Wireless Bluetooth handset

——BTP50

The wireless Bluetooth handset BTP50, free you from the limitations of wires. Within a distance of 10 meters from the phone, you can use the buttons on BTP50 to use rich functions such as answering, hands-free answering, and hanging up. It can also allow you to move freely and maintain stable calls within this range, greatly improving office flexibility.

Unique hands-free function of the BTP50 handset allows you to expand the pickup range, free your hands, and be effortless during conference calls.

The Bluetooth handset BTP50 supports 10% packet loss resistance, providing up to 30 hours of talk time and 100 hours of standby time, allowing you to enjoy high-definition audio quality anytime, anywhere without the limitations of wires.

In addition, BTP50 also supports playing sound to help you find its location, eliminating the hassle of loss and disappearance.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.
The device has been evaluated to meet general RF exposure requirement.
The device can be used in portable exposure condition without restriction.
