INSTALLATION

3

Install the horizontal beams to the door frame with M6x12 Screws and M6 Cage nuts first. Then install the vertical rail to the horizontal beams with M6x12 Screws and M6 Cage nuts.

Note: The distance between the front and rear vertical supports can be adjusted according to your equipment installation depth. 48 sets of M6x12 screws and cage nuts for 42U, 32 sets for 22U/32U.

M6x12 Cage Nut

4

Install the castors to the four corners at bottom by using M6x12 Self-tapping screws. Install the M12xL90 Levelling feet to each corner as well.

Note: You can install Levelling feet at STEP 1 if needed.

INSTALLATION *** Steps 5 through 6 are for S-BIN (Closed Cabinet) series models ONLY ***

5

Install side panels, adjust the diagonal dimension of cabinets.

Please note:

Because the cabinets are disassembled, after assembly, please check and adjust the diagonal dimension, ensure the space between doors are acceptable, doors could open and close well.

6

Install front door and rear door.

Place the door block on the hole of the bottom of frame, and set the front door/rear door. Fix the top of front/rear door by bolts and top of frame.

Install the grounded parts between the front and rear doors and the floor panel.

<GROUNDED PARTS>

- M6 hex nut * 1
- M6 flat washer * 2
- M6 spring washer * 1
- Earth connection * 1
