Efficiency

- In eco!efficiency mode, the machine operates at the most efficient temperature range (60 °C) – even at the maximum water flow.
- The burner cycles are optimised to reduce fuel consumption by 20% compared to full load operation.
- The stainless steel heating coil offers lasting protection against corrosion and prevents the formation of black water.

Maximum efficiency

- Highly efficient, tried-and-tested burner technology.
- 4-pole, slow-running electric motor guarantees a long working time.

Operational safety

- The large, integrated water fine filter provides reliable protection against small dirt particles for the high-pressure pump.
- The built-in exhaust gas thermostat deactivates the drive motor when the emission temperature exceeds 300°C.
- The Soft Damping System (SDS) compensates for vibrations and pressure peaks in the high-pressure system.
