AFBMW ReAMP 3

Audison AF bit Amplifier configuration 1: Mid Hi FR/FL + RL/RR + WFL/WFR (Bridged)

SPEAKER OUT CONFIGURATION			
1+	Front Mid-Hi Left +	5+	Front Wf Left +
1-	Front Mid-Hi Left -	5-	NOT USED
2+	Front Mid-Hi Right +	6+	NOT USED
2-	Front Mid-Hi Right -	6-	Front Wf Left -
3+	Rear Left +	7+	Front Wf Right +
3-	Rear Left -	7-	NOT USED
4+	Rear Right +	8+	NOT USED
4-	Rear Right -	8-	Front Wf Right -

SPEAKER IN COLOR CONNECTOR	
WHITE	Front Wf Left
GRAY	Front Wf Right
GREEN	Front Mid-Hi Left
VIOLET	Front Mid-Hi Right
LIGHT BLUE	Rear Left
ORANGE	Rear Right
LIGHT BLUE	Center
YELLOW	NC

AFBMW ReAMP 3

Audison AF bit Amplifier configuration 2: Mid Hi FR/FL + RL/RR + WFL/WFR + Center

SPEAKER OUT CONFIGURATION			
1+	Front Mid-Hi Left +	5+	Front Wf Left +
1-	Front Mid-Hi Left -	5-	Front Wf Left -
2+	Front Mid-Hi Right +	6+	Front Wf Right +
2-	Front Mid-Hi Right -	6-	Front Wf Right -
3+	Rear Left +	7+	Center +
3-	Rear Left -	7-	Center -
4+	Rear Right +	8+	NOT USED
4-	Rear Right -	8-	NOT USED

SPEAKER IN COLOR CONNECTOR	
WHITE	Front Wf Left
GRAY	Front Wf Right
GREEN	Front Mid-Hi Left
VIOLET	Front Mid-Hi Right
LIGHT BLUE	Rear Left
ORANGE	Rear Right
LIGHT BLUE	Center
YELLOW	NC

Technical notes

The AFBMW ReAMP 3 harness interfaces with BMW 676 HiFi systems by using the RAM module (all iDrive 7-equipped vehicles have a RAM module, regardless of audio package). The harness brings the front mid/high, rear mid/high, underseat low-pass and center signals out, and makes those speaker leads available to connect to your amplifier. The outputs of the harness terminate in an input connector for Audison FORZA bit processor, and the speaker leads are terminated with round male connectors. The RAM module must be retained in the vehicle.

AFBMW ReAMP 3 Inputs to Audison FORZA bit amplifier

BMW RAM in G20 3-Series (left rear corner of trunk)

NOTES:

- Compatibility with RAM module-equipped 676 HiFi audio packages and Audison AF bit amplifier**
 - the use with other products may require modifications and additional connections to the vehicle.
 - 676 systems use 2Ω woofers. Do not bridge two channels into a 2Ω load, since protection shutdown or amplifier damage may result. To use bridged channels, the user needs to replace the OEM 2Ω woofers with Audison APBMW S8-4 4Ω woofers. Please, make sure to confirm proper bridge wiring.
- Use the Hi-Level input configuration #11 of the manual (2-way front + rear + center)**
 - this is essential to properly route the input signal to the bit processor section.
- Confirm proper application**
 - APBMW ReAMP 1, APBMW ReAMP 2 and AFBMW ReAMP 3 use identical connectors, but with different pinouts. They are not interchangeable.
- Compatibility with AP F8.9 bit**
 - The AP F IN ADP allows the use of AFBMW ReAMP 3 with the AP F8.9 bit amplifier with full P&P connection.
