote control, e.g. button A, then press and hold the corresponding button of the original remote control (as shown in the Step3 blue circle in the figure)until the indicator blinks and lights up.

Recovery Mode

If you accidentally erase the code of the copy remote control, you can restore the code by this method, while pressing and holding the bottom two buttons of the remote control, such as C and D.(as shown in the Step4) The recovery is successful until the indicator light flashes 3 times.

Note: Press the duplicate remote control first, then press the original remote control

- 🔵 Blue: long press
- 🔴 Red: three consecutive clicks

step 3

step 4
