

# **34" CURVED ULTRAWIDE FREESYNC GAMING MONITOR**

**(3440 X 1440, WQHD 165HZ)**

KAMN34F14QUVA

# SAFETY & WARNINGS

Ensure to read all instructions and warnings in this user guide prior to first use. Retain this user guide for future reference.

- This monitor is designed with ventilation holes on the back of the casing. Do not cover or block them.
- Avoid placing the monitor near heaters, stoves, fireplaces or other heat sources.
- Do not place this monitor in rooms lacking adequate ventilation.
- Do not insert any objects or spray any liquids into the vents.
- Do not position the monitor in unsafe locations. If the monitor falls, it may be damaged and cause injury to people within its vicinity.
- Do not place heavy objects on the monitor, its power cord or any connected cables.
- Do not open the back panel of the monitor as it contains a high-voltage current even when not plugged in.
- Unplug the monitor if it will not be used for an extended period.
- Ensure the monitor is unplugged before cleaning.

# COMPONENTS

Monitor

Power cord

Stand stem

DP cable

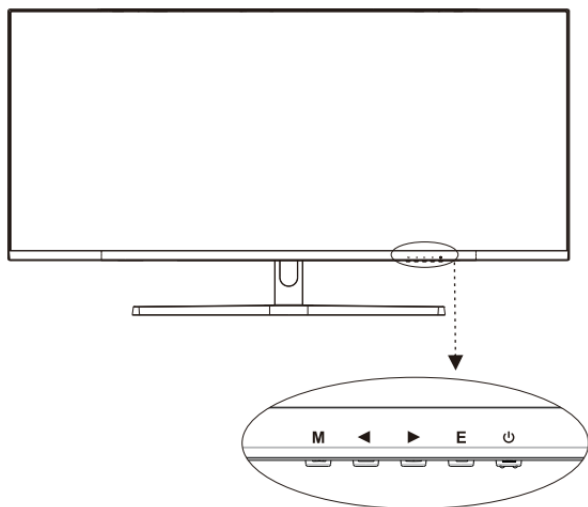

Stand base

## User guide

Check if all items are included in your monitor set, if there are missing items; contact [help.Kogan.com](https://www.help.kogan.com) for support.

# OVERVIEW

Standby Power Off/On

E-Exit/Input Menu

Up/Brightness

Down/Volume

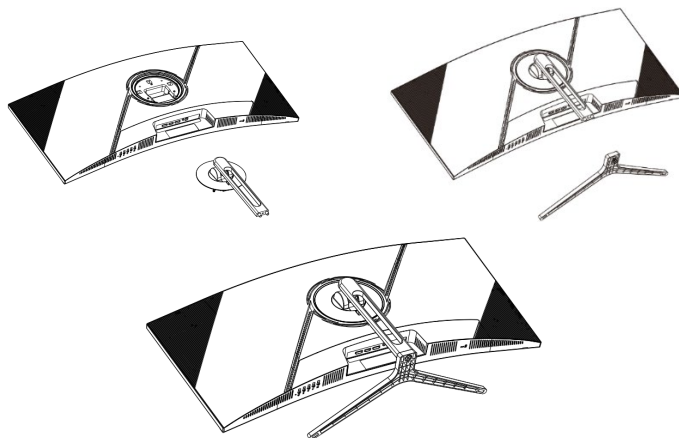

M-Menu/Select

## Button Function

1. Press menu key display OSD and select.
2. Press E key display source (HDMI/DP optional).
3. Press down key volume; Press up key brightness.

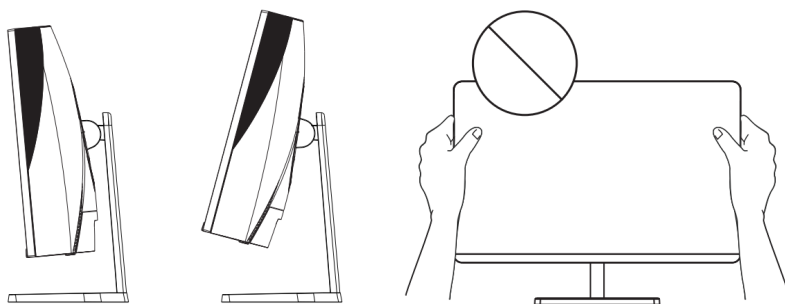

# ASSEMBLY

1. Gently lay the monitor on the cloth with the screen facing down.
2. Align the stand base with the stand stem, then clip the stand base into the stand stem.
3. Attach the assembled stand to the rear of the monitor.

## Adjusting the angle of the monitor

1. The screen can be tilted forwards up to  $5^{\circ}$  or backwards up to  $15^{\circ}$ .
2. To adjust the angle, hold the edges of the screen with both hands and tilt.

