

Product Manual

Thank you for using the Smart Camera

APP Download installation

- APP compatible with iOS and Android, search for "Tuya Smart" in the App Store and Android Market or "Smart Life", or scan the QR code below and complete the installation;
- Open the APP and follow the prompts to register and log in.

Tuya Smart

Smart Life

Reset the camera

- Power on the camera and wait for the camera to start;
- Press and hold the device reset button for 5 seconds, and the device prompts "Drip" or "Reset successfully, restarting the camera";
- The camera enters the configuration network state.

Note: The position of the reset button is for reference only, depending on your device.

Method 2: QR code configuration network

- Open "Tuya Smart" or "Smart life" APP to complete account registration and login;
- Enter the device list. Tap in the upper right corner to go to the Add Device page;
- Select Manually Add the camera/lock below and select the corresponding product type.

- Enter the WiFi and password you want to connect to: (do not include the WiFi password ~!) Special characters such as @#5% (), when the device is configured with WiFi, the phone and device should be as close to the router as possible, so that it can be added. Quick device configuration, click "Next";
- After the APP generates the distribution network QR code, please point the phone screen at the camera to scan the distribution network QR code;
- When the camera recognizes the QR code, it will sound a prompt tone. Click "I Heard a prompt" in the APP to complete the network configuration.

Real-time preview

- View the added camera in the device list and tap to view the live preview.
