

## 4 PORT USB POWER HUB FOR HOME

Quick Start Guide  
ONA14WI021

The ONN 4-Port USB Power Hub can charge up to 4 mobile devices (smartphones, tablets, PDAs, etc.) at the same time. Please note that the number of devices that can be charged and the length of time it takes for each device to fully charge depend on the amperage requirement of each device.

Use all 4 slots to simultaneously charge 4 smartphones or a combination of small devices (smartphone, PDA, MP3 player, camera, etc.) that would require a maximum total of 2.1 amps.

Or, using only the first and second slots, you can charge up to 2 tablets at the same time, or a tablet and a smaller device that requires less than 2.1 amps.

**NOTE: Device can provided up to 2.1A current; thus, all devices connected need to require 2.1A current or less.**

### FCC Part 15:

NOTE: This equipment has been tested and found to comply with the requirements for a Class B digital device under Part 15 of the Federal Communications Commission (FCC) rules. These requirements are intended to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Re-orient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Do not attempt to repair or modify this equipment.  
Warning: Changes or modifications to this equipment not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

"This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation."

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance of 20cm between the radiator and your body.

Specs:  
Input: 100V - 240V  
Output: 4 USB at  
5.0V / 2.1A
