[VIVE XR Elite Software - 1.0.999.218 - Initial version](#)

Tips & Tricks:

Get the most out of your all-new device.

You can play games from [VIVEPORT](#) directly on VIVE XR Elite, as well as stream PC VR content from VIVEPORT or Steam with a VR-ready PC. It's super quick and easy to do. Just [install VIVE Streaming](#) on your PC, connect your VIVE XR Elite to the same network your PC is on (via USB-C to your PC, or over Wi-Fi 5, Wi-Fi 6, or Wi-Fi 6E), and open Steam on your PC. We recommend using 5 GHz or 6 GHz Wi-Fi for the best results. If you encounter challenges, please visit the [VIVE Streaming support page](#) for FAQs and troubleshooting guides.

You can also view your surroundings in full color with VIVE XR Elite's state-of-the-art passthrough camera. Switch between VR and passthrough modes by pressing the headset button twice or the VIVE button on the right controller twice.

Share what you're playing in VR with your family and friends. Cast your headset to an external display or phone screen. For details, see these guides for [casting from the headset to an external display](#) and [casting from the headset to your phone](#).

To learn more about VIVE XR Elite, check out our [support site](#) and the [VIVE Tutorials channel](#) on YouTube.

We love hearing your feedback about our products and experiences, so don't hesitate to reach out and let us know what you think! For more information, visit us on [our forums](#) or [support page](#).

You can provide feedback and discuss the update over in our [Forums](#).

Thanks,

[HTC VIVE](#)
