IMPORTANT WARNING

WARNING KEEP THESE INSTRUCTIONS IN A SAFE PLACE

WARNING: In order to limit accidents such as electric shocks or personal injury, and in order to limit material damage due to misuse of the appliance, please read these instructions carefully and follow them strictly. Reading the operating instructions will help you get to know your appliance and enable you to use the equipment correctly. Please read these instructions in their entirety and make sure that anyone else who may use the appliance also reads them beforehand. Our equipment is designed for professional use and must not be used by children under any circumstances.

UNPACKING

- Carefully remove the equipment from the packaging and take out all the boxes or packets containing attachments or specific items.
- WARNING** - some of the tools are very sharp e.g. blades, discs... etc.
- Store manuals, tools and spare parts in a safe place available to the users of the machine

USE

- The machine must not be modified in any way from its original configuration.
- Never tamper with, or defeat the purpose of the locking and safety systems.
- Do not put nonfood objects in the bowl.
- Do not leave the machine running unattended.
- The machine must be operated and stored in a location not subject to water drips or spray or explosive vapors.

CLEANING

- As a precaution, always unplug your appliance before cleaning it.
 - Always clean the appliance and its attachments at the end of each cycle.
 - Never immerse the motor base in water.
 - For parts made from aluminum, use metal safe detergents intended for aluminum.
 - Caustic detergents used in automatic dishwashers quickly degrade plastic parts. Hand wash plastic parts if possible.

CONNECTION

- Always check that your power supply corresponds to that indicated on the identification plate on the motor unit and that it can withstand the amperage.
- The unit must always be connected to a grounded outlet with Ground Fault Circuit Interrupter (GFCI) protection device.
- Always check that the motor shaft rotates in counter clockwise direction before the blades are installed.

MAINTENANCE

- Robot Coupe can in no way be held responsible for the user's failure to follow the basic rules of cleaning and hygiene.
- Replace seals every 3 to 6 months. Lubricate with food safe grease.
- It is particularly important to maintain and check the attachments since certain ingredients contain corrosive agents, e.g. citric acid.
- Never operate the appliance if the power cord or plug has been damaged or if the appliance fails to work properly or has been damaged in any way.
- If the machine malfunctions in any way discard any food being processed and refer service to qualified maintenance technicians.

HANDLING

- Always take care when handling the blades, as they are extremely sharp.
- Wear cut-proof gloves when handling the blades.

SERVICE

ROBOT COUPE U.S.A., INC. ONE YEAR LIMITED COMMERCIAL WARRANTY

YOUR NEW ROBOT COUPE COMMERCIAL PRODUCT IS WARRANTED TO THE ORIGINAL PURCHASER FOR A PERIOD OF ONE YEAR FROM THE DATE OF PURCHASE.

This LIMITED COMMERCIAL WARRANTY is against defects in the material and / or workmanship, and includes labor for replacement of defective parts, provided repairs are performed by an authorized service agency (see attached list). The CUSTOMER must inform the Service Agency of the possibility of warranty coverage and provide a copy of the dated sales or delivery receipt BEFORE WARRANTY REPAIRS ARE BEGUN. All parts or accessories replaced under warranty must be returned to the Service Agency. The warranty for work done or parts replaced under warranty expires at the end of the original warranty period.

Replacement parts and accessories are warranted for ninety (90) days from the date of purchase when purchased separately and will be verified by dated sales receipt OR packing slip which list that item.

All Robot Coupe Products are considered commercial use only.

THE FOLLOWING ARE NOT COVERED UNDER WARRANTY:

- 1 - Damage caused by abuse, misuse, dropping, or other similar incidental damage caused by or as result of failure to follow installation, assembly, operating, cleaning, user maintenance or storage instructions, including failure to verify and correct rotation of three phase motors.
- 2 - Labor to sharpen and/or parts to replace knife assemblies or blades which have become dull, chipped, or worn due to normal use.
- 3 - Material or labor to renew or repair scratched, stained, chipped, dented, or discolored surfaces, blades, knives, attachments, or accessories.
- 4 - Transportation charges to or from an authorized service agency for repairs of a machine designated as "CARRY IN SERVICE" (Table Top Models).
- 5 - Labor charges to install or test attachments or accessories (i.e. bowls, cutting plates, blades, attachments) which are replaced for any reason.
- 6 - Charges to change Direction-of-Rotation of Three Phase electric motors (INSTALLER IS RESPONSIBLE). All Robot Coupe products must operate counter-clock-wise.
- 7 - SHIPPING DAMAGE IS NOT COVERED BY WARRANTY. Visible and hidden damages are the responsibility or the freight carrier. The consignee must file a damage claim promptly against the carrier, or upon discovery in the case of hidden damage.
- 8 - Any ROBOT COUPE COMMERCIAL PRODUCT used in an Industrial application.