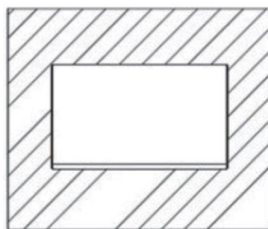

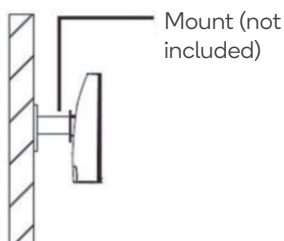

**Note:** Do not directly touch the screen when tilting.

# VESA MOUNT

If mounting to a wall, ensure the stand base and stand stem are disconnected from the monitor.

1. With the display side facing down, lay the monitor on a soft cloth to prevent damage.
2. Identify the four wall mounting screws on the back of the monitor.
3. Mount the monitor as desired with the steps provided with your VESA mount.

## Notes:

- Ensure there is at least a 10cm clearance away from all sides of the monitor.
- The mounting hole distance for this monitor is 75mm x 75mm.
- VESA mount and mounting accessories are not included.
- Images are for reference only.

# OPERATION

1. Connect the monitor to your computer via HDMI/DP.
2. Connect one end of the power cable into the power port of the monitor. Connect the other end into an outlet, then turn the outlet on.

**Note:**

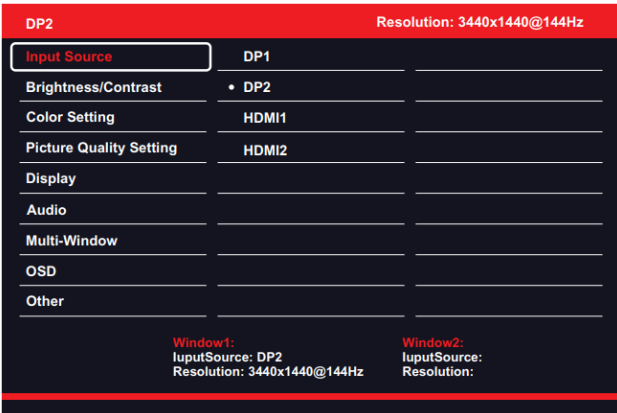

It is recommended that a surge protector with adequate voltage is used if the monitor cannot be directly connected to an outlet.

3. Press the power button to turn the monitor on.

## On-Screen display (OSD) menu

The OSD menu allows adjustments to various settings for the monitor.

1. Press the menu/select button to access the OSD menu.
2. Press the up and down buttons to browse through the categories of settings. Press the menu/select button to enter the sub-menu.
3. Press the up and down buttons to browse through the sub-menu. Press the menu/select button to enter the adjustment settings of the desired setting.
4. Press the up and down buttons to adjust the desired setting. Press the menu/select button to confirm the adjustment.
5. Press the exit/input menu button to exit the OSD menu.

## FreeSync

- To use this feature, ensure your hardware has FreeSync capabilities and that the graphics drivers are fully up to date.
- After connecting the monitor, you may receive a prompt to enable the feature on your computer. If you do not receive the prompt, you may need to enable the function in the graphics card menu.
- Check your graphics card manufacturer's documentation for instructions on how to turn on and/or enable FreeSync.

**Note:** The feature is enabled by default when set to a 165Hz refresh rate.

## Input menu shortcut

To quickly change the input source between HDMI and DP:

1. Press the exit/input menu button to access the input menu.
2. Press the up and down buttons to highlight the desired input source, then press the menu/select button to confirm.

## Brightness shortcut

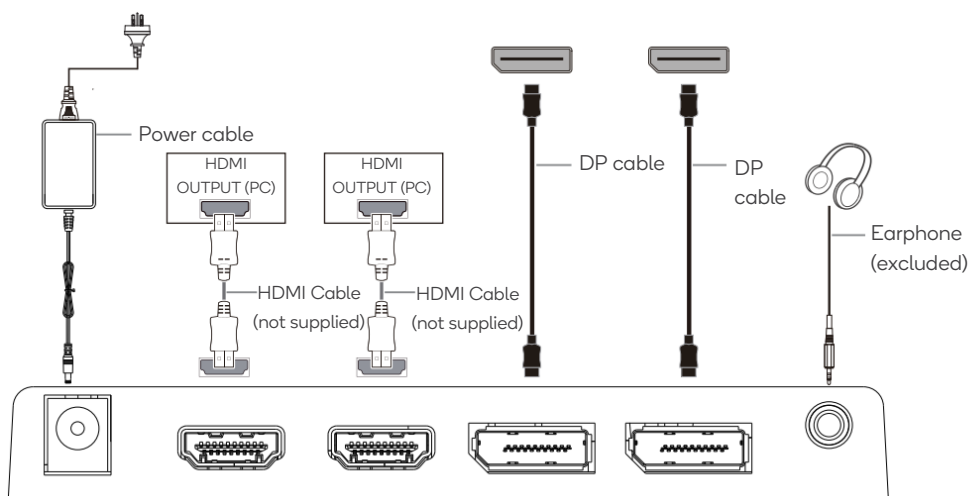

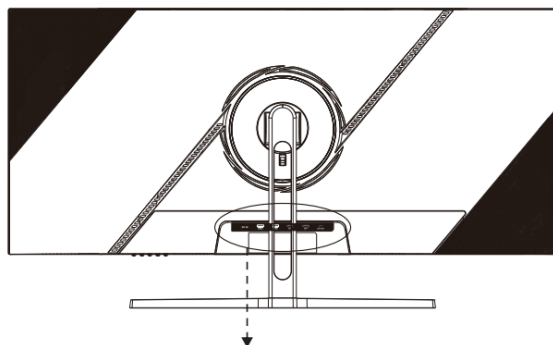

When outside the OSD menu, press the up and down buttons to adjust the brightness.

