

Welcome to AirBank

Power On
Press the power button
once to activate AirBank.

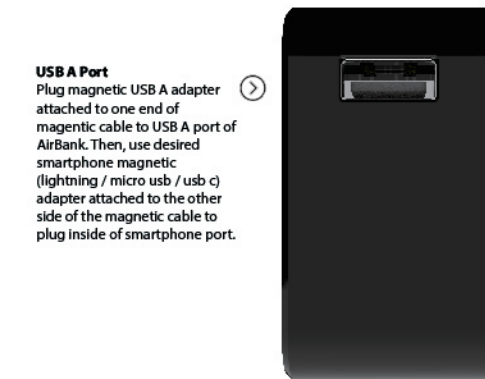

Ideal Placement
Adhering AirBank in any direction on back of smartphone will work. However, the most comfortable direction is to place AirBank in line and up straight with smartphone, where the logo "AirBank" will be horizontally in line with your smartphone. Furthermore, in this direction, AirBank's power button will be in line with the right hand sided power button of your smartphone.

Cleanliness
Suction cups will not get dirty if AirBank is adhered on proper surfaces with the right intention of using AirBank. If AirBank suction cups do get dirty, take a piece of tissue and damp the corner of tissue slightly in water. Then, dab the damp tissue on each suction cup. The process will take less than 10 seconds and suction cup will return back to it's full adhering strength.

Fast Wireless Charging
True fast wireless charging starts with AirBank. AirBank will fast wireless charge your smartphone up to 10w.

USB A Port
Plug magnetic USB A adapter attached to one end of magnetic cable to USB A port of AirBank. Then, use desired smartphone magnetic (lightning / micro usb / usb c) adapter attached to the other side of the magnetic cable to plug inside of smartphone port.

Fast Wired Charging
Once USB A and desired input port of smartphone has been plugged, AirBank will fast wire charge your smartphone of up to 10w.

USB C Port
Plug magnetic USB C adapter attached to one end of magnetic cable to USB C port of AirBank. Then, use magnetic USB A adapter attached to the other side of the magnetic cable to plug inside 10w fast charging wall adapter.

Fast Wire Charge AirBank
Once USB C and USB A ports have been plugged, AirBank will be fast wire charged of up to 10w.
