

experience the human touch™

meet your personal masseuse

Beneath this luxurious leather are the “hands” of a trained massage professional – ready to provide you with a customized back, leg, and foot massage at the touch of a button. You have to feel it to believe it.

Our multi-patent **Human Touch Technology®** massage system so closely replicates the therapeutic techniques used by back and spinal care professionals that it is the preferred technology of the American College of Chiropractic Orthopedists. It is designed to follow the natural contour of your spine and move three-dimensionally in four different modes.

Your 24/7 Personal Robotic Masseuse

HT-135 does what you tell it, from the ergonomic headrest to the rotating calf and foot massager. You customize each movement to your own preference. The remote control gives you direct access to three individual pre-programmed massage sessions lasting 15 minutes each.

Discover the ultimate in Robotic Massage®, wrapped up in a stylish, superior quality exterior that is virtually maintenance free.

Rotating Multi-Speed Foot & Calf Massager

Feels like strong hands providing a powerful three-dimensional massage for your calves and feet.

Solid Oak
lower armrest
and base

Full-Body Stretching

The calf massage wells will gently hold your legs as the chair reclines to arch your back and engage a gentle body stretching program with an active massage of your lower back.

- NEW!** Visco elastic foam seat cushion
- NEW!** Cloth 'soft window' for more intense neck massage
- NEW!** Auto-restore (back upright/footrest down)
- NEW!** Digital countdown timer
- NEW!** Two-layer folded design head pillow
- NEW!** Multi-function thumb joystick backrest and footrest control
- NEW!** Ergonomically designed remote control

Human Touch Technology® starts with a patented mechanism that works like “wrists and arms.” We added “hands”— massage rollers that move three-dimensionally on a contour track. The result is a Robotic Massage® that feels remarkably human.

Calf Massage

Foot Massage

Rolling: Feels like the gentle hands of a massage therapist, pressing firmly along your spine. It relieves tension and loosens the muscles to prepare your back for deeper massage.

Kneading: Feels like thumbs pressing firmly in a circular motion on both sides of the spine. This therapeutic motion goes deeper, lifting and stretching muscles to improve circulation.

NEW! Kneading + Percussion: In this function, three motors are employed to give you a vigorous deep-tissue massage. This is the most intense, aggressive massage available.

Compression: (HTT™ exclusive) Feels like the heels of a professional therapist's hands firmly pushing alternately into the muscles along each side of your spine. This mode aids in improving mobility and posture.

Percussion: Feels like fists or the edge of hands rapidly tapping on your back muscles. This is the deep muscle therapy popular in sports medicine. It flexes spinal joints, relieves pressure, and invigorates your entire back.

Rolling:	1 speed
Kneading:	1 program, 2 speeds
Kneading + Percussion:	1 program, 2 speeds
Compression:	2 speeds
Percussion:	1 program, 2 speeds
Adjustability:	2 options
Height:	3 height levels
Width:	3 settings in rolling and percussion modes

Adjust Manual:	Manually moves massage rollers to desired location for kneading, compression and percussion
Programmed Massage Sessions:	3 invigorating 15 minute pre-programmed massage sessions
Backrest:	Power activation of recline/incline
Footrest:	Power activation of deploy/retract

Calf + Foot Massage:	1 program, 2 speeds
Stop/Auto Park:	Stops all massage functions and parks the massage rollers in their highest position
Auto Restore:	Stops all massage functions and restores the backrest and footrest to their respective starting position

FUNCTIONS

the art of style

Our trend-setting team of designers continually introduce new colors, new styles, and new fabrics, because we know it's not enough that our products provide the most effective Robotic Massage® on the market. To deserve a place in your environment, our chairs must be great looking as well as therapeutic.

It's our way of saying we understand what you want.

the science of comfort

Everyone likes to feel good. At **Interactive Health**®, it's all we think about.

Our team of scientists, researchers, and engineers analyze the treatments used by massage therapists, chiropractors, and physicians, and turn those techniques into the sophisticated **Human Touch Technology**® mechanisms that animate our family of chairs. By building on our decades of experience as the world leader in massage technology, we consistently produce the most advanced Robotic Massage® systems ever devised.
