

IX | IXG SERIES APPLICATION NOTE

Qumulex® QxControl™ Integration

Introduction

IX and IXG Series video door stations can use ONVIF® to stream video to Qumulex's® QxControl™ service. This guide covers the integration, including what needs to be configured in IX or IXG Support Tool and what needs to be configured in QxControl. This integration requires a physical Qumulex gateway, either as the endpoint or to connect with Qumulex's cloud service.

These instructions assume that the appropriate Support Tool has been installed and basic programming is complete. If that is not the case, refer to these resources:

IX Suport Tool: https://www.aiphone.com/IX-SupportTool

IX QuickStart Guide: https://www.aiphone.com/IX-Series-QuickStartProgrammingGuide

IXG Support Tool: https://www.aiphone.com/IXG-SupportTool

IXG QuickStart Guide: https://www.aiphone.com/IXG-Series-QuickStartGuide

Support Tool Navigation

There are two main sections in IX or IXG Support Tool: the top menu and the left menu. These menus will have a main directory, followed by a subdirectory. **The tools will generally match each other; any differences will be noted.**

Instructions pointing to the top menu will be in the format of *Italics*, <u>Underlined</u>. Example: *Connection(S)*, <u>Upload Settings</u>. Instructions pointing to the left menu will be in the format **Bold**, Underlined. Example: **Call Settings**, Incoming Call.

Buttons or settings that need to be clicked will be marked with an orange pointer. If multiple items need to be clicked in the same screenshot, they will be marked with numbers to show the proper order. Important items will be marked with an orange box.

There is a **Save** button in the top left of IXG Support Tool, which is labeled **Update** in IX Support Tool, or some international editions of IXG Support Tool. Clicking this saves the settings locally, but these are not pushed to the stations until they are uploaded.

Support Tool Instructions

In IXG Support Tool, navigate to **Station Information**, <u>ID and Password</u>. For each station that will stream video to QXControl, set credentials under **ONVIF ID**, **ONVIF Password**, **RTSP ID**, and **RTSP Password**. These can be whatever is appropriate for the site. Once everything is filled out, click **Save** or **Update**. Make note of the credentials for later.

Building No	Unit Number	Station Name	Sation Information									
			ID+Pessword									
			ID(Administrator)	Password(Admin, User ID	User Password	ONVELID	ONVIL Password	RISPID	RESPERMENT			
01	100	Lotrance Station1	sample	••••		aiphone		aphone				
01	200	Guard Station I	sample									
01	300	Master Station 1	sample	••••								
01	301	Master Station I	sample									
01	400	Video Door Station1	sample	••••		aphone		aphone				

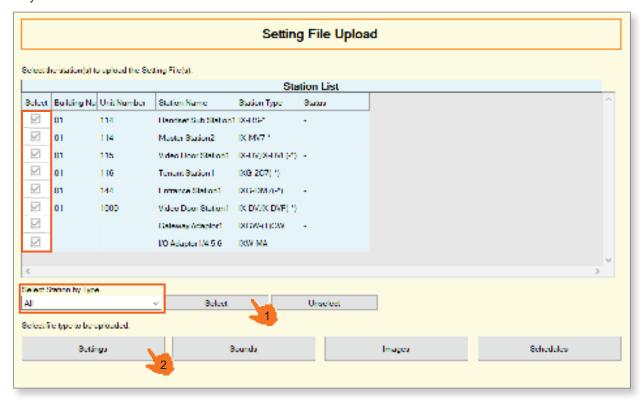

Support Tool Instructions (continued)

Navigate to Network Settings, IP Address. Make note of the IP addresses for each station to be integrated.

Unit Number	Station Name			Styne (DHCF)	P44Address								
		Hostname	IP Version		Il*Address				Subnet Mask				
					1	2	3	4	1	2	3	4	
100	Lotrance Station1		IPM.	Shino	192	1691	1	10	255	255	255	0	
200	Guard Station I		IP44	Static .	192	168	- 1	11	255	255	255	0	
300	Master Station 1		IPM.	Sheho	192	1693	1	12	255	255	255	0	
301	Master Station I		P4	Static .	192	168	- 1	17	255	255	255	0	
400	Video Door Station1		IPM.	Shino	192	160	1	131	255	255	255	0	

To upload the settings, navigate to *Connection(S)*, <u>Upload Settings</u> in IXG Support Tool, or *File(F)*, <u>Upload Settings to Station</u> in IX Support Tool. Click <u>Select</u> with **Select Station by Type** set to **All**, and then click <u>Settings</u>. The upload process will begin. This may take several minutes.

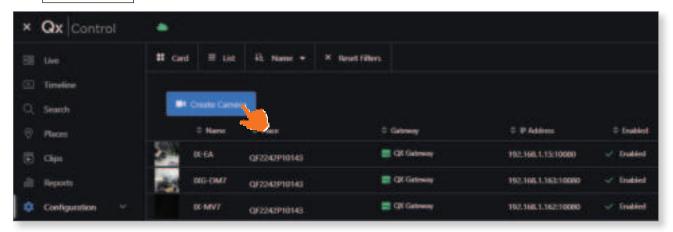

QxControl™ Instructions

Navigate to https://www.qumulex.com and log in with the account credentials for the site. Navigate to Configuration, Cameras on the left menu.

Click Create Camera

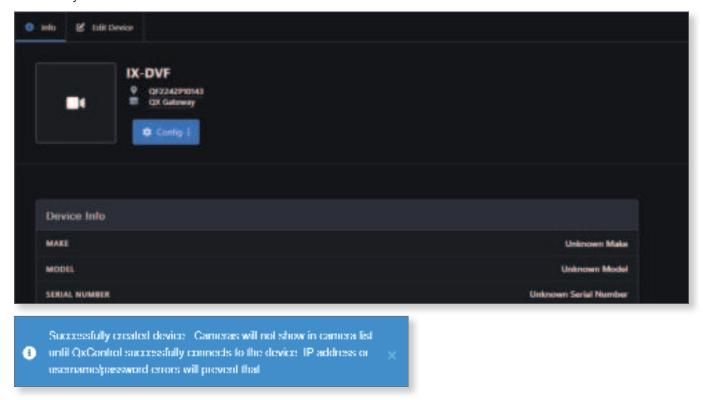

Enter a **Camera Name**, which should match the name in Support Tool for simplicity. Select the Qumulex **Gateway** being used from the drop-down menu. Enter the **IP Address** of the station. Change the **Port** to 10080, and leave **TLS** set to off. Enter the ONVIF ID and password created in Support Tool under **Username** and **Password**. Once everything is filled out, click **Create Camera**.

QxControl™ Instructions (continued)

A status screen for the new camera will appear, then a pop-up will appear in the bottom right showing that the camera was added successfully.

The newly added camera will appear in the list under **Configuration**, <u>Cameras</u>. This will include a thumbnail showing the station's video feed and the station's status.