Commercial equipment use is defined as but not limited to the preparation of food substance within the confines of a restaurant/facility, that is sold and consumed within said restaurant/facility.

Industrial equipment use is defined as but not limited to the manufacturing of food substance in large batch quantities. The processed food is then packaged and sold off site and or to a distributor for resale off site.

KEEP ALL ORIGINAL CONTAINERS AND PACKING MATERIALS FOR CARRIER INSPECTION

All Robot Coupe equipment should be operated in an ambient room temperature of 60 degrees (F) or higher.

Robot Coupe U.S.A., Inc., Robot Coupe S.A., or any of their affiliates, distributors, officers, directors, agents, employees or insurers will not be obligated for consequential or other damages, losses, or expenses in connection with or by reason of the use of or the inability to use the machine for any purpose.

THIS WARRANTY IS GIVEN EXPRESSLY AND IN LIEU OF ALL OTHER WARRANTIES EXPRESSED OR IMPLIED, FOR MERCHANTABILITY AND FOR FITNESS TOWARD A PARTICULAR PURPOSE AND CONSTITUTES THE ONLY WARRANTY MADE BY ROBOT COUPE, U.S.A., Inc.

! WARNING

KEEP THESE INSTRUCTIONS IN A SAFE PLACE

IMPORTANT WARNING

WARNING: In order to limit accidents such as electric shocks, personal injury or fire, and in order to limit material damage due to misuse of the appliance, please read these instructions carefully and follow them strictly. Reading the operating instructions will help you get to know your appliance and enable you to use the equipment correctly. The operation manual should be kept within easy access to all users for reference and should be read completely by all first time users of the machine. Our equipment is designed for professional use and must not be used by children under any circumstances.

UNPACKING

- Carefully remove the equipment from the packaging and take out all the boxes or packets containing attachments or specific items.
- WARNING: some of the parts are very sharp e.g. blades... etc.

ASSEMBLY PROCEDURES

- Follow the various assembly procedures carefully (see page 6) and make sure that all the attachments are correctly positioned.

USE

INSTALLATION

- We recommend that you install your machine on a stable solid base at a comfortable working height.
- Machine must be operated and stored in a location not subject to water drips or spray or explosive vapors.

CONNECTION

- Always check that your power supply corresponds to that indicated on the serial number plate and that it is properly sized.
- Always connect the machine to a grounded outlet with GFCI (ground fault circuit interrupt) protection.

HANDLING

- Always wear cut-resistant gloves when handling the cutter blade.

- For plastic parts, do not use detergents that are too alkaline (i.e., containing too much caustic soda or ammonia...).
- Robot Coupe can in no way be held responsible for the user's failure to follow the basic rules of cleaning and maintenance.

MAINTENANCE

- Always unplug the appliance before servicing.
 - Check the seals regularly and ensure that the safety devices are in good working order.
 - It is particularly important to maintain and check the attachments since certain products contain corrosive agents e.g. citric acid.
- NOTICE:** Never operate the appliance if the power cord or plug has been damaged.
 - If the machine fails to operate as described in this manual, or if the machine malfunctions in any way, remove the machine from use and have it serviced. Additionally, discard all food processed at the time of the malfunction.
 - Contact your local Authorized Service Agency if something appears to be wrong.

CLEANING

- Always unplug your machine before cleaning.
 - Always clean the machine and attachments at the end of each use.
 - Never place the motor unit in water.
 - For parts made of aluminum alloys, use cleaning detergents suitable for aluminum.

INTRODUCTION TO YOUR NEW EMULSIFIER-MIXER **Blixer® 2 • Blixer® 3 •** **Blixer® 4 • Blixer® 4 V.**

ROBOT-COUPE has developed a new concept in appliances: the **Blixer®**.

The Blixer® combines the features of two well-known appliances: the cutter and the blender-mixer.

The Blixer® is perfectly geared to professional needs. It can perform a number of tasks that you will soon discover as you use it.

