

Series 5, Integrated Dishwasher

Series 5 | Integrated

Panel Ready

Offering a superior wash performance, this Dishwasher is panel ready and designed to be integrated into your kitchen for a seamless look.

- Customize with your own front panel and handle to match your kitchen cabinetry
- Six wash programs to suit any load, from Delicate to Heavy
- Auto option senses the optimum wash cycle for your dishes

DIMENSIONS

Height	32 5/16 - 36 1/2 "
Width	23 3/4 "
Depth	22 3/4 "

FEATURES & BENEFITS

Sized To Suit
Install this fully integrated dishwasher to tall (American size) or short (Euro/ADA size) counter heights, ensuring minimal gaps. Customize with a front panel to match kitchen cabinetry.

A Quality Wash
This dishwasher offers six wash programs including Auto, which automatically senses the optimal wash cycle for your dishes. A three stage filtration system delivers a superior clean, while the rinse aid indicator reminds you to top up for squeaky-clean dishes.

Flexible Stacking
Flexible, adjustable storage lets you stack even large items with ease. This model features a removable cutlery tray, height adjustable middle rack, cup holders and wine glass supports.

Quiet And Reliable
Running at a very low decibel level, this dishwasher does its job without making a fuss. The combination of clever technology and simple mechanics offers greater reliability and superior wash performance.

Variable wash pressure technology	•	Heavy	•		
		Medium	•	All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region. Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
