

Ambar Bluetooth Headset

(with rechargeable charging case)

Model No.: Ambar EPC 04

User Manual

We, the team of Ambar, thank you for your support by purchasing this Bluetooth Headset. In order to help you use all the functions of this Bluetooth in the best possible way to make your hectic life easier, we have prepared this User Manual for you.

Functions of all Keys/Buttons

(1) Pairing with First Device

Before you make use it for the first time, you need to pair this Bluetooth Headset with your mobile or any other Bluetooth device by following steps:

1. **Turn on the Bluetooth**, the LED indicator will flash between red and blue alternately. The Bluetooth will report you “Power on” in your ear if you are wearing it.
2. **Turn on your mobile phone's Bluetooth function and search for “Ambar EPC 04”** from the list of new available Bluetooth devices. Once you connect, it will report “connected” in your ear.

Next time when you want to connect this Bluetooth to your mobile, you will not need to pair again. It will be automatically connected.

SIMPLE TWO STEPS

EASY AND QUICK PAIRING

(2) Pairing with Second Device

- a) After the first cell phone's pairing is done successfully, first, disconnect it from the first device.
- b) Now you can pair the second cell phone the way you did the first one, after the second cell phone's pairing is successfully done with voice report "connected", please connect the first phone with option "call phone audio" and another device with "media audio".

(3) Answer/End/Disconnect the call/Redial

- a) Once there is an incoming call, press top button on the mic as shown in **Image 1.1** to receive call and also to end a call after conversation. If you do not want to receive a call but disconnect, you can do so by a long press on the same top button as shown in **Image 1.1** for 2-3 seconds.

Or

You can just speak "YES" clearly and loudly to answer the call and "NO" to reject the call.

- b) To redial the last call you made, press top button on the mic twice quickly as shown in **Image 1.1**, it will immediately call the last dialed number even if your mobile screen is not on. It's very quick! ☺

(4) Play/Pause/Next/Previous

In the normal state, press the side button on the mic as shown in **Image 1.1** to play the music, press again to stop/pause the music.

Long press/keep pressing the volume key button to keep increasing or decreasing volume. If you hit once, it will change to next song/audio when you push towards '+' sign or previous one when you push towards '-' sign. You can refer to **Image 1.1**.

(5) Charging/ Rechargeable Charging Case

The Bluetooth Headset can be charged either by the charging case provided to you in the package as that works as a power bank for your Headset. Or you can charge using any USB data cable. The case can charge your headset 2-3 times if the case is full charged. We advise you to charge your case and headset full before you use it for the first time.

So, it will be very helpful for your long trips and travels. It is easy to carry and no power is required when the case is charged. You can simply set your headset in the case on charging and use on the go.

(6) How to use Google Assistant or Siri through this Headset?

First of all, you have to make sure that Google Assistant/Siri is already set up in your mobile device and you are able to use it through your mobile.

After that, simply press the top button on the mic as shown in **Image 1.1** of your Bluetooth Headset to prompt Google Assistant/Siri. Then your mobile will start listening to your commands. Please note that Bluetooth Headset will just work as microphone and speaker on your mobile's behalf while using Google Assistant/Siri. That's the function/feature in your mobile while this Headset helps in waking/starting Google Assistant/Siri even without touching your mobile.

(7) How to Change Language of Voice Notifications of headset from English to Chinese or Chinese to English?

Long press the side button on the mic to change the language to Chinese or back to English.

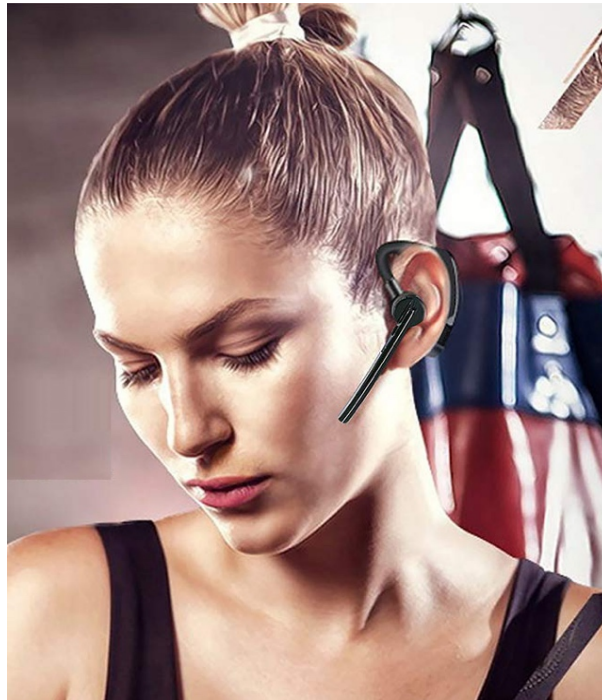

(8) Care and Maintenance

- (1) Do not expose the speakerphone to liquid, moisture or humidity.
- (2) Do not use abrasive cleaning solvents to clean the speakerphone.
- (3) Do not place the speakerphone in high temperature.
- (4) Do not expose the speakerphone to contact with sharp objects as this will cause scratching and damage.
- (5) Do not attempt to disassemble the speakerphone, as it does not contain serviceable components.
- (6) If you do not use the speakerphone for the long time, be sure to store it in a dry place, free extreme temperature, humidity and dust.