The Blixer® will make it easy to prepare mixed liquid or semi-liquid, raw or cooked meals.

The Blixer® replaces the blender which has never been entirely satisfactory because it cannot process solid foods.

Thanks to its simple design, all components requiring frequent handling for maintenance or cleaning can be fitted and removed quickly.

To make things easier for you, this manual gives a breakdown of all the various assembly operations. This manual contains important information designed to help the user get the most out of the emulsifier-mixer Blixer®.

We therefore recommend that you read it carefully before using your machine.

SWITCHING ON THE MACHINE

• ADVICE ON ELECTRICAL CONNECTIONS

Before plugging in, make sure your power supply corresponds to that indicated on the machine's serial number plate.

⚠️ WARNING

This appliance must be plugged into an grounded socket (risk of electrocution).

Your Blixer® 2 • Blixer® 3 • Blixer® 4 • Blixer® 4 V. is fitted with a single phase motor.
It comes with a power supply cord which plugs into a standard 120V/60Hz, 15 Amp grounded power outlet.

• CONTROL PANEL

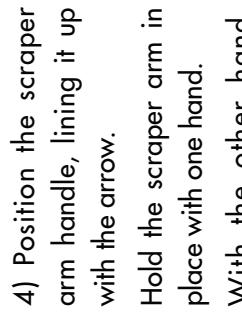

Red knob	=	"Off" switch.
Green knob	=	"On" switch.
Black knob	=	"Pulse" control.
Blixer® 2 • Blixer® 3 • Blixer® 4: 1 speed 3,450 rpm.		
Blixer® 4 V.: Variable speed: 300 to 3,600 rpm		

ASSEMBLY

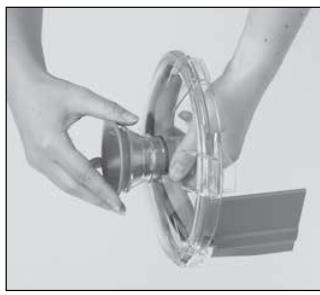

- With the motor base facing you, place the bowl onto the motor base with the handle toward the front. Turn the bowl just off-center and to the left as you lower it onto the base.

- Place the blade assembly onto the motor shaft. Rotate the blade assembly until it drops into place. The bottom blade should be level with and just off the bottom of the bowl.

- Position the scraper arm handle, lining it up with the arrow. Hold the scraper arm in place with one hand. With the other hand, press down on the scraper arm handle, in order to compress the two lid wipers, and turn in an clockwise direction.

- Locate the downward-facing tab on the bowl lid. Place the lid on the bowl with the tab over the bowl handle, then lock the bowl clamps over the lid.

OPERATION

THE UNIT SHOULD BE OFF EXCEPT WHEN PROCESSING IS UNDERWAY. It is recommended that the machine be operated on a 50% duty cycle. This is easily accomplished since the preparation time (cleaning, coring, peeling, and loading) takes longer than the processing time. This will increase the life of your machine.

When running frozen products in the bowl attachment, the size of the product should not exceed 1 inch (2.5 cm).

The Blixer® will enable you to perform all your cutting tasks in minimum time; we recommend therefore that you keep a close eye on the mixture in order to obtain the desired results.

HOSPITAL USES

SPOON FEEDING

- Minced foods; meat, fish...
- Mousses; vegetables, fish...
- Compotes of stewed fruit
- Vegetable purees

SEMI-LIQUID FEEDING

This simply entails diluting spoon feeding preparations:

- Minced meat + gravy
- Puree + liquid (broth, milk...)
- Soups/creamed soups
- Fruit compotes + syrup or water

LIQUID FEEDING (for use via tubes)

- Soups and any preparations that can be liquidized.

RESTAURANTS AND DELICATESSEN:

- Butter mixtures: snail butter, salmon butter, anchovie butter...
- Sauces: green sauce, mayonnaise, remoulade, ailloli, emulsify sauces with tomatoes, cream, parsley...
- Grinding for bisque: lobster, scampi, seashells...
- Grinding: herbs, seeds, powders...
- Mixing: homogenization of creams, mixed components, varied ingredients...

CLEANING

⚠️ WARNING

As a precaution, always unplug your appliance before cleaning it (risk of electrocution).

• MOTOR UNIT

Never immerse the motor unit in water. Clean it with a damp cloth or sponge.

