

Das Keyboard 6 Professional

CONQUER THE MODERN WORKDAY

Built with the finest quality materials and industry leading Cherry MX switches, the 6 Pro is the keyboard for the modern worker who spends time being creative in front of their computer. Easily adjust the volume for video calls or turn your music up, or down, during deep-work sessions with our oversized volume knob. Turn the white LED backlighting up or down for day or night, and save energy with the instant sleep button.

KEY FEATURES

- Built-in 2-port USB-C hub
- Oversized volume knob
- Media keys
- White LED-backlit Cherry MX switches
- Aluminum enclosure

Cherry MX White LED Backlit Switches

The backlit Cherry MX brown and blue switches create a satisfying typing experience, with beautiful visible letters, evident day or night. Rated for up to 100 million actuations, the brown, soft tactile key switches provide users with effortless typing. This switch is characterized by noticeable feedback, with noiseless guidance to act strategically by improving accuracy and longevity. The blue, clicky key switches have a more pronounced tactility, requiring slightly more force, providing a noticeable click while typing. Both switches have white LED pipes with excellent visibility and several brightness levels.
