

Each SX-panel is a 12V panel. Depending on the second, the "+" panel type connection is of type parallel or serial.

The difference is not visible to the user only visible on the label of the panel. Inside the cable outlet the two panels have different connections.

The panels: SX-12839+ and SX-12852+ have an internal parallel connection for 12V battery systems.

The panels: SX-22939+ and SX-22952+ have an internal serial connection for 24V battery systems.