Cleaning of the motor base assembly must be done with care.

First unplug the unit. A sponging with a cloth lightly soaked (not dripping) in a mild detergent is acceptable, making sure the water is not permitted to penetrate the shaft seal or around the switches. Clean around the shaft seal with a small brush, taking care to remove all food. Do not forget to clean the motor shaft. Rinse the motor base first using a cloth lightly dampened (not dripping) with water, then with a sanitizing solution, and dry the machine with a soft cloth removing all liquids from seal areas.

WARNING: NEVER USE PURE BLEACH.

Always dilute the detergent following the instructions given by the manufacturer.

Clean per the following instructions or as required by local health department regulations.

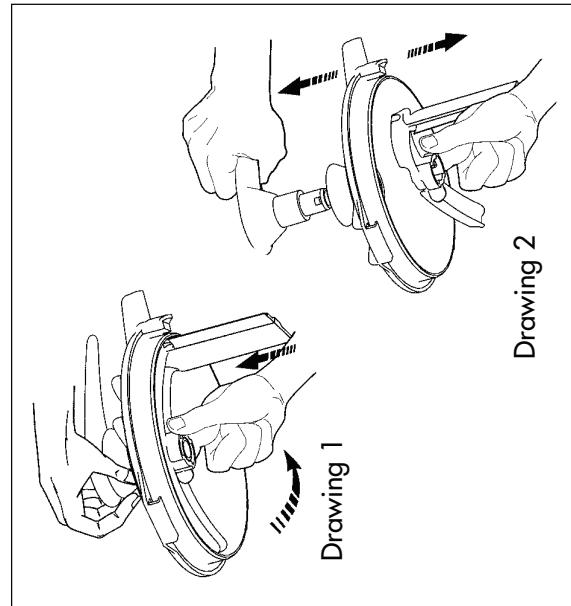

• BLADE

The blade cap should be removed for cleaning if necessary. **Wear cut-resistant gloves when removing the cap.** Put a screwdriver or similar tool into the blade assembly from the bottom, and knock the cap out the top.

• WIPER ASSEMBLY

Position the scraper arm handle, lining it up with the arrow.

Hold the scraper arm in place with one hand. With the other hand, press down on the scraper arm handle, in order to compress the two lid wipers, and turn in an anticlockwise direction.

Drawing 1

Drawing 2

The bowl, blade, cap, lid, and wiper assembly are dishwasher safe. They can be washed in a dish machine or three-tank system pot sink. Pre-rinse the attachments before washing to remove any bulk food on the parts. A stiff bristle brush or power sprayer faucet attachment is effective in knocking the food out of the crevices as a pre-rinse procedure. The washer should have an industry-standard wash, rinse and sanitization cycle. Allow the parts to air-dry after sanitizing and before reassembly.

NOTE: The high temperatures of dish machines will tend to shorten the life of the plastic and rubber parts. Hand washing using a three-pot sink will provide for the longest life of these parts. Wear cut-resistant gloves when cleaning the blade.

! IMPORTANT

Check that your detergent is suitable for cleaning plastic parts. Some washing agents are too alkaline (e.g. high levels of caustic soda or ammonia) and totally incompatible with certain types of plastic, causing them to deteriorate rapidly.

MAINTENANCE

• BLADE

The quality of the cut depends mainly on the sharpness of your blades and the degree of wear. The blades are actually wearing parts, which should be replaced occasionally to ensure consistent quality in the final product.

• MOTOR SEAL

An examination should be made periodically to assure that a seal against liquids is being maintained around the motor shaft. With proper care and depending on use, the seal should last for a year or more. However, it can and should be replaced whenever wear or erosion is noted or minimally once every three to six months. It is recommended that the seal be replaced by an authorized repair agency.

• BOWL LOCKING WASHER

The bowl locking washer is located below the bowl and holds the bowl in place. If it becomes worn, it needs to be replaced.

• WIPER ASSEMBLY

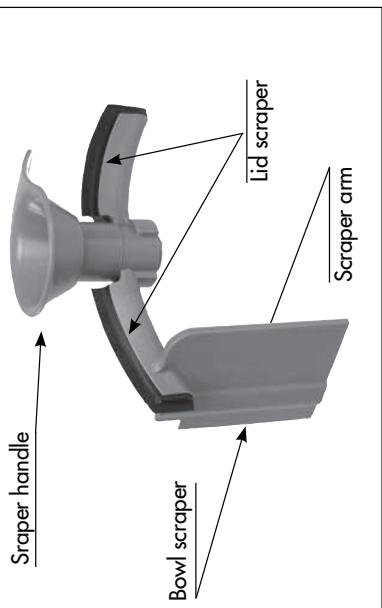

The assembly includes three rubber wipers. They will need to be replaced when they become worn. Replacements are available.

