Firmware\_Ver\_Up\_Manual\_ENG\_FTX-1\_2506-B.pdf

### **Important:**

Please read the FTX-1 series Firmware Upgrade Manual.

### **Implement improvements (06/27/25):**

- Added APRS message function
- Supports ATAS-120A Auto Tune (FTX-1 optima)
- Displays the selected HF ANT connector number at the top of the screen
- Improved APRS Beacon reception sensitivity
- Fixed issue with GPS coordinates not being displayed correctly
- Improved NB characteristics
- Fixed issue with VOL volume not being adjustable while CW MESSAGE or VOICE MEMORY screen is displayed
- Fixed issue with SUB side receiving sound being output during SPLIT operation
- Fixed issue with SETTING MENU not being backed up to SD card properly
- Other minor fixes

**Note:**

After installing the firmware completely, the FTX-1 must be reset:  
Refer to the FTX-1 series Operating Manual Page 79:

Or refer to the Firmware\_Ver\_Up\_Manual\_ENG\_FTX-1\_2506-B

**Reset the transceiver**

---

1. Turn the transceiver OFF.
2. While pressing the **[BACK]** and **[FINE/FAST]** keys simultaneously, then turn the transceiver **ON**.
  - The frequency display will return to "144.000.000" (SUB-side), "7.000.000" (MAIN-side).

This completes the firmware upgrading process.

If you already have the above firmware versions, it is not necessary to update the FTX-1 again.

We hope this new firmware will increase your enjoyment of your FTX-1. Thank you for choosing Yaesu radios. If you have any problems or questions, please contact Yaesu Amateur Tech Support [amateurtech@yaesu.com](mailto:amateurtech@yaesu.com).
