

# SOME BASIC NOTIONS

---

**1. Front LED 1:** connection status indicator

**2. Front LED 2:** contact detection status indicator

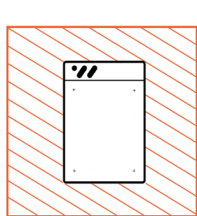

**3. Micro USB port**

**4. Shortcut buttons:** 5 buttons with a quick access to key features. Buttons configuration in Repaper Studio. [Learn more](#)

**5. Active drawing zone:** 148 mm x 210 mm (5.8" x 8.3")

# FIRST STEPS

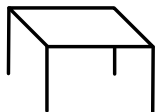

## 1. Prepare your workspace

For an optimal use, keep all metal objects more than 20 cm (7,9") away from Repaper xLite (speakers, computer, tablets, smartphones...).

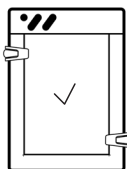

Use only one writing tool at a time.

Avoid placing your Repaper board on a metal table or one made with large metal parts.

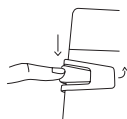

Front LED 2<sup>(2)</sup> flashes red when the magnetic environment is unstable.

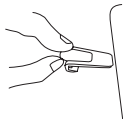

## 2. Attach your Repaper clips & paper

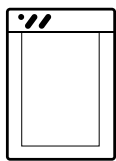

Slide the Repaper clips until you hear them click.

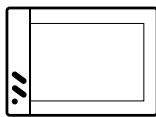

Push the clips' tab down and place a sheet of A5 paper (half letter size) on the active area<sup>(5)</sup> of your board.

Do not change the position of the sheet during use.  
To remove the clips: lift slightly the tab while pulling the clip off.

or

You can use your board in portrait or landscape orientation.

## 3. Properly slide Repaper Ring

Take your favorite pencil, slide Repaper Ring to about 3 - 4 cm (1,2"-1,6") from the tip. Adjust its positioning so that it is completely perpendicular to your drawing implement.

TIP : Learn [in this video](#) how to place Repaper Ring properly and verify its position in the Repaper Studio App.

Repaper Ring provided in this box is size S.  
It can be used on all writing tools with a diameter of up to 7.3 mm (0,3").  
For larger diameters, size M is available (sold separately).

# CONNECTION & UPDATE

---

## 1. Download & install Repaper Studio on your computer

Developed to work with the Repaper collection, the Repaper Studio application brings your creations to life.

**PC/Mac:** Download Repaper Studio [here](#)

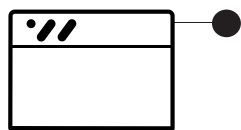

[Check your device compatibility](#)

## 2. Launch Repaper Studio

## 3. Connect Repaper xLite to Repaper Studio

Plug the micro USB cable between your computer and Repaper xLite. Repaper xLite connects automatically to Repaper Studio.

**Front LED 1<sup>(1)</sup>**  
Blue pulsing: Waiting for connection.  
Blue solid: Repaper xLite is connected and ready for use.

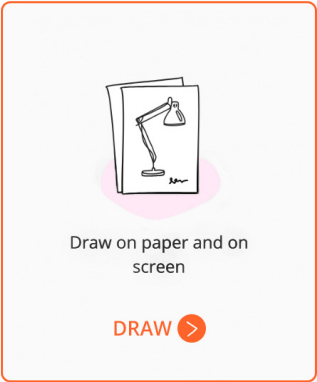

## 4. Update your Repaper xLite

For best performance it is important to use Repaper xLite’s latest version. If a message states that a new update is available, tap the update button.

# USER MODES

---

## 1. Draw & write in Repaper Studio

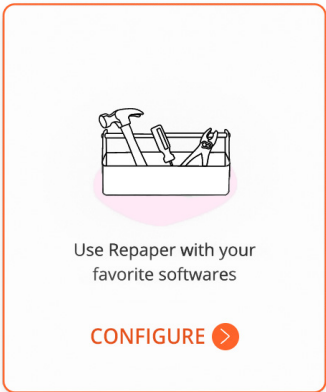

Connect Repaper xLite to Repaper Studio on your computer & click on DRAW.  
Use your favorite tools & see your creation come to life on screen.

Use the various functions in Repaper Studio: brushes, colors, layers...

## 2. Draw & write with third-party software programs

Connect Repaper xLite to the Repaper Studio App on your computer & launch your favorite software: drawing software, text & PDF editors, presentation programs...

Edit & enhance your creations with your software and Repaper Stylus.

Click on CONFIGURE in Repaper Studio to change the mode's settings. Handling of pressure levels depends on your software.