• WORKING HEIGHT

We recommend that you position the Blixer® on a stable worktop so that the upper edge of the cutter bowl is at a height of between 47 and 51 inches.

• NOISE LEVEL

The equivalent continuous sound level when the Blixer® is operating on no-loads is less than 70 dB (A).

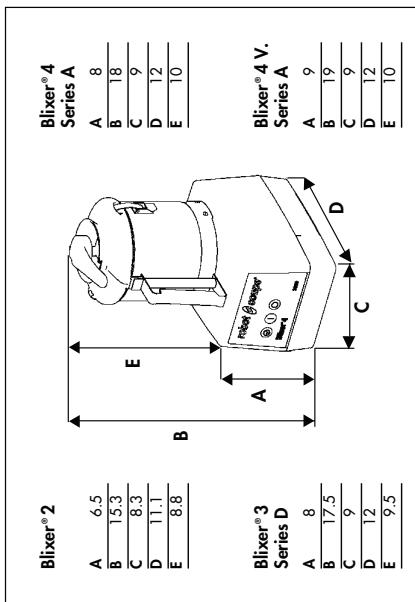

TECHNICAL SPECIFICATIONS

• WEIGHT (lbs)

	Net	Gross
Blixer® 2	21.6	24.3
Blixer® 3 Series D	25.4	28.7
Blixer® 4 Series A	29.8	33.0
Blixer® 4 V. Series A	29.8	33.0

• DIMENSIONS (in inches)

SAFETY

! WARNING

**The blades are extremely sharp.
Handle with care.**

The Blixer® 2, Blixer® 3, Blixer® 4 and Blixer® 4 V. are fitted with a safety device and motor braking system. When you open the lid, the motor stops. To restart the machine, simply close the lid and press the green button.
Allow the blades to come to a complete stop before opening the lid so that liquids will not splash.

In addition, the Blixer® 2, Blixer® 3 and the Blixer® 4 are equipped with a **thermal protector** insert in the motor winding which automatically stops the motor if the machine is overloaded. If this happens, allow the machine to cool completely before restarting. The thermal protector will reset automatically.

The Blixer® machines are equipped with a **manually resettable overloaded circuit-breaker**. If the machine is overloaded, the breaker will trip. If this occurs, allow the machine to cool completely, then reset the breaker located on the motor base.

Try to restart. If the machine will not start, remove the bowl, reduce the amount of food being processed, and try again.

REMEMBER

- Never try to override or defeat the purpose of, the locking and safety systems.**
- Never put nonfood objects into the machine openings.**
- Only use the food pushers to force the food into the machine.**
- Do not overload the appliance.**
- Never leave the machine running unattended.**

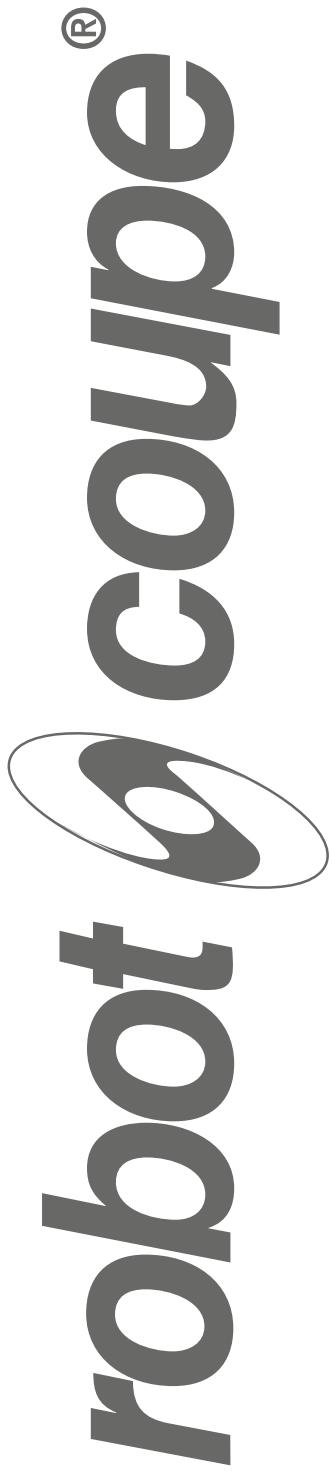

SERVICE

See warranty first then;

Should your unit require service, check with your distributor to see where local service is available. If not or if you wish your unit to be serviced at the factory, call for return instructions and ship the unit prepaid to our factory address.

