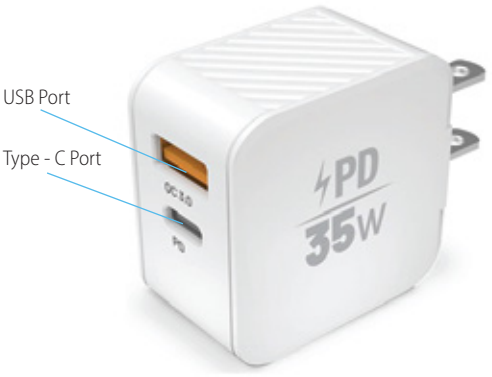
INTRODUTION

Charge your devices faster and more efficiently with the 35W PD ETL Approved Super Fast Charging Dual USB Home Charger. With Power Delivery (PD) technology, this compact charger provides rapid charging speeds, ensuring your devices are ready to go in no time. Equipped with two USB ports, it allows for simultaneous charging of multiple devices, such as your smartphone, tablet, and more, without compromising on speed. ETL-approved for safety, this charger is the ideal solution for home or office use, offering both convenience and peace of mind while powering your devices.

SPECS & FEATURES

- Dual High-Speed USB ports
- C Port + QC 3.0 USB Port
- 35 Watts PD
- Overload Protection
- Compatible with Tablets, phones,games and more

PRODUCT OVERVIEW



HOW TO USE

Plug the Charger into an Outlet
Insert the AC plug of the charger into a wall socket or power strip. Ensure the outlet is providing sufficient power (usually 100V–240V).

Connect Your Devices

For Smartphones/Tablets:
Use a compatible USB-C to USB-C or USB-A to USB-C charging cable (depending on your device). Plug the USB cable into one of the charger's USB ports.

For Other Devices:
If your device uses a USB-A cable, connect it to the USB-A port for charging. If using the USB-C port for fast charging, make sure your device supports Power Delivery (PD).

Charge Simultaneously:
If you need to charge two devices at once, plug them both into the USB-A and USB-C ports. The charger will deliver optimal charging speeds for each device (up to 20W for the PD-enabled device).

CARE AND SAFETY

Once your devices are fully charged, unplug them from the charger. Remove the charger from the wall outlet if not in use to conserve energy. Avoid using water or any harsh cleaning chemicals, which could damage the surface or electrical components
