• 2.Connect the device to antenna with 4 RF cables.

• 3.Press the buckle and moving with the direction as the arrow shown.

• 4.Using a cable connecting to the ETH port. Slide the cover back to the radio, with the cable passing through the hole.

## 4. Application

• PTMP

## 5.Web Management

• A) Boot Up Device

(1) Power on the device.

(2) Connect the PC to the PoE adapter using Ethernet cable

(3) Open a browser such as Chrome or Firefox and launch the login page with default IP 192.168.1.2, then type the password admin to enter the Management UI.

• B) Configure the Access Point

(1) Please finish LAN Settings, and then click Next.

(2) Wireless Settings: Choose Access Point Mode and create a new SSID (Network name) for your wireless network. And then select Encryption Mode and create a PSK Key to protect the device.

• C) Configure the Client

(1) Make sure the clients are powered on and repeat step A) (2) and (3).

(2) Please finish LAN Settings and make sure the subnet is the same as the Access Point, and then click Next.

(3) Verify your settings and click Finish to complete the configuration.

(3) Wireless Settings: Choose Client Mode and enter the same SSID and PSK Key and select the same Encryption Mode as Access Point.

(4) Verify your settings and click Finish to complete the configuration.