## ECO modes

There are various pre-set colour modes suited for various use cases available on this monitor. These can be accessed using the ECO modes menu. The modes include the following:

- Standard (suitable for most activities)
- Movie (best suited when watching movies)
- RTS (best suited when playing real time strategy games)
- FPS (best suited when playing first person shooter games)
- Game (best suited for general gaming)
- Text (best suited when reading text)

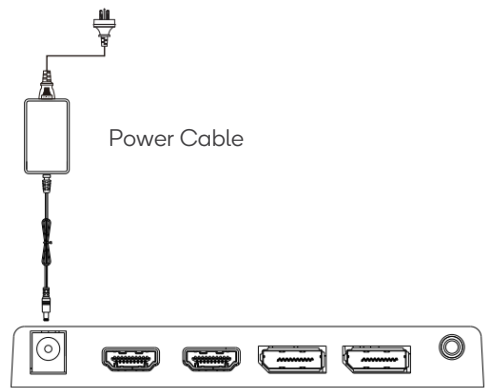

# CONNECTIVITY

**Note:** Before connecting, ensure the display is switched off.

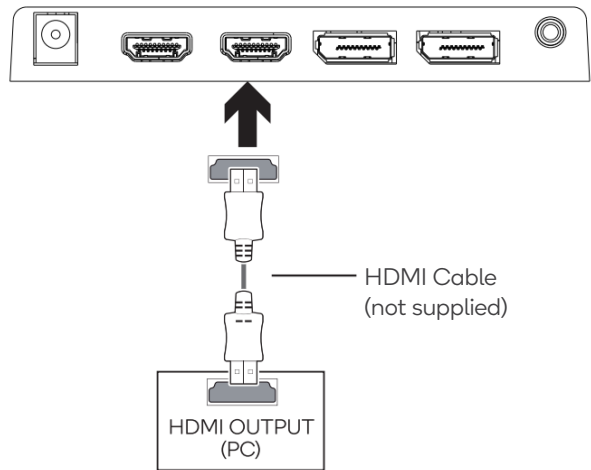

**Power cable**

Connect one end of the power cable into the power port on the monitor. Connect the other end into a power socket.

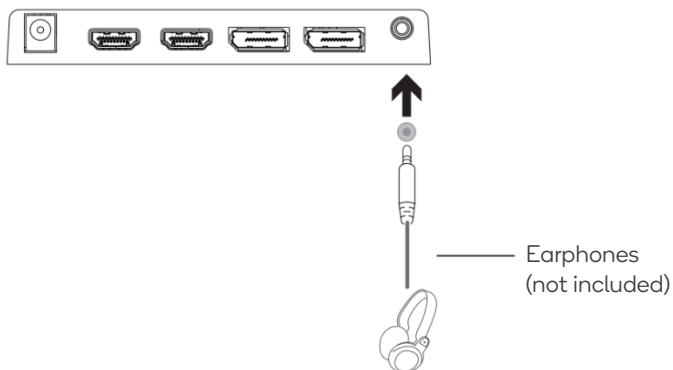

**HDMI**

- For the monitor to receive HDMI signals to your computer, plug one end of the included HDMI cable into the HDMI port on the monitor.
- Plug the other end into the HDMI port on your computer.

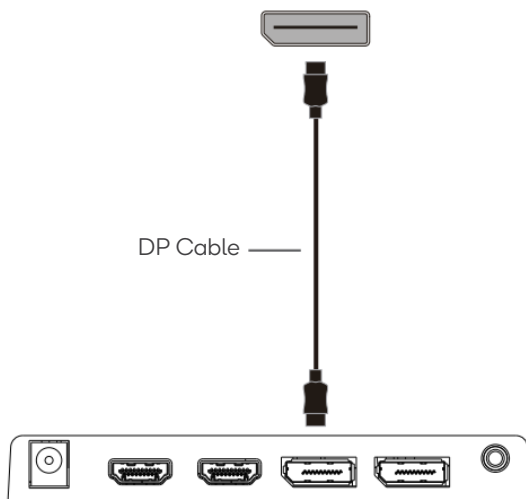

### Audio port (3.5mm)

- To receive audio signals to your computer, plug your earphones, headphones or other audio device (not included) into the 3.5mm audio port on the monitor.
- If any audio device is connected to the computer at the same time, it will not produce sound.

### DisplayPort (DP)

- Connect the supplied DP cable to the DP IN port at the back of the monitor.
- Plug the other end into the DP port on your computer.