	<p>FAILURE TO FOLLOW THIS PROCEDURE WILL VOID YOUR WARRANTY.</p> <p>DANGER : Risk of electric shock. During the procedure the apparatus is under voltage. Put the Cutter bowl, without blade, on the motor base. Close the lid on the bowl. Lay the apparatus on its right side. Connect a voltmeter (<u>DC voltage measure</u>) in parallel with motor to A+ and A- on the variator (VAR). Apply power to the apparatus. Run the motor by pushing the On knob.</p> <p>PROCEDURE TO SET MINIMUM AND MAXIMUM SPEED This procedure requires a qualified electrician</p> <ol style="list-style-type: none"> Minimum speed setting : Rotate the apparatus knob to full OFF (counterclockwise) On the variator (VAR), adjust MIN POT to read 8.5 volts (± 0.2 volts). Maximum speed setting : Rotate the apparatus knob to full ON (clockwise) On the variator (VAR), adjust MAX POT to read 90 volts (± 0.2 volts). Caution : if the ACCEL POT is reset then repeat the full setting procedure of the minimum and maximum speed.
	<p>EL NO RESPETO DE ESTE PROCESO ANULARA VUESTRA GARANTIA</p> <p>PELIGRO : Riesgo de choque eléctrico. Durante el proceso el aparato esta sobre tensión. Meter la cuba sin el cuchillo. Cerrar la tapa sobre la cuba. Acostar el aparato sobre el lado derecho. Conectar un voltímetro (sobre tensión continua) en derivación con el motor, entre A+ y A- sobre el variador (VAR). Meter el aparato sobre tensión. Arrancar el motor apretando el botón de marcha.</p> <ol style="list-style-type: none"> Reglaje de la velocidad mini : Volver el botón del aparato al mini (al tope del sentido contrario de las agujas del reloj). Sobre el variador (VAR), ajustar MIN POT para tener 8.5 voltios (± 0.2 voltios). Reglaje de la velocidad maxi : Volver el botón del aparato al maxi (al tope del sentido de las agujas del reloj). Sobre el variador (VAR), ajustar MAX POT para tener 90 voltios (± 0.2 voltios). Si el reglaje a 90 voltios es imposible con MAX POT, ajustar ACCEL POT para conseguir 90 voltios. Cuidado : En este caso, volver a hacer el reglaje completo para la velocidad mini y la velocidad maxi. <p>LE NON RESPECT DE CETTE PROCEDURE ANNULERA VOTRE GARANTIE.</p> <p>DANGER : Riesgo de choc électrique. Durant la procédure l'appareil est sous tension. Mettre en place la cuve Cutter sans le couteau. Fermer le couvercle sur la cuve. Coucher l'appareil sur son côté droit. Brancher un voltmètre (mesure de tension continue) en parallèle avec le moteur, entre A+ et A- sur le variateur (VAR). Mettre l'appareil sous tension. Démarrer le moteur en appuyant sur le bouton Marche.</p> <ol style="list-style-type: none"> Réglage de la vitesse mini : Tourner le bouton de l'appareil au minimum (en butée dans le sens anti-horaire). Sur le variateur (VAR), ajuster MIN POT pour avoir 8.5 volts (± 0.2 volts). Réglage de la vitesse maxi : Tourner le bouton de l'appareil au maximum (en butée dans le sens horaire). Sur le variateur (VAR), ajuster MAX POT pour avoir 90 volts (± 0.2 volts). Si le réglage à 90 volts est impossible avec MAX POT, ajuster ACCEL POT pour obtenir 90 volts. Attention : Dans ce cas, refaire ensuite le réglage complet pour la vitesse mini et la vitesse maxi.
	<p>PROCEDURE DE REGLAJE DES VITESSES MINI ET MAXI A effectuer par un personnel qualifié</p> <p><i>robot à coupe®</i></p>
