30 Built-in Stitches

A good variety of stitches from everyday sewing to decorative stitches. This gives you flexibility and creativity with your sewing projects.

Built-in Needle Threader

Makes threading the needle a breeze. Simply pull down the needle threader, the hook goes through the eye of the needle, the thread is hooked and as the needle threader goes up, the thread is pulled through the eye of the needle.

LCD Screen

The 2-digit number display corresponds to the stitch selected. There are 3 different modes for each selected stitch, to the left of the 2-digit display from top to bottom are stitch number, stitch width and stitch length.

Drop Feed

When the accessory box is removed from the front of the machine, you have access to the drop feed lever. Also, with the accessory box removed you have a free arm which allows easier hemming of trouser legs, sleeves or sewing baby garments.

Function Buttons

Start/Stop button – the machine can operate without a foot control attached.

Reverse, Stitch lock-off and Needle up/down.

Speed control slider – used to control sewing speed when stitching with or without a foot control attached.
